Although a drier southwest flow became prevalent over Central California on August 5th, there was still enough moisture over the region for thunderstorms to develop over the higher elevations of the Southern Sierra Nevada. One thunderstorm produced flash flooding near Tuolumne Meadows on SR 120.

The South Fork Fire fire began on August 13, 2017, 1 mile east of Wawona along the south fork of the Merced river in Yosemite National Park. The fire closed several trails in the southern part of Yosemite. Thunderstorms downdrafts caused the fire to spread west and threaten the community of Wawona, which was evacuated for 6 days from August 19th to the 24th. Firefighters were able to contain the fire on the south and west side of the fire by August 26th, but the fire was being allowed to burn to the east. Containment was 44 percent by the end of August. Thereafter, the fire was being managed as it moved into rockier terrain in the wilderness of Yosemite. The fire will likely continue into October.

Park Service video showed flash flooding in Yosemite Valley from heavy rainfall.

A persistent low pressure system off the Southern California Coast produced enough instability for thunderstorms to develop over the Southern Sierra Nevada each afternoon between August 17 and August 23. On the afternoon of the 18th, some slow moving thunderstorms produced heavy rainfall over Yosemite National Park which resulted in flash flooding in Yosemite Valley.

08/31/17 20:00 PST	0					

A persistent large upper ridge centered over the Great Basin provided the area with an extended period of much warmer than normal temperatures between August 26 and September 3. High temperatures ranged mainly from 106 to 112 degrees at many locations each day between August 26 and September 3 across the San Joaquin Valley, the southern Sierra foothills and the Kern County Deserts while morning lows ranged from the mid 70's to the lower 80's.

The human caused Pier Fire began in the early morning hours of August 29, 2017 when a stolen car was set on fire and pushed off a cliff along Highway 190, 7 miles east of Springville, CA. The fire burned 36,556 acres before being contained on September 24, 2017. There were mandatory evacuations for the small communities of Camp Nelson, Pierpoint Springs, Cedar Slope, Sequoia Crest, Rogers Camp, Doyle Springs, Mountain Aire and Wishon for several weeks. Much of Highway 190 between Springville and Ponderosa was closed to traffic. There were 2 structures lost. Cost of containment was \$38.76 million.

The Railroad Fire started on the afternoon of August 29, 2017, west of Highway 41, 8.75 miles north of Oakhurst, just south of Yosemite National Park near the community of Sugar Pine. The fire spread rapidly in dry brush. Highway 41 between Oakhurst and the south entrance of Yosemite National Park was closed in both directions for about a week with several small communities evacuated, including

Tenaya Lodge that serves visitors to Yosemite. The fire burned 12,407 acres before being contained on September 15, 2017. Cost of containment was \$20.8 million. There were 17 structures destroyed, including a historic locomotive that wasn't being used, as well as a passenger car, snowplow, side dump car and refrigerator car that were attached to it that were part of the Yosemite Mountain Sugar Pine Railroad. More than 200 wooden railroad ties also burned. The fire also burned into the Nelder Grove of Giant Sequoia trees.
