

National Weather Service Wilmington, NC

Outlook Period: Friday July 3 – Sunday July 5
Time Issued: Friday, July 3, 2020 at 11 AM EDT

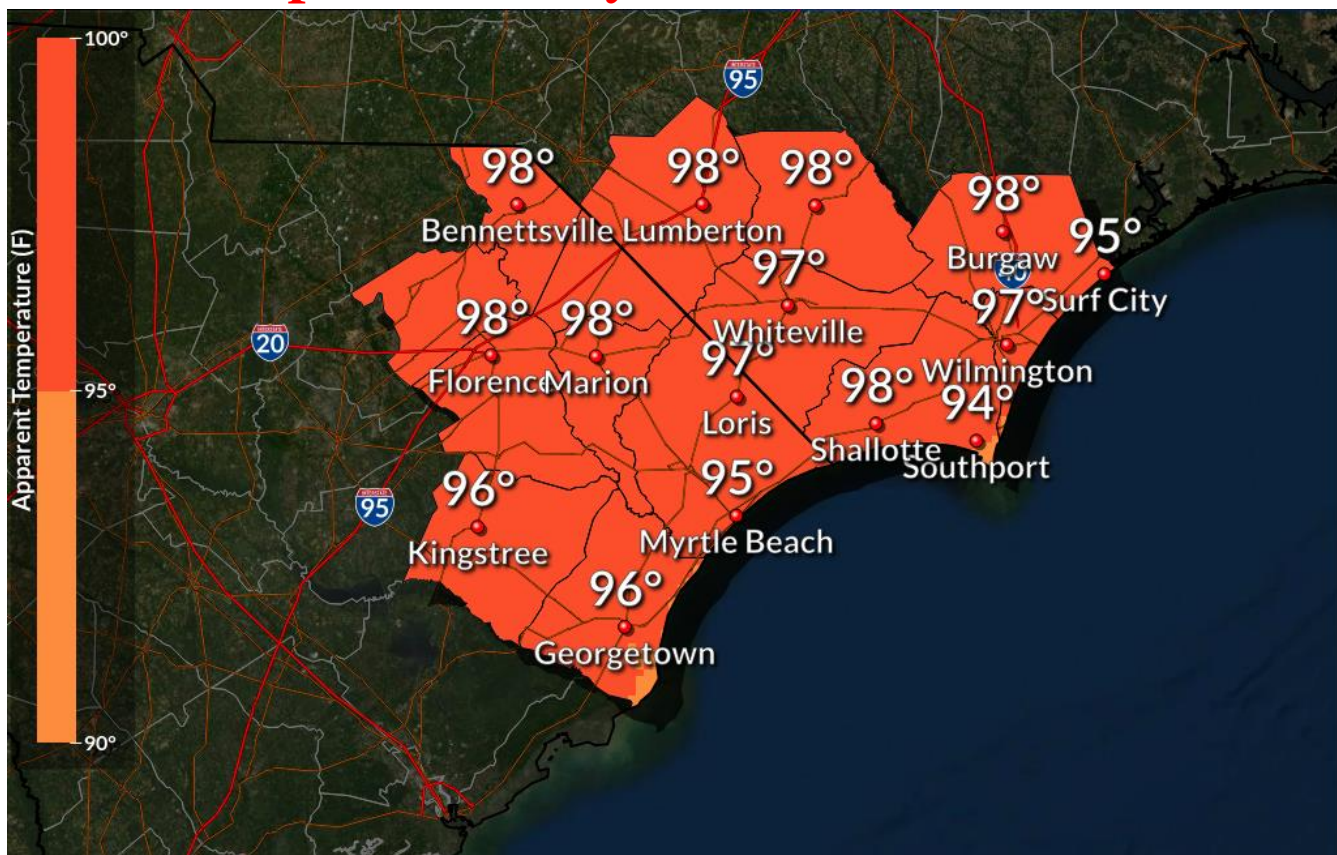

Prepared by: Ian Boatman
Forecaster #: 910-762-4289

Nice Independence Day Weekend Ahead!

Overview: High pressure builds in today, allowing for pleasant, warm weather for the holiday weekend. Friday/Saturday high temperatures should be in the mid-90s inland, with upper 80s near the coast. Weak frontal system pushes in from the north on Sunday, creating a chance of scattered showers/storms in the afternoon, with high temperatures near 90°F.

Impacts: With a full moon expected Sunday, tidal changes will be more pronounced than usual. Therefore, minor coastal flooding is possible at Battleship NC and area beaches. Finally, a moderate risk of rip currents is forecast for coastal Pender and New Hanover Counties through Sunday.
