<p>An approaching broad upper low east of the Four Corners region placed eastern Texas in a favorable upper air pattern conducive to sustaining either a mesoscale storm complex or an organized linear storm system. Daytime heating, within a highly moist environment and a passing shortwave disturbance, allowed a south central Texas originating derecho to pass through within the southwest flow and cause severe weather damage across the Houston, Texas area.</p>

Thunderstorm winds downed a tree off of Highway 190 to the east of Livingston.				
An upper level low entering the southern Plains, with the southern branch of the jet stream riding into eastern Texas, placed the area under a very favorable upper level pattern for the formation and sustainability of strong to severe afternoon into evening thunderstorms. A southwestern shortwave disturbance passage during the afternoon initiated a third successive day of regional severe weather. Western storms tracking into southeastern Texas's moist and unstable air mass remained alive and strengthened to severe limits as the convective activity tracked south and east.

Strong damaging winds and wind gusts were observed across a large part of Grimes County in association with a large line of severe thunderstorms. The National Weather Service accompanied by the Grimes County emergency manager conducted a storm survey and found several areas with trees uprooted or snapped. In each case, trees were pushed down to the east or northeast and generally in the same direction as nearby damage. All observed damage was consistent with straight line downburst winds. A parked tractor trailer was blown over between Navasota and Anderson along Highway 90. A hay barn was destroyed near the intersection of CR 211 and CR 215, about 3 miles ESE of Anderson, with debris blown toward the east. There were also trees down in Roans Prairie and Richards, again pointing eastward. Some of the more significant damage occurred near the town of Shiro where several large trees were uprooted, some of which fell onto mobile homes. No injuries were reported. Other damage was observed in Navasota where trees and power lines were downed and doors were blown off at a fire station. In the Roans Prairie area, there was sign damage at a gas station, and trees were also downed.
