Snowfall Forecast

Lake Effect Snow
Showers will begin to taper off across most of the South Shore later this morning. However, continued snowfall is expected over much of Iron County with higher elevations possibly receiving an additional 7 inches of snow today.
Dangerous Wind Chills in MN & Lake effect SN in WI

Wind Chills will be coldest this morning

At these values, it can take just **30 minutes** or less for frostbite to develop on exposed skin!

Wind Chill Safety Tips

- **Minimize Exposure** – Avoid exposure during the coldest wind chills.
- **Stay Dry** – Wet clothing causes body heat to be lost faster. Wear waterproof insulated boots.
- **Stay Covered** – Wear a hat and gloves! At least half your body heat is lost if your head is not covered.
- **Dress in Layers** – Trapped air between layers helps to insulate.

**Wind Chill** is how the wind and cold feel on exposed skin. Wind and cold combined carry heat away from the body, which can cause frostbite and/or hypothermia.
Winter Driving Safety

- Clear snow and ice from windows and lights
- Brake early. Leave twice the amount of room for stopping.
- Don’t use cruise control in wintry conditions
- Don’t cut in front of other vehicles
- Take it slow! Delay travel if feasible.
