

Post-Tropical Cyclone Milton Briefing

5:30 PM ET

Thursday, Oct 10, 2024

...for the Florida Keys of Monroe County

Situation Overview

Post-Tropical Cyclone Milton

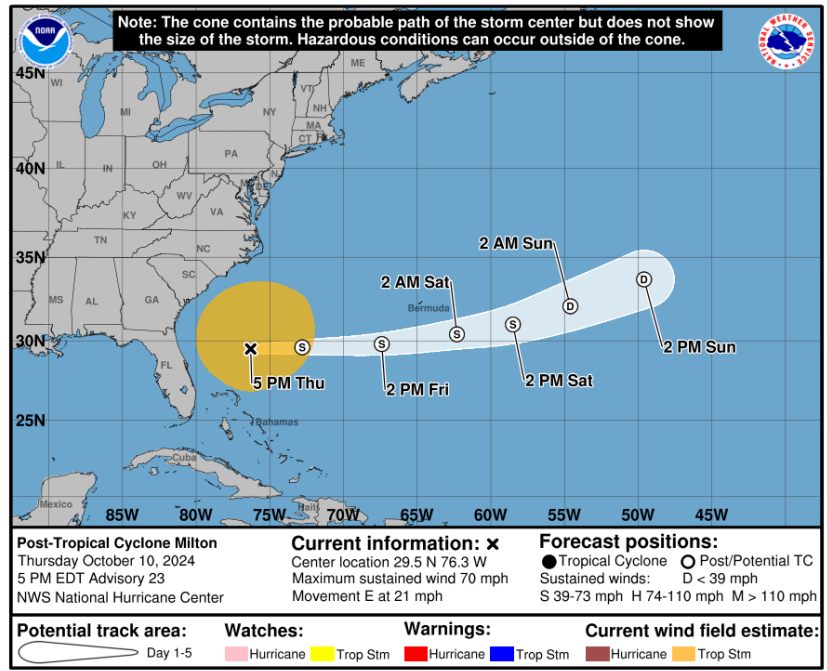

- Milton has become a post-tropical cyclone with hurricane-force winds as it continues to move east and further away from the Florida Keys and the Florida peninsula.
- **A Coastal Flood Warning** remains in effect for the Upper Keys through this evening.
- **A Small Craft Advisory** will continue in effect for the Straits of Florida offshore the Upper Florida Keys until seas subside late Friday night or early Saturday.
- Saltwater flooding of 1 to 2 feet above ground level, or mean higher high water is continuing in the Bayside communities of the Upper Keys, and will persist into this evening.
- Water levels are expected to very slowly decrease tonight through at least Friday, returning closer to normal water levels.

This is the final Weather Brief concerning Milton for the Florida Keys of Monroe County.

Situation Overview

Post-Tropical Cyclone Milton

NOTE: Do not focus on the exact track.
 Impacts can occur well outside the area enclosed by the cone.

Post-Tropical Cyclone Milton is expected continue moving toward the east with an increase in forward speed during the next several days. On the forecast track, the center of the post-tropical cyclone will pass to the south of Bermuda late Friday.

Maximum sustained winds have decreased to near 70 mph with higher gusts, and additional weakening is forecast over the next several days.

Remember - the forecast track error cone only represents the 2/3 chance that the center of the potential tropical cyclone will track, and NOT the area of weather impacts.
