Flooding was reported at the following locations, First Avenue west of Berwyn; Palatine Road in Wheeling; North Avenue at Interstate 290 in Elmhurst; Interstate 90 near O'Hare Airport; Touhy Avenue near Mt. Prospect was impassible; Interstate 94 at Pratt, and along Weller Creek at Elmhurst Road. Wilke Road between Kirchoff and Central was flooded in Arlington Heights. Several feet of water was reported covering some taxiways and gate areas at O'Hare Airport. Standing water was reported in streets and in fields in Evanston. Park Boulevard was under water with a stalled car near Streamwood, and Popular Creek flooded fields. In Northbrook, an overflowing stream flooded Green Park. There were close to 200 reports of basement flooding in Chicago, along with a few flooded viaducts. Over 5,000 residences in unincorporated Maine Township were affected by flooding and 86 basements were completely filled to the first floor with flood water. Numerous vehicles were stuck or abandoned in flood waters including two police cars and an ambulance. Flooding was also reported in Schaumburg, Palatine and Arlington Heights. A 28 year old man attempted to swim across a flooded retention basin near the Sunset Meadows Park in Arlington Heights. He was seen struggling in the water and rescue crews pulled his body out of the pond a few hours later. A 13 year old boy was swept into Salt Creek in Elk Grove Village while crossing a foot bridge. He was quickly rescued by onlookers. A business in Rolling Meadows suffered significant flooding from two nearby retention ponds. The Metropolitan Water Reclamation District reversed the flow of the Chicago River, sending mainly rainwater runoff into Lake Michigan at rate of 25 billion gallons per hour. Rainfall totals included, 7.07 inches near Evanston, 6.60 inches near Elk Grove Village, 6.10 inches in Morton Grove and 5.89 inches in Streamwood.

Direct Fatalities: M28IW

## Storm Data and Unusual Weather Phenomena - September 2008

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
Flooding continued across parts of southern and central DeKalb County into the morning of September 14th. A car drove into flood waters on Rimsnider Road near Hinckley during the evening of September 13th. The car was swept away by fast flowing flood waters. A man, woman and small child (along with their pets) in the car, were able to get out of the car but were trapped on a small piece of land by water. Several hours later, they were rescued.

## Storm Data and Unusual Weather Phenomena - September 2008

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
Flash flooding or significant flooding was reported across most of Cook County, including street closures due to flooding, basement flooding and creek, stream and river flooding. In the Albany Park neighborhood in Chicago, the North Branch of the Chicago River overflowed its banks and flooded about 340 homes. In Skokie, five people were rescued from three vehicles trapped in flood waters at the Golf Road viaduct and eight people were rescued from five vehicles stalled out under the Skokie Boulevard viaduct. Silver Creek flooded streets and basements near Hillside. Significant flooding was reported in Des Plaines including multiple vehicles submerged or abandoned. Significant flooding was also reported in Park Ridge where at least 8 people had to be rescued from their vehicles which were stuck in flood waters. Dozens of vehicles were abandoned in flood waters. The basement of Riverside-Brookfield High School suffered major flood damage and the school was closed for one week. Brookfield Zoo closed for the first time because so many exhibits were flooded. Full moats in some exhibits would have allowed large carnivores to swim out, so they were forced to stay in their indoor habitats. Significant flooding was reported in the Golf neighborhood of Glenview.				

---

**KANKAKEE COUNTY --- 3.7 NW DESELM [41.29, -88.01], 4.2 ENE PUDER [41.30, -87.53], 1.3 ESE LEESVILLE [41.01, -87.53], 5.5 SW BUCKINGHAM [41.00, -88.25], 3.6 WNW ESSEX [41.20, -88.24], 2.0 SW KANKAKEE RIVER PK AR [41.20, -88.01]**

09/19/08 06:00 CST	0	Source: Emergency Manager

The Illinois River reached a record crest of 33.79 feet at LaSalle on the 16th. Major flooding occurred along the river in LaSalle County. In Marseilles, flood waters inundated Illini State Park and nearby areas. Flood waters inundated the Peru power plant. Brunner and Water Streets were closed due to flooding. Navigation on the river was halted as most lock facilities were submerged. The Interstate 39 bridge was the only one open as State Highways 251, 351, and 178 were closed. Homes and businesses in Utica were flooded. In Ottawa, 89 residents of a nursing home were evacuated. Dee Bennett Road between Ottawa and Utica was closed. Central Elementary School in Ottawa was surrounded by water and the auditorium was flooded with 8 inches of water.

**High flows from tributaries emptied into the Illinois River, causing water levels to rise to record heights.**

### INDIANA, Northwest

**JASPER COUNTY --- 2.2 NNE KERSEY [41.23, -87.13], 2.4 NNE KERSEY [41.23, -87.13]**

09/04/08 15:49 CST	30K	Tornado (EF1, L: 0.24 mi , W: 20 yd)
09/04/08 15:50 CST	5K	Source: NWS Storm Survey

A tornado touched down approximately 5 miles northwest of Wheatfield near the Oak Heritage Estates. This tornado caused structural damage to one mobile home, damage to multiple trees and corn fields. Damage began southwest of the intersection of North 450 West and Hawthorn Road, where a 10 yard wide path of corn stalks was completely flattened in a convergent manner. Damage continued where a roof was lifted off a mobile home and thrown into the yard. Also at this location, two trees were completely uprooted. Along the path of this tornado, the tops of many trees had sheared limbs along with scattered debris ranging from toys to trash bins.

**During the afternoon hours of September 4th, the remnants of what once was hurricane Gustav moved northeast across northwest Indiana. Several bands of rain moved through the area with some convective cells. One of these cells produced a brief tornado.**
