<p>As the storm continued eastward, several homes and outbuildings were heavily damaged by the third tornado touchdown produced by the supercell. In addition to the structural damage covering nearly 1 1/2 miles, scores of trees were downed as were utility lines. A witness at the end of this tornado's path reported seeing two tornadoes on the ground simultaneously, as the fourth tornado produced by this supercell touched down about 1/4 mile north of the ending point of the third twister.</p>

<p>The fourth touchdown in this family of tornadoes produced by a cyclic supercell did the most damage in Clinton County as it hit several residences in a rural subdivision along Pleasure Ridge Road. After moving through uninhabited hillside for a mile, uprooting and snapping trees in a nearly quarter-mile wide path, the tornado tore the roof of a ranch-style brick home and destroyed its nearby outbuildings. Continuing along parallel to Pleasure Ridge Road, the tornado destroyed a mobile home, barn, and grain silo in its path, and heavily damaged at least three other homes before exiting the county.</p>
