

County Impacts Associated with Nolo (2026)

Narratives listed in alphabetical order by counties.

Updates:

- 10/16/2026 - Initial issuance.

County Name	Injuries:	Fatalities:	Evacuations:
Hawaii	Unknown	Unknown	0
Hurricane Nolo approached the Big Island from the south and brought windy conditions across Hawaii County, leading to around 4,000 customers losing power. Nolo's outer rainbands led to localized flooding and road closures, mostly across the southeast slopes. Floodwaters led to the closure of the Māmalahoa Highway between Nā'ālehu and Pāhala, and a landslide led to closures in Wai'ohinu. Kamaoa Road in Wai'ohinu and Ka'alaiki Road in Nā'ālehu were also closed due to flooding. At least 19 people stranded by flooding were taken to a shelter in Nā'ālehu. The southeast shores of the Big Island were battered by high surf generated by Hurricane Nolo, which likely contributed to the collapse of Hōlei Sea Arch in Hawai'i Volcanoes National Park. On the north side of the island, strong winds led to the closure of Kohala Mountain Road, and in 'O'okala, a landslide and downed tree caused a road closure.			

County Name	Injuries:	Fatalities:	Evacuations:
Honolulu	Unknown	Unknown	0
As Hurricane Nolo passed to the south of the islands on September 25 through 27, gusty winds led to sporadic reports of roof damage and downed trees on Oahu. Around 3,900 customers lost power on Windward Oahu, mainly in Kahuku and Hau'ula.

Kauai	Unknown	Unknown	0
On September 30, as Hurricane Nolo was nearly stationary west of the Hawaiian Islands, flooding along the Hanalei River caused a closure of the Kūhiō Highway at Hanalei Bridge. This, in turn, closed Hanalei Elementary School for the day as safe access was not possible.			

County Name	Injuries:	Fatalities:	Evacuations:
Maui	Unknown	Unknown	Unknown
As Hurricane Nolo passed to the south of the Hawaiian Islands, strong and gusty winds were observed over Maui County, with many sites reporting winds in excess of 60 mph. These powerful winds helped fuel a brushfire in Olowalu which burned over 100 acres and closed Honoapi'ilani Highway on September 26. Mandatory evacuations were issued for Olowalu as a result of the fire. Additionally, the strong winds led to
