From: Gabriel Langbauer
 Meteorologist in Charge
 Weather Forecast Office Burlington, VT

Subject: Establishment of minor, moderate and major flood
 stages for the stream gauge at Willsboro, NY on
 the Boquet River (WLBN6)

Effective at 1200 Coordinated Universal Time on July 15, 2024, the National Weather Service will establish minor, moderate and major flood levels above Gauge Zero for the stream gauge at Willsboro, NY on the Boquet River. Those are listed below. Flood stages for this gauge were previously undefined.

Action Stage (Bankfull): 7.5 feet
Minor Flood Stage: 8.0 feet
Moderate Flood Stage: 10.0 feet
Major Flood Stage: 12.0 feet

These new flood stages and accompanying impact statements will be referenced in future Flood Warnings and Flood Statements for the gauge. The changes are part of a recent evaluation of the floodplain and high water impacts with town emergency management officials and members of the Boquet River Association.

The National Weather Service welcomes public feedback. If you have any questions or comments on this change, please contact:
