

Active Weather Pattern Ahead

March 2, 2026
3:58 PM

Next Week Into Mid March

- An active, increasingly wet weather pattern is likely to emerge next week as multiple waves of low pressure move across the Plains and Midwest. **There is a 50-60% chance for above normal precipitation March 9-15 across portions of Indiana, western Kentucky, and central Kentucky.**
- Multiple rounds of thunderstorms are possible with this pattern, and some storms could be strong to severe. Monitor the forecast as we move into next week, and take any early planning measures for flooding or severe weather.

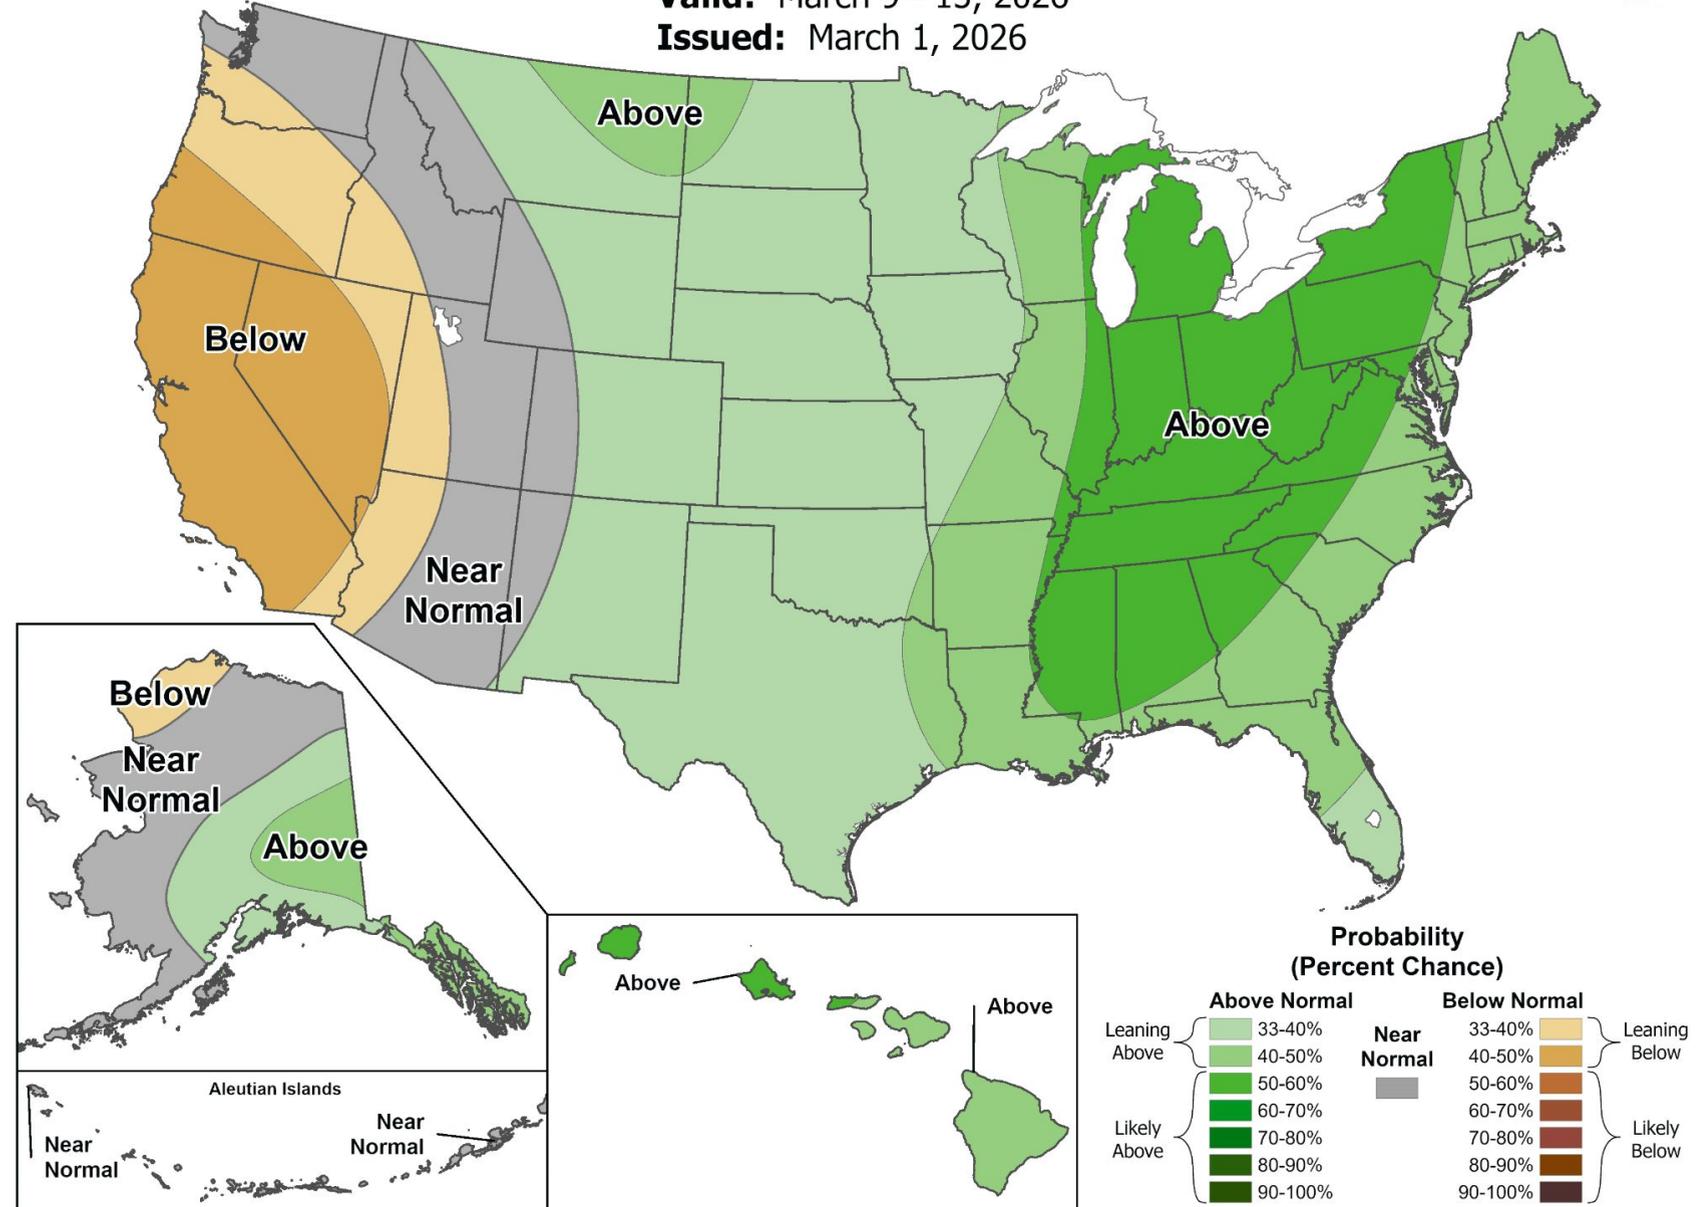

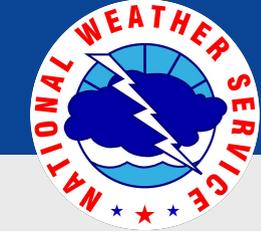

