Heavy Rainfall Threat through Tonight

June 18, 2025
5:44 AM

Potential for flash flooding in areas receiving repeated rounds of storms

WHAT

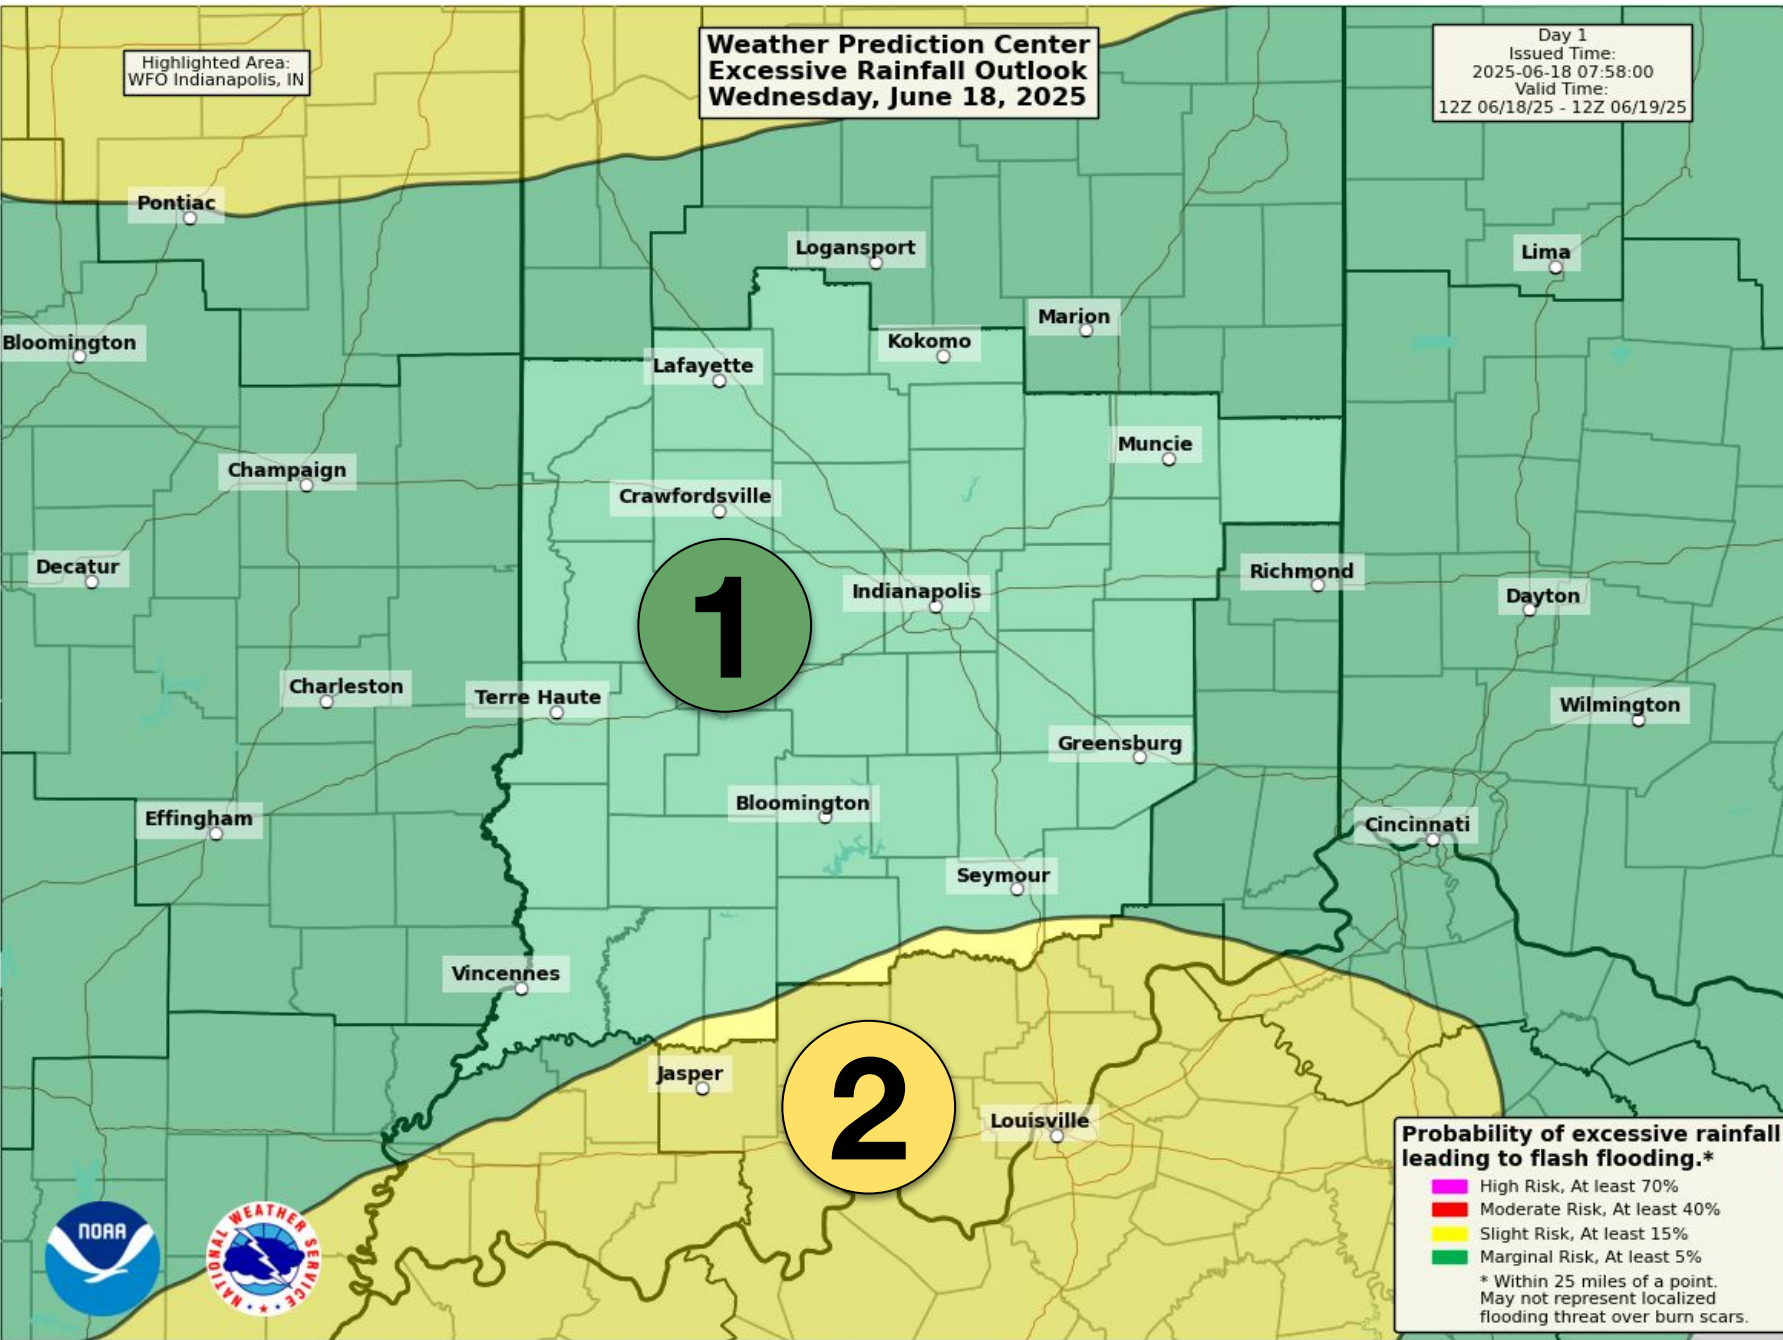

Thunderstorms capable of producing heavy rainfall and localized flooding. Damp soil from recent heavy rain could also allow for flash flooding to quickly develop.

WHERE

All of Central Indiana

WHEN

- Thunderstorms are expected today and tonight, with coverage and intensity highest during the afternoon into the evening hours

ENHANCED RISK

Numerous severe storms possible.

Some longer lived severe storms -- a few intense storms possible.

Have multiple ways to get NWS warnings and seek shelter immediately when warnings are issued for your location.
