

National Weather Service Wilmington, NC

Outlook Period: **Saturday, June 23 – Sunday, June 24**
Time Issued: **1030 AM Friday, June 22**

Prepared by: **Josh Weiss, Meteorologist**

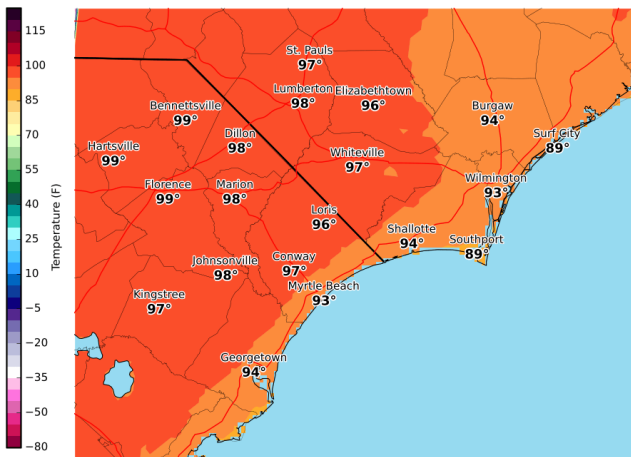

Heat and Humidity to persist through the weekend

Overview: Mid-level ridge and offshore Bermuda High Pressure will remain entrenched through the weekend. This will bring continued very hot temperatures and high humidity, along with isolated afternoon thunderstorms.

Impacts: Heat index values will rise above 100 both Saturday and Sunday. A heat advisory (heat index 105 or greater) may be needed Sunday.

Timing/Confidence: There is moderate confidence in a heat advisory for Sunday. The highest heat index values are likely to occur just inland from the coast, but the entire area may see heat indices exceed 105.
