

## **NW Flow Snow Conf Call Minutes for May 29, 2013**

Participants from ASU, UNC-A, WFOs GSP, MRX, LWX, RLX and RNK

### **Group involvement in doing review of NW Flow aspect of Sandy for NWA Annual Mtg in October:**

The entire call was devoted to coordinating where we are and what still needs to be done in preparing for the four NWA presentations we are working on. We now have either an outline, draft abstract, or list of potential topics under each of the four presentation documents on Google Drive. We do need to coordinate with each other either through email, verbally, or by reviewing all the presentations to make sure these not only tie together, but also that we are not overlapping too much. Some presentations can give a hint at what's coming in the next. Each should have near the start the map showing the domain we are focusing on.

We set June 17 (end of the day) as our next deadline for having "final" drafts of abstracts done in these documents, which gives one week before they are needed at ERH SSD for review to make any late edits. We will also have a call that week for final coordination. Presentation #3 draft abstract actually has to go to SRH SSD within the next week, but it can be a rough draft, and that may already be far enough along for that. So the next couple of weeks are critical for deciding what will be covered in the presentations to a level needed for the abstracts, and any comments on the draft outlines and abstracts that are currently there from anyone in the group are welcome in this period!

We decided that authors for each abstract will default to those names that are listed as the lead authors in the current presentation documents (vs. the entire group), however other names can be added (will leave that up to each primary lead author) if others provide some significant input.

### **Next call:**

June 19 or 20<sup>th</sup>. Will do a quick email survey.
