Event Summary

Tropical Storm Edouard brought a swath of 4-9" of rainfall from the Upper Texas Coast through the Piney Woods region with locally higher amounts. Rainfall estimated rainfall showed rain totals near 20" in southeastern Polk County and eastern Liberty County, but there were no rain gauges in the area to confirm those totals. The heavy rainfall caused flooded roadways in portions of Polk and Liberty counties. While there were no impacts of strong winds near the coast, there was a 55 MPH wind gust near Lake Livingston as the center of Tropical Depression Edouard moved overhead.

NOTE: It is unlikely that the point-based observations provided in this report sampled the peak values for the event.
