The NWS Burlington in Vermont is offering this online course about storm spotting on reporting with a focus on observing and reporting fall and early winter weather hazards. This is a training session for those interested in becoming certified Skywarn® Spotters or are looking for a refresher. Registration is free and open to all.

Please register for NWS Burlington Virtual Skywarn® Course on Wednesday, September 30th from 3:00 PM EDT - 4:30 PM EDT at:

https://attendee.gotowebinar.com/register/6297054135012441360

After registering, you will receive a confirmation email containing information about joining the webinar.

We will discuss the following topics:

- What is Skywarn? What does it mean for us?
- Overview of the National Weather Service in Burlington
- Brief overview of thunderstorm types and spotting
- Fall-time Hazards - Strong Winds and Flash Flooding
- Early Winter Hazards - Flash Freezes and Heavy Wet Snow/Snow Squalls
- How to best measure snow and ice
- Reporting on mPING - Addition of snow squalls

You may contact our SKYWARN™ program leader Robert Haynes at robert.d.haynes@noaa.gov for additional questions or details.
