## Storm Data and Unusual Weather Phenomena - April 2009

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

Heavy rainfall persisted across the county as several thunderstorms produced rainfall totals of 8 to 10 inches across the county. Numerous roads were closed in areas of the county, including Jersey Village, Houston Heights, La Porte, Pasadena, Webster, and near the Houston Hobby airport. More than 350 homes were flooded due to the heavy rains and flooding along bayous. In some areas residential streets were reported to have more than one foot of standing water. The highest one hour rainfall total was 6.90 inches recorded at Bay Area Blvd and Clear Creek. This exceeds the highest one hour rainfall rate measured during Tropical Storm Allison in June 2001, which was 6.30 inches.

In the northern part of the county five children were killed after the car they were riding in inadvertently drove into a drainage ditch that was filled with nine feet of water from the heavy rainfall. Two adults and one child were able to escape the floodwaters, but the five younger children, all under 7 years old, were not able to escape.

**Thunderstorms developed west of the Houston metro area in the mid afternoon hours of the 27th and moved east across the Houston area around sunset. Severe thunderstorms redeveloped overnight across western Harris County and produced flash flooding that severely impacted roads and highways in and around Houston. Later that afternoon a lone cell developed between Hearne and College Station and produced several brief tornado touchdowns as it moved southeastward into Madison County.**
