Memorial Weekend Briefing

➢ Hot weather will continue today into the weekend with a cool down behind a cold front for Sunday.
➢ Gusty southwest winds will continue ahead of a cold front into Saturday.
➢ Enhanced rip current risk today diminishing by end of the weekend.
➢ Strong north to south longshore current today and Saturday, except along the Brunswick county coast.
➢ An increasing chance of showers and thunderstorms through Saturday, but not enough to break the drought conditions.
➢ Coastal Flooding will continue during high tides along the Cape Fear River in downtown Wilmington.
➢ Small Craft Advisory with elevated winds and seas.

weather.gov/ilm
Significant Rip Risk

Elevated to significant rip risk at the area beaches today. Rip risk will remain elevated on Saturday, but will diminish into early next week.
