

National Weather Service Indianapolis
Central Indiana Weather History
June

01. 1987: At Otterbein, baseball sized hail falls.
02. 1980: From Waynetown to near Crawfordsville, a tornado kills a woman south of Crawfordsville and injures 16 others.
02. 1990: The largest tornado outbreak in state history occurs. Thirty-seven tornadoes touch down, leaving 8 dead.
03. 2008: Near Moscow, an EF-3 tornado moves across portions of Rush county, damaging homes and destroying a covered bridge.
04. 1993: At Pairieton, winds pick up a small airplane and deposit it in a tree.
05. 2005: At Frankfort, thunderstorm winds estimated near 90 mph damage homes and a business.
06. 2008: At Tipton, severe thunderstorm winds cause \$850,000 damage, including knocking down a radio tower.
06. 2011: At Yeoman, just after midnight, an EF-1 tornado touches down and causes \$400,000 damage.
07. 1948: Near Anderson, a hailstorm drops hail 2 inches in diameter, and the hail piles up to one foot deep in spots.
07. 1980: At Windfall, a tornado kills one man and injures five other people.
08. 2008: Thunderstorms dump up to 11 inches of rain across southern portions of central Indiana, causing extensive flooding.
09. 2008: At Clinton, Feather Creek floods and forces residents from their homes.
10. 1974: A cold air funnel becomes a brief tornado near Carmel, causing minor damage.
11. 1883: At Butlerville in Jennings County, a tornado strikes a moving freight train, picking up seven cars filled with sugar, and throwing them into the woods some distance away.
12. 2005: The remnants of Tropical Storm Arlene spawn an F1 tornado near Hayden in Jennings County.
13. 2008: At Brownsburg, lightning strikes a construction crane, injuring its operator.
14. 1880: Five strong tornadoes strike central Indiana, killing at least 18 people. Cattle are said to be killed in droves and orchards ruined. The German Lutheran Church in Cicero is blown down and its bell carried fifty feet away.

15. 1987: A tornado touches down northwest of Danville, hitting a pig farm and lifting several pigs in the air.
16. 1984: Severe thunderstorm winds cause structural damage to several buildings in Greensburg.
17. 1992: On the night of the 17th – 18th, a fast moving squall line moves across the state causing widespread wind damage. Some storms also bring large hail and flash flooding.
18. 1978: Wind gusts around 80 mph blow out windows in downtown Terre Haute.
19. 1980: At Beanblossom, severe thunderstorm winds overturn camper vehicles at a campground.
20. 1942: From Moran to Kokomo, a tornado kills 4 people and injures 150 more. The greatest damage is in the Kokomo area.
20. 1990: At Decatur, lightning strikes a house with such force that it blows a plastic switch plate off a light switch and embeds it in the opposite wall.
21. 1995: Golf ball size hail falls in Greenfield.
22. 1992: Low temperatures in the 30s in the north and central parts of the state cause a damaging frost. Indianapolis' low temperature of 37 degrees is the lowest ever recorded in the city during the summer months.
23. 1995: At Mooresville, a man is struck by lightning while baling hay.
24. 1981: At Lafayette, a tornado damages several homes and an apartment complex.
24. 2014: At Six Points in Hendricks County, an EF-1 tornado causes 1 million dollars in damage.
25. 1978: At Indianapolis, thunderstorms produce 100 mph winds.
26. 1973: A tornado severely damages a trailer court in Daleville. The same tornado damages homes in Yorktown and Muncie.
27. 1993: Several inches of hail cover the ground in Parke County with drifts of 1 to 2 feet. A 4-wheel drive county highway truck has to be pulled out of a drift. The next morning hail still covers the ground in the Guion area.
28. 1874: At Indianapolis, 85 degrees is the warmest low temperature on record for the city.
28. 1902: In central Indiana ten people are killed by two tornadoes. One of the fatalities is a man who was attending a funeral service at a home in the town of Cleveland. Five glass factories are wrecked in Hancock County.
29. 1929: At Indianapolis, the highest wind gust in city history is measured at 111 mph.

30. 1877: Waverly, Franklin and St. Paul, a tornado strikes, killing 10. The tornado picks up a school near Waverly and moves it 50 yards down a hill, and carries another school across a field scattering its furniture for half a mile.
