...NWS Hastings to Host Virtual Storm Classes in March ...

The National Weather Service (NWS) in Hastings will host seven (7) “virtual” Severe Weather Awareness classes in March this year. The presentations are free and open to anyone with an interest in severe weather or for those who just want to learn more about the NWS and weather in general.

The good news is all seven presentations will cover the same information so participants only need to attend one session. However, **participants must register** for a session prior to attending. People can register at: <https://tinyurl.com/kge996nj>

At the link above, registrants will be asked to pick one session from the following dates: March 1, 3, 9, 11, 22, 23 or 24. Each presentation will begin at 7:00 PM CST/CDT. Once registered, a confirmation email will be sent to the registrant, as well as emails one day and one hour before their scheduled class. Those who attend can expect each class to last 60 to 70 minutes and include time for questions and conversation.

At this time, no in-person Severe Weather Awareness classes are planned. An additional virtual class or two may be scheduled if the need arises.
