Weather Impact Overview
Southeast Georgia & Northeast Florida

Scattered Afternoon & Evening T’Storms on Wednesday

Heat Index Values Approach 105 Degrees on Wed and Thurs

Widespread Afternoon & Evening T’Storms from Thursday through the Weekend, Decreasing Chances Early Next Week.

Moderate Rip Current Risk Continues at the Northeast FL Beaches
Low pressure may gradually organize along the northern Gulf coast late this week and into the upcoming weekend.

This potential disturbance is not expected to be a direct threat to our region.

**Maintain Tropical Readiness**
- Stock Supply Kits
- Review Home & Flood Insurance Policies
- Review Family Emergency Plan
