

# Severe Potential Later Thursday

May 13, 2025  
4:20 PM

Gusty Winds, Hail, Heavy Downpours, and Frequent Lightning Possible

## Key Messages

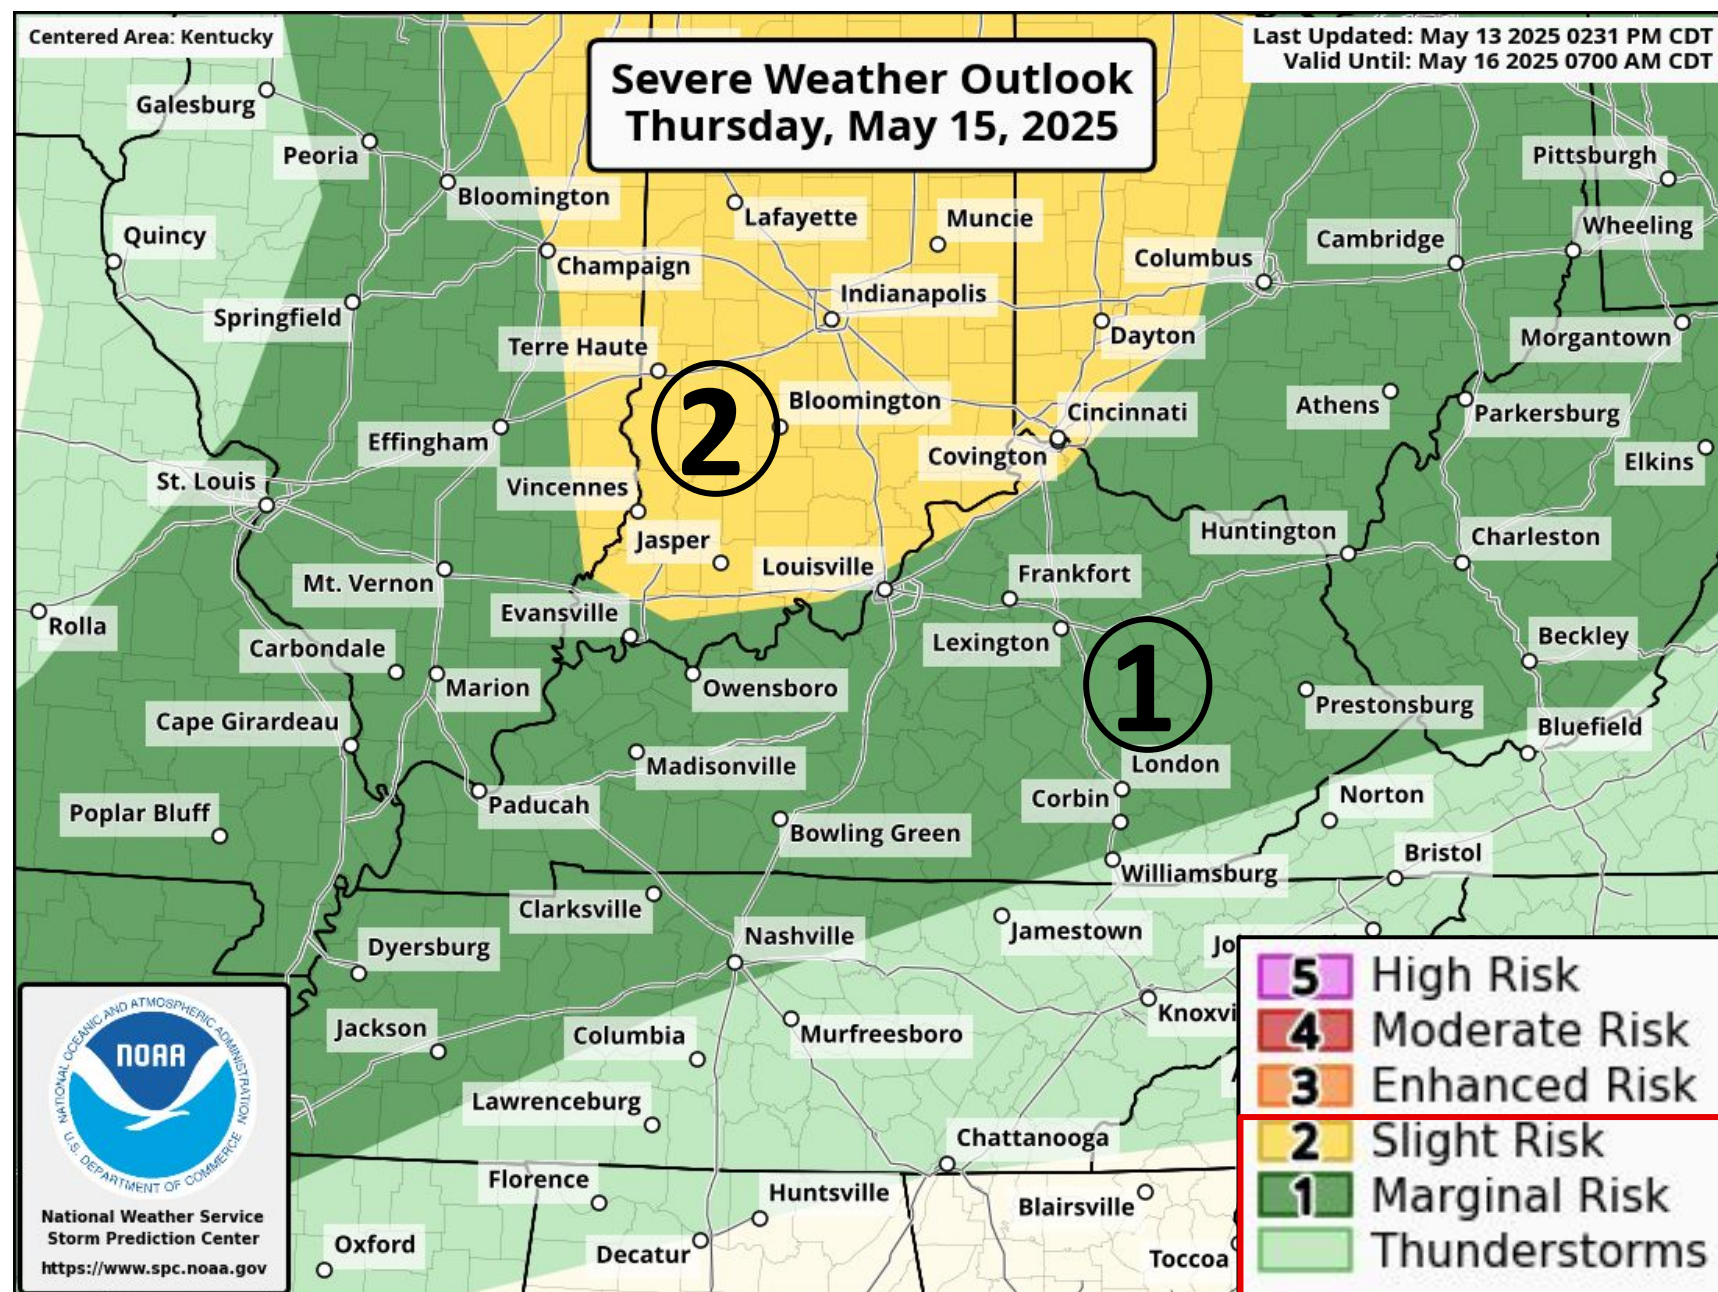

- Most of Thursday will be warm and dry
  - ◆ Likely the warmest day of the year to date so far
- Will watch for storm development upstream, moving into our area
  - ◆ Should storms develop, they likely will push into central/southern Indiana late evening, and potentially into central Kentucky overnight
- Main threats: damaging winds, large hail, heavy rains, and frequent lightning

