Winnebago County
Rockford 04 1540CST 2300CST 0 0  20M  Flash Flood
Thunderstorms developed over southeast Winnebago County and eastern parts of the City of Rockford during the afternoon and evening of September 4th. The thunderstorms continued to redevelop over the same areas, as they pushed north and weakened. Some areas across parts of eastern Rockford received heavy rain for two to three hours. As a result, massive and severe flooding occurred. Most of the flooding occurred in and around the Keith Creek Watershed. Some of the damage included a large section of a concrete drainage ditch that was washed out on Harrison Avenue near 20th Street. Hundreds of basements were flooded. Fifteen of these basements suffered structural damage and were deemed uninhabitable. Numerous streets and parking lots were flooded, some as much as 4 to 6 feet with cars floating or submerged in the flood waters. Flood waters as deep as nine feet were reported on Alpine Park in downtown Rockford. Dozens of people were rescued from the flood waters and hundreds were evacuated from their homes as flood waters rose. Flood waters rose so fast in some areas that motorists were trapped in their cars until help arrived. At least 70 businesses sustained some level of flood damage. The highest rainfall total reported was 7.50 inches near Cherry Valley, 4.30 inches was reported on the east side of Rockford, while only 0.72 inches was recorded at Rockford Airport on the southwest side of the City. No fatalities or injuries were reported.

Water six inches deep was reported on State Road 71 near SR 352. Water was over the road on a one half to one mile stretch of Highway. Storm total rainfall of 2.43 inches was measured four miles west northwest of Boswell.

Lake County
Northwest Portion
13 1000CST 1700CST 0 0 8M Flash Flood
Heavy rain fell across parts of northwest Lake County during the middle and late morning hours of September 13th, which caused major and significant flooding. Highland suffered some of the worse flooding with over 1,400 reports of flood damage and 14 homes condemned due to severe damage. At the height of the flooding, 90 percent of the streets in Highland were flooded. School buses were unable to take students home from school and one elementary school had to be evacuated by boat. Over 70 percent of the homes in Highland sustained some damage. Countless streets across northwest Indiana were flooded and impassible. Over 600 homes were damaged by flooding in East Chicago. Flood water was seen shooting out of storm drains and in a few cases, blew the manhole covers into the air. Numerous cars were stranded and floating in flood waters. Rainfall totals included 7.94 inches, 7.50 inches and 6.58 inches, all three in Highland; 6.56 inches in Schererville; 5.31 inches in Hammond; 4.06 inches in Munster and 3.53 inches in Crown Point.

Lake County
East Chicago to Highland
13 1700CST 15 1200CST 0 0 0 Flood
After flash flooding across northwest Lake County during the morning and afternoon hours of September 13th, flood waters slowly receded with some areas still flooded two days later on September 15th.
