rainfall of one and a half to four inches, with isolated totals higher fell across areas south of I-80. This produced flooding and flash flooding. Scattered reports of roads closed during Sunday mid-afternoon through evening were received. There were a couple reports of water rescues and stranded vehicles.

After a morning complex of non-severe storms on June 7th, redeveloping storms in the early afternoon intensified just south of I-80 and slowly evolved southeastward through the night, producing heavy rainfall rates and at times severe straight-line winds. Widespread

A tornado briefly touched down but no dar	nage occurred. The tornado was rep	ported by a trained	spotter and law en	nforcement. (Tornado 10 of 10).
During the evening of June 22, twelve to	rnadoes occurred across northern	Illinois including	ten in the WFO C	hicago forecast area. Ten
of the twelve were spawned from a singl				_
Kankakee Counties. The heaviest dama	ge was in Coal City (Grundy Count	y) and Braidwood	(Will County) which	ch was caused by an EF-3
tornado with maximum winds of 160 mp	h, and the Woodhaven Campgroun	d in Sublette (Lee	County) caused b	y an EF-2 tornado with
maximum winds of 130 mph. There were	e 14 injuries reported. There were ı	no fatalities. The	EF-3 Coal City to I	Braidwood tornado was
the strongest tornado in Grundy County	since an F3 tornado struck on July	/ 17, 1972. The at	mosphere was pri	med for severe weather,
with very warm, humid conditions, low p	ressure moving north of the region	n, and a strong jet	stream aloft. An	outflow boundary from
earlier storms during the late morning a	nd early afternoon may have been l	key to where the I	ong-lived tornado-	-producing storm
tracked. In addition to tornado and wind	d damage, slow moving storms bro	ught torrential rai	nfall of locally up t	to 3 to 5 inches to portions
of Lee, Grundy, Will, and Kankakee cour	nties, resulting in widespread flash	flooding. This ra	in fell on top of so	il already saturated from