# Another Wave of Severe Storms Friday?

May 13, 2025  
4:20 PM

Multiple Hazards Possible with these storms

## Key Messages

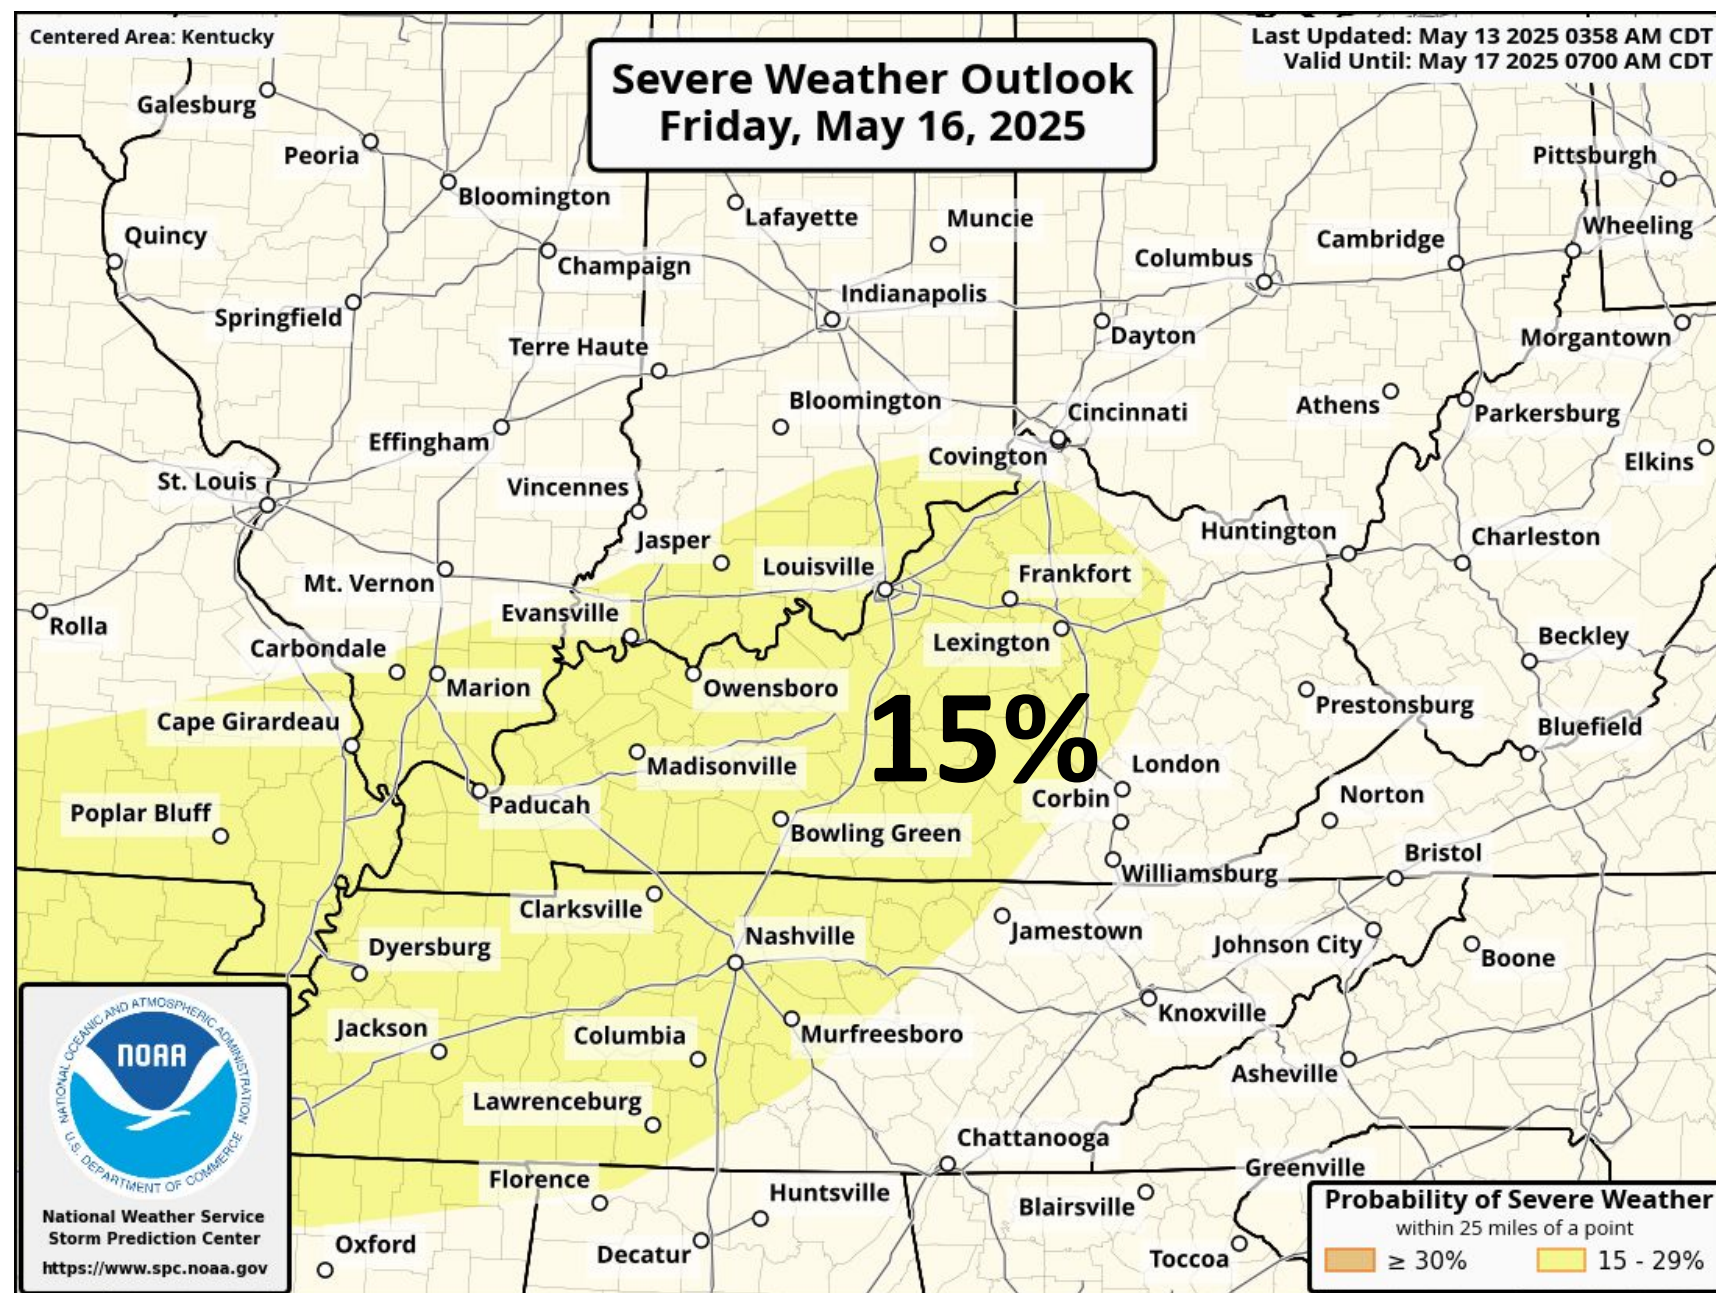

- Timing/exact location will depend on how late Thursday activity develops
  - ◆ Weaker or non-existent first wave likely will allow for stronger storms Friday late afternoon and evening
- Main threats: damaging winds, heavy rains, isolated tornadoes, and frequent lightning
  - ◆ Still early in the forecast, so keep updated as we close out the work week!
