Selon la base de données historique sur les tsunamis, au cours des 500 dernières années, au moins 75 tsunamis ont été observés dans la région. Les tsunamis se produisent bien que moins fréquemment que dans les autres bassins océaniques, la vulnérabilité est très grande; plus de 500,000 personnes pourraient être tuées en quelques heures si la réponse n'est pas adéquate.

CARIBE WAVE 17

Objectifs

- 1. Exercer et évaluer les opérations de l'actuel Système d'alerte aux tsunamis de la région CARIBE-EWS.**
 - A. Validez l'émission des produits de tsunami de la PTWC.**
 - B. Valider la réception et la diffusion des produits de tsunami par les points focaux d'alerte aux tsunamis du CARIBE EWS (TWFP) et/ou le Centre Nationale d'alerte aux Tsunamis (NTWC).**
- 2. Évaluer l'usage des produits PTWC CARIBE EWS.**
- 3. Valider la préparation pour répondre à un tsunami.**
 - A. Valider la capacité opérationnelle des points focaux d'alerte aux tsunamis (TWFP, ou fonction similaire) et/ou le Bureau national de gestion des catastrophes (NDMO).**
 - B. Améliorer l'état de préparation opérationnelle. Avant l'exercice, faire en sorte que les outils appropriés et le(s) plan(s) de réponse ont été développé(s), y compris les matériaux d'éducation du public**
 - C. Valider que la diffusion des alertes et des informations / conseils à travers les points focaux d'alerte aux tsunamis pour les organismes appropriés dans les pays participants et pour le public soit exacte et en temps opportun.**
 - D. Valider le processus décisionnel de l'organisation (plans d'intervention de tsunami) sur les avertissements publics et les évacuations.**
 - E. Valider que les méthodes utilisées pour informer et instruire le public soient exactes et en temps opportun.**

Appendix F. TWC Exercise Messages
Costa Rica Earthquake Scenario

The following messages created for the CARIBE WAVE 17 tsunami exercise are representative of the official standard products issued by the PTWC during a large magnitude 7.93 earthquake and tsunami originating in Costa Rica. During a real event, NTWC and TWFP would be sent via email the graphical products. The alerts would persist longer during a real event than is depicted in this exercise.

Appendix F. TWC Exercise Messages

Cuba Earthquake Scenario

The following messages created for the CARIBE WAVE 17 tsunami exercise are representative of the official standard products issued by the PTWC during a large magnitude 8.24 earthquake and tsunami originating in southeastern coast of Cuba. During a real event, the TWCs would also issue graphical and html-based products to their web sites and via RSS. The alerts would persist longer during a real event than is depicted in this exercise.

* IMPACTS CAN VARY SIGNIFICANTLY FROM ONE SECTION OF COAST TO THE NEXT DUE TO LOCAL BATHYMETRY AND THE SHAPE AND ELEVATION OF THE SHORELINE.

* IMPACTS CAN ALSO VARY DEPENDING UPON THE STATE OF THE TIDE AT THE TIME OF THE MAXIMUM TSUNAMI WAVES.

* PERSONS CAUGHT IN THE WATER OF A TSUNAMI MAY DROWN... BE CRUSHED BY DEBRIS IN THE WATER... OR BE SWEEPED OUT TO SEA.

NEXT UPDATE AND ADDITIONAL INFORMATION

* THE NEXT MESSAGE WILL BE ISSUED IN ONE HOUR... OR SOONER IF THE SITUATION WARRANTS.

* AUTHORITATIVE INFORMATION ABOUT THE EARTHQUAKE FROM THE U.S. GEOLOGICAL SURVEY CAN BE FOUND ON THE INTERNET AT EARTHQUAKE.USGS.GOV/EARTHQUAKES -ALL IN LOWERCASE LETTERS-.

POTENTIAL IMPACTS

- * A TSUNAMI IS A SERIES OF WAVES. THE TIME BETWEEN WAVE CRESTS CAN VARY FROM 5 MINUTES TO AN HOUR. THE HAZARD MAY PERSIST FOR MANY HOURS OR LONGER AFTER THE INITIAL WAVE.
- * IMPACTS CAN VARY SIGNIFICANTLY FROM ONE SECTION OF COAST TO THE NEXT DUE TO LOCAL BATHYMETRY AND THE SHAPE AND ELEVATION OF THE SHORELINE.
- * IMPACTS CAN ALSO VARY DEPENDING UPON THE STATE OF THE TIDE AT THE TIME OF THE MAXIMUM TSUNAMI WAVES.
- * PERSONS CAUGHT IN THE WATER OF A TSUNAMI MAY DROWN... BE CRUSHED BY DEBRIS IN THE WATER... OR BE SWEEPED OUT TO SEA.