8-14 Day Precipitation Outlook

Valid: March 9 - 15, 2026

Issued: March 1, 2026

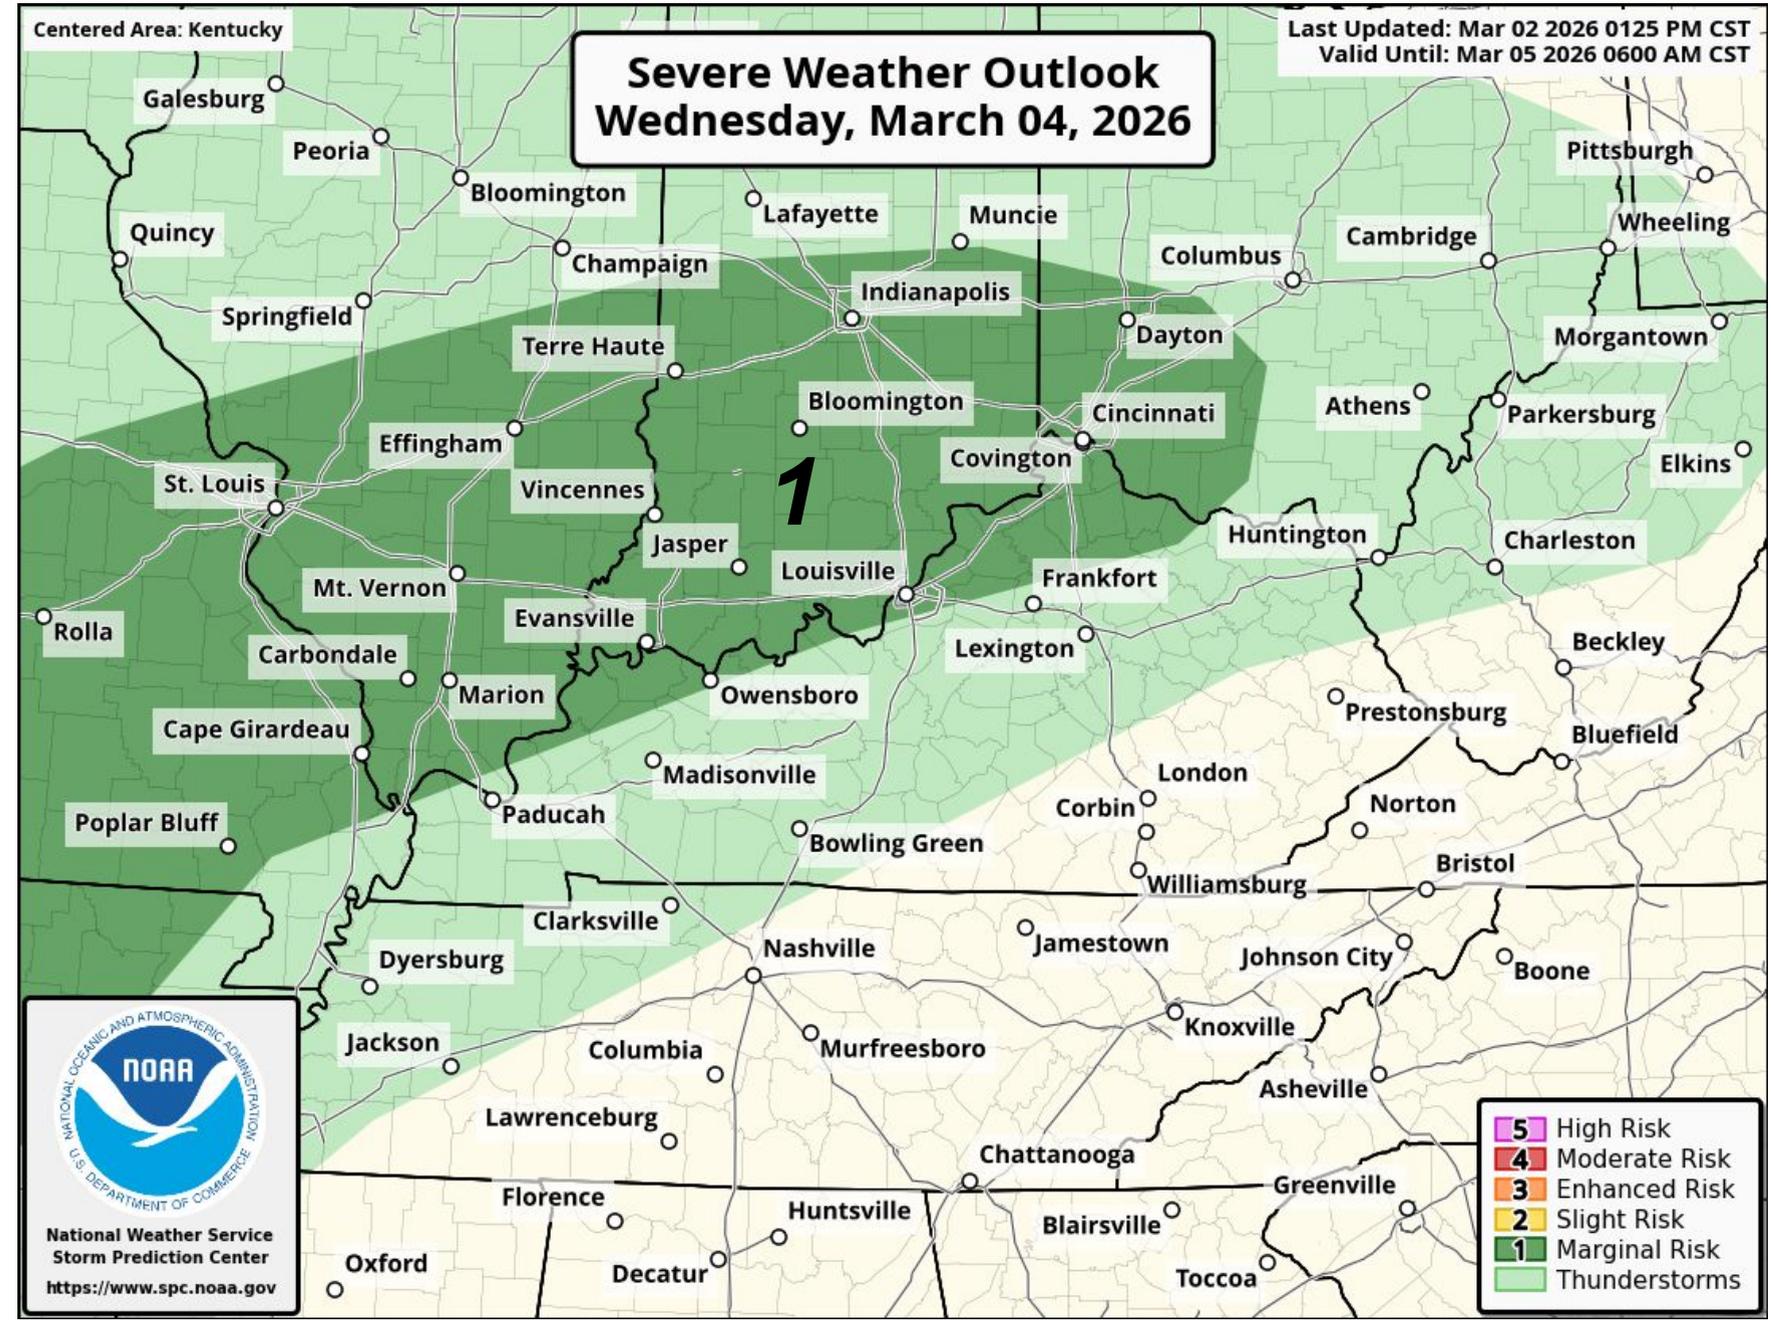

Marginal Strong Storm Threat Mid Week

March 2, 2026
3:58 PM

Threat for Strong To Severe Storms May Linger Into Thursday

Key Messages

- A warm front will stall just north of our region on Wednesday, with scattered showers and storms developing across southern IN and northern KY.
- A few of these storms could become strong to severe with hail and gusty winds as the main threats.
- The strong to severe threat could linger into Wednesday night along and north of I-64, and into Thursday across Kentucky.

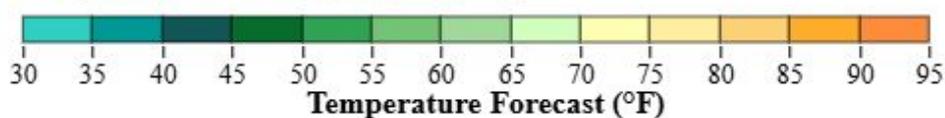

A Warm and Wet Week Ahead
