Coastal Hazards Increase Through Midweek... and Again this Weekend
- High Risk of Rip Currents & Building, Rough Surf
- Minor Tidal Flooding along the Coast, Intercoastal Waterways & St. Johns River Basin

Small Craft Advisory Conditions
- Extended period of breezy onshore winds→ building seas
- Small Craft Advisory conditions expected through much of this week

Isolated Thunderstorms Possible on Tuesday
King tides and strengthening onshore flow will lead to elevated water levels during high tide.

Affected Locations:
- Atlantic Coast
- Intracoastal Waterways
- St. Johns River basin

Impacts:
- Possible widespread minor flooding
- Trapped tides on St. Johns River later this week
