

Strong to Severe Storms Possible This Afternoon

Gusty Winds and Hail are the Main Severe Threats

Key Messages

- Scattered showers and thunderstorms are expected to develop this afternoon and evening
- → Estimated timing → Noon to 8 PM EDT
- Gusty winds and marginally severe hail are possible, mainly east of Interstate 65

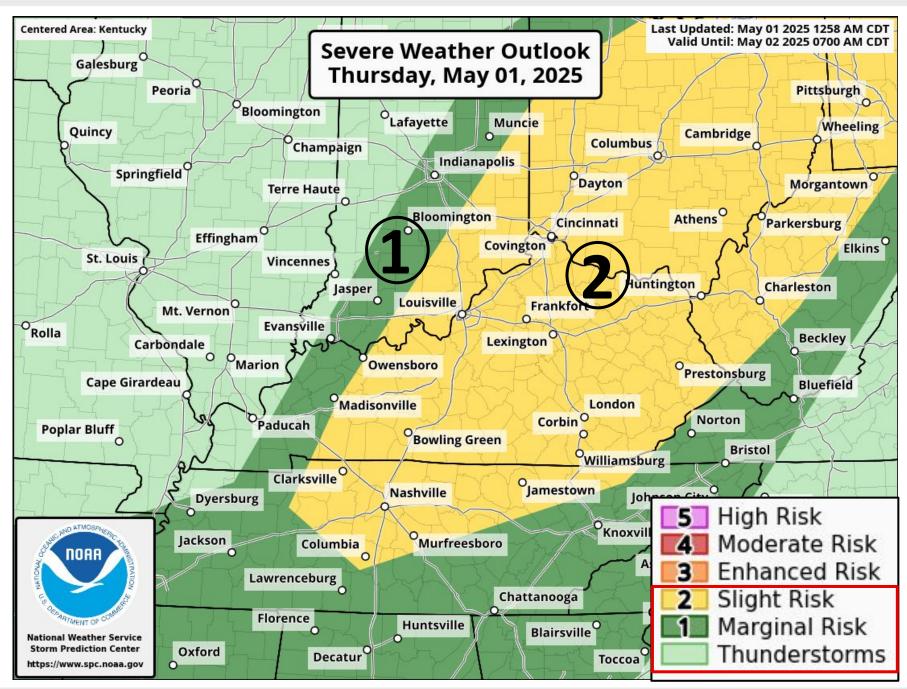

Impacts

- Gusty winds could cause loose outdoor items like tents or signage to blow around
- → Lightning will threaten outdoor activities
- Heavy rainfall could cause ponding on roadways

Overall Confidence

Scattered Showers and Storms Friday

Lower Confidence in the Potential for Severe Storms

Key Messages

- → A cold front will approach the region from the northwest Friday morning
- → Showers and thunderstorms will develop along and ahead of the front during the afternoon hours
- The location of the cold front and storms to the southwest will impact the severe potential
- → Main Timing → 3 PM to 10 PM EDT

Potential Impacts

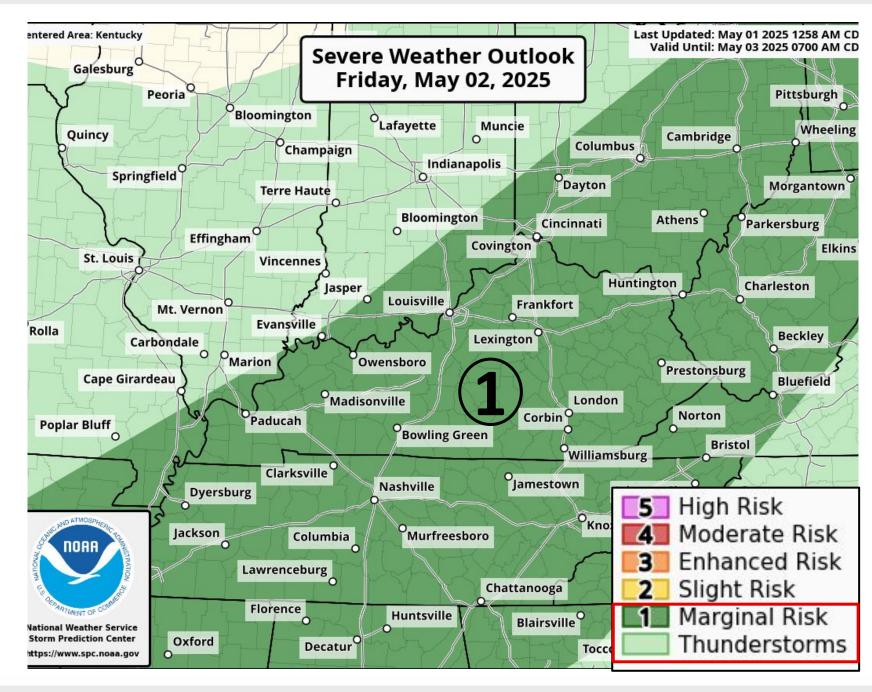

- → Primary Severe Threat → Gusty Winds
- → Small hail is also possible
- All thunderstorms will contain heavy rainfall and lightning

