Severe Thunderstorms Possible Tuesday Afternoon and Evening...

OVERVIEW:
A complex of strong to severe thunderstorms is expected to move through southeast Georgia and southeast South Carolina during the Tuesday afternoon and evening timeframe. The Storm Prediction Center has highlighted the region in an “Enhanced Risk” for severe weather Tuesday while the Weather Prediction Center has highlighted the region in a “Marginal Risk” for excessive rainfall.

TIMING
- Severe Weather: 2 PM to 10 PM Tuesday.

HAZARDS & IMPACTS
- Severe Weather:
  - Damaging Winds: Wind gusts in excess of 60 mph could damage trees and power lines and result in scattered power outages.
  - Tornadoes: A few tornadoes are possible.
  - Hail: Large hail could result in damage to motor vehicles and sensitive vegetation.
  - Heavy Rainfall: Overall rainfall amounts of 1 to 1.5 inches are expected with localized higher amounts possible. This could produce localized flooding of low-lying and poor drainage areas, especially in urban areas, such as Charleston, SC and Savannah, GA.

NWS ALERTS
- None at this time.
