Typically results in significant disruption in daily life or long-lived disruption to daily life.

Issued: 12-23-2023 05:24 AM
Seasonably warmer conditions are still expected for the upcoming holiday weekend, before slightly cooler temperatures return after Christmas.

Low chances for light rain (20-30%) are also possible today, before rain chances increase during the evening hours Christmas Eve (90-100%) & continue thru Christmas Day. Rainfall will then begin to taper off late Monday night into Tuesday.

Breezy conditions are also expected late Christmas Eve thru Christmas Day, with sustained winds around 20-25 MPH & gusts near 30-35 MPH. A Wind Advisory may be required Sunday night & Monday.