Overall Confidence

Low

Medium

High

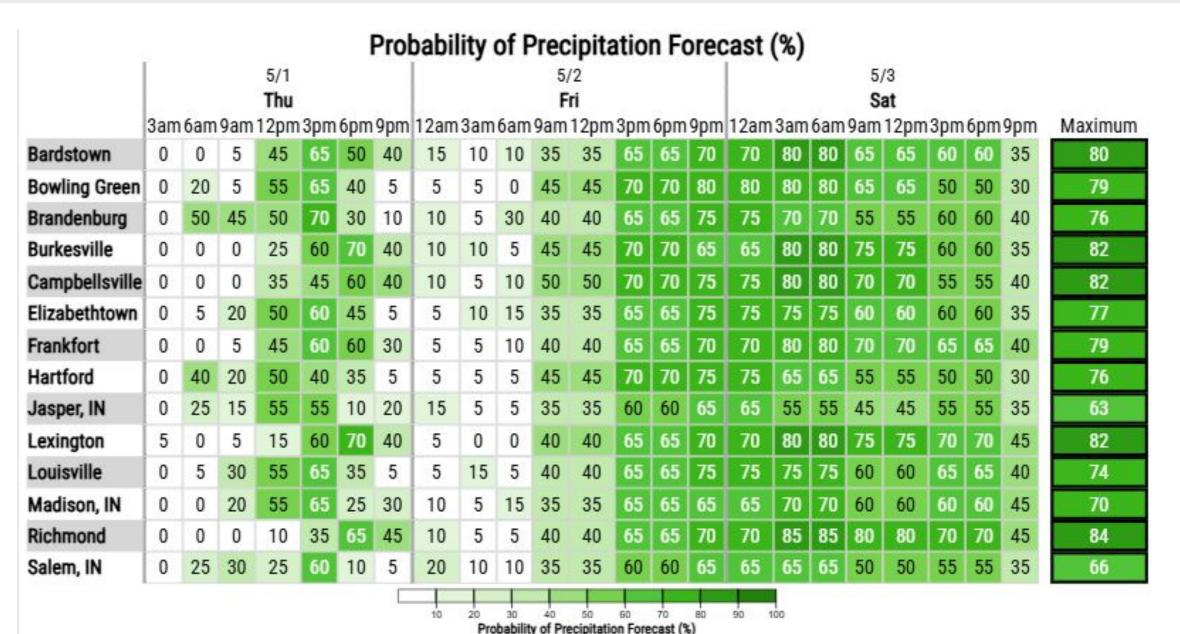

Unsettled Weather Continues This Weekend

Scattered Showers Likely on Saturday

Key Messages

- → The potential for rain showers this weekend continues to increase
- A few thunderstorms are possible Saturday afternoon, but confidence is low
- There will be breaks in the rain on Saturday, and most likely rainfall amounts are around 0.25"

Created: 4 am EDT Thu 5/1/2025

Understanding Severe Thunderstorm Outlook Categories

CATEGORY	DETAILS	SUMMARY	How many severe storms are possible?		How bad could the worst storms be?	DEFINITIONS
General Thunderstorm	Although severe weather is not expected, all thunderstorms can produce deadly lightning, gusty winds, and small hail.	No severe thunderstorms expected			Similar to storms your area experiences many times per year	Severe Storm
			None	Numerous		Any storm that contains at least one of the following:
Marginal (MRGL)	Some storms could be capable of damaging winds and severe hail. Localized tornado threat could develop.	Isolated severe storms possible			Similar to storms your area may experience several times per year	Wind gusts of at least 58 mph
			None	Numerous		Hail at least one inch in
Slight (SLGT)	Increased confidence that some storms will contain damaging winds, severe hail, and/or tornado potential.	Isolated to scattered severe storms expected			Similar to storms your area may experience a few times per year	diameter
	A few severe storms could be significant		None	Numerous	1947	
Enhanced (ENH)	High confidence that several storms will contain damaging winds, severe hail, and/or tornadoes.	Scattered to numerous severe storms expected			Similar to intense storms your area may only experience once	
	Several severe storms could be significant		None	Numerous	or twice per year	
Moderate (MDT)	High confidence that many storms will contain damaging winds, severe hail, and/or tornadoes.	Scattered to numerous severe storms expected			Similar to intense storms your area may only experience once per year or less	
			None	Numerous		
High (HIGH)	storms will contain tornadoes, damaging winds, and/or severe hail.	Numerous severe storms expected			Very intense storms your area may only experience once or twice in a lifetime	
	lornado outbreak and/or widespread damaging winds		None	Numerous		aa gov I weather gov