NEXT UPDATE AND ADDITIONAL INFORMATION

- * THE NEXT MESSAGE WILL BE ISSUED IN ONE HOUR... OR SOONER IF THE SITUATION WARRANTS.
- * AUTHORITATIVE INFORMATION ABOUT THE EARTHQUAKE FROM THE U.S. GEOLOGICAL SURVEY CAN BE FOUND ON THE INTERNET AT EARTHQUAKE.USGS.GOV/EARTHQUAKES -ALL IN LOWERCASE LETTERS-.

Population Exposure

Structures:
Overall, the population in this region resides in structures that are vulnerable to earthquake shaking, though some resistant structures exist. The predominant vulnerable building types are reinforced concrete and informal (metal, timber, GI etc.) construction.

Historical Earthquakes (with MMI levels):

Date (UTC)	Dist. (km)	Mag.	Max Shaking MMI(#)	Deaths
1985-03-16	186	6.4	VII(6k)	0
1974-10-08	143	7.5	VIII(40k)	0
2004-11-21	179	6.3	VII(3k)	1

Recent earthquakes in this area have caused secondary hazards such as tsunamis that might have contributed to losses.

Appendix F. TWC Exercise Messages

Northeastern Antilles Earthquake Scenario

The following messages created for the CARIBE WAVE 17 tsunami exercise are representative of the official standard products issued by the PTWC during a large magnitude 8.5 earthquake and tsunami originating in the Northeastern Antilles. During a real event, the TWCs would also issue graphical and html-based products to their web sites and via RSS. The alerts would persist longer during a real event than is depicted in this exercise.

Surveillance de Niveau de la Mer

Comme bonne pratique, durant l'exercice, il est recommandé aux autorités correspondant pour vérifier les lectures du niveau de la mer en temps réel en au niveau central de la mer de la IOC et l'outil de marée "Tide Tool" que vous pouvez également être exécuté avec les paramètres du séisme.

CARIBE WAVE 2017

[ENGLISH](#) | [ESPAÑOL](#)

Qu'est ce que Caribe Wave?

Caribe Wave est un exercice annuel du Système d'alerte aux tsunamis et autres risques côtiers de la Caraïbe et des régions adjacentes (CARIBE EWS) mis en place sous l'égide de l'UNESCO. L'objectif principal est que les pays et territoires, les agences de gestion des urgences et les communautés à risque puissent tester, valider et actualiser leurs plans de réponse au tsunami.

Quand aura lieu l'exercice Caribe Wave 2017?

L'exercice d'alerte au tsunami CARIBE WAVE 2017, se tiendra le 21 Mars 2017. [Inscrivez-vous dès aujourd'hui pour participer à cet exercice.](#)

Quels scénarios seront utilisés pour Caribe Wave 2017?

Lors de l'exercice CARIBE WAVE 2017 trois scénarios distincts seront simulés. Chaque pays choisira le scénario le mieux adapté à ses objectifs. Le premier scénario simule un séisme de magnitude 7.9 généré sur la côte Caraïbe du Costa Rica. Le deuxième scénario est un séisme de magnitude 8.2 au large de la côte sud-est de Cuba. Le troisième scénario est un séisme de magnitude 8.5 à l'Est-Nord-Est des petites Antilles.

Quels systèmes de communication seront testés lors de cet exercice?

Le message initial sera émis à 1400 UTC par le Centre d'alerte aux tsunamis du Pacifique (PTWC) par tous les canaux de transmission habituels. Ce message initial permettra de tester les systèmes de communication réservés aux événements réels et de commencer l'exercice. Ensuite, pour chacun des scénarios, le PTWC émettra des messages simulés vers les Points Focaux d'alerte aux tsunamis (TWFP) et les centres nationaux d'alerte aux tsunamis déclarés auprès de l'UNESCO. Chaque pays a la responsabilité de la diffusion des messages d'alerte aux services et à la population sur son territoire.

Quelles pays/territoires participent à l'exercice Caribe Wave 17?

Chacun des 48 pays et territoires membres du CARIBE EWS doit décider de son niveau de participation à l'exercice et assurer localement la coordination des activités qu'il souhaite réaliser en fonction des objectifs qu'il aura fixé.

Pourquoi devrais-je participer à cet exercice?

La vulnérabilité des côtes de la Caraïbes et de ces régions adjacentes au risque de tsunami et les pertes potentielles de vies humaines qui pourraient en résulter doit tous nous motiver à participer à cet exercice pour mieux préparer nos communautés et pays à y faire face.

Le guide d'exercice, les supports d'information sur le risque tsunami et de communication sur l'exercice ainsi que le lien pour l'enregistrement à l'exercice et son évaluation sont disponibles sur le site caribewave.info.

INSCRIVEZ-VOUS DÈS AUJOURD'HUI POUR PARTICIPER À CARIBE WAVE 2017!
