

Western and Central Iowa Tornadoes April 26, 2024

Event Summary

Severe storms lifted northeast across western into central Iowa late in the afternoon into the evening of Friday, April 26, 2024. Based on preliminary reports, at least 10 tornadoes occurred over central Iowa in our warning area of responsibility. Damage to trees and homes has been reported in multiple counties from Crawford to Union and Ringgold up to around Polk and Jasper Counties. At least one injury has also been reported. Storm survey teams will be heading out today, April 27, 2024, to begin the storm survey process. Results from these surveys will be posted later today, but rating all the tornadoes will take a few days.
