

Routine Weather Briefing

Outlook Period: Monday 3/11/24 - Friday 3/15/24

OVERVIEW

High pressure will bring cool, dry, and breezy weather today with a warming trend through midweek as the high shifts offshore. Rain chances will then return late Friday as a cold front approaches the area, with unsettled weather lasting through the weekend as the front lingers over or near the area.

LAND:

None.

MARINE:

A <u>Small Craft Advisory</u> is in effect until 2 PM Monday for the southeast NC coastal waters (3/11).

RIVER and COASTAL FLOODING:

 Minor coastal flooding is forecast for the <u>Cape Fear River at Downtown</u> <u>Wilmington</u> during the late evening high tide cycles through Tuesday night.

3/11 3/12 3/13 3/14

- River Flood Warnings continue for...
 - Lumber River at Lumberton (minor)
 - Pee Dee River at Pee Dee (minor)
