

Weather Bureau/National Weather Service History in Vermont

Location	Types	Years	Details
Burlington	SigSvc WBO WB/UA WSO WFO	1871-1883, 1906-present	The Signal Service began observations in Burlington May 24, 1871. These were taken through September 1893 at various locations, before a lack of funding caused the office to close. Observations continued privately through March 1906, when the Weather Bureau opened an office on the University of Vermont campus. The Weather Bureau relocated to the airport June 4, 1943, and began taking aviation observations. Upper air observations were taken 4 times a day in Burlington, from November 1919 through 1965. New facilities were constructed in 1995, and the staffing was increased, to handle additional forecast duties.
Northfield	WBO	1893-1943	This Weather Bureau office served the Montpelier area.
