De Kalb  
29  2010CST  0 0  10K  Hail(1.00)
Quarter sized hail produced damage to parked vehicles.

Mchenry County

Crystal Lake  
29  2015CST  0 0  Thunderstorm Wind (EG50)
Large tree limbs were reported down by law enforcement officers. Police reported farms on Ball Valley, Ridge and Johnsburg Roads.

Lake County

Lake Villa  
29  2036CST  0 0  Thunderstorm Wind (MG53)
62 mph/53 kt wind gust measured by NWS COOP observer with unofficial equipment.

Ogle County

Lindenwood  
29  2330CST  0 0  Thunderstorm Wind (EG55)
A roof was partially blown off a pole barn on Lindenwood Rd. in rural Ogle County, near Lindenwood.
ILLINOIS, Northeast

During the late afternoon and early evening, a supercell thunderstorm developed in a warm, unstable airmass ahead of a cold front, over central Illinois. By around 7:00 PM CST, this storm moved into La Salle County. The storm continued to track northeast through La Salle, De Kalb, Kane, McHenry and Lake Counties. Along the course of its path, this storm produced hail up to one inch in diameter and wind gusts up 96 mph. By around 9:30 PM CST, lines of thunderstorms that had been moving through Iowa finally crossed the Mississippi River into western Illinois. These storms maintained their intensity until they reached Ogle County, producing wind damage.

Following the severe weather event of October 29, a strong cold front moved through northern Illinois and Indiana during the morning hours of October 30. This cold front extended from a deep low pressure system over the western Great Lakes. A strong pressure gradient caused strong winds over northern Indiana. There was a peak gust to 58 mph at Valparaiso. At least 6100 people lost power in Lake and Porter Counties from falling tree limbs and wires.
