

Dangerous Wind Chills Tonight

January 19, 2022
5:04 PM

Wind chills as low as -20°F likely in northeastern MO & west-central IL

Key Messages

Temperatures will fall to around 0°F across northeastern MO & west-central IL tonight into tomorrow morning.

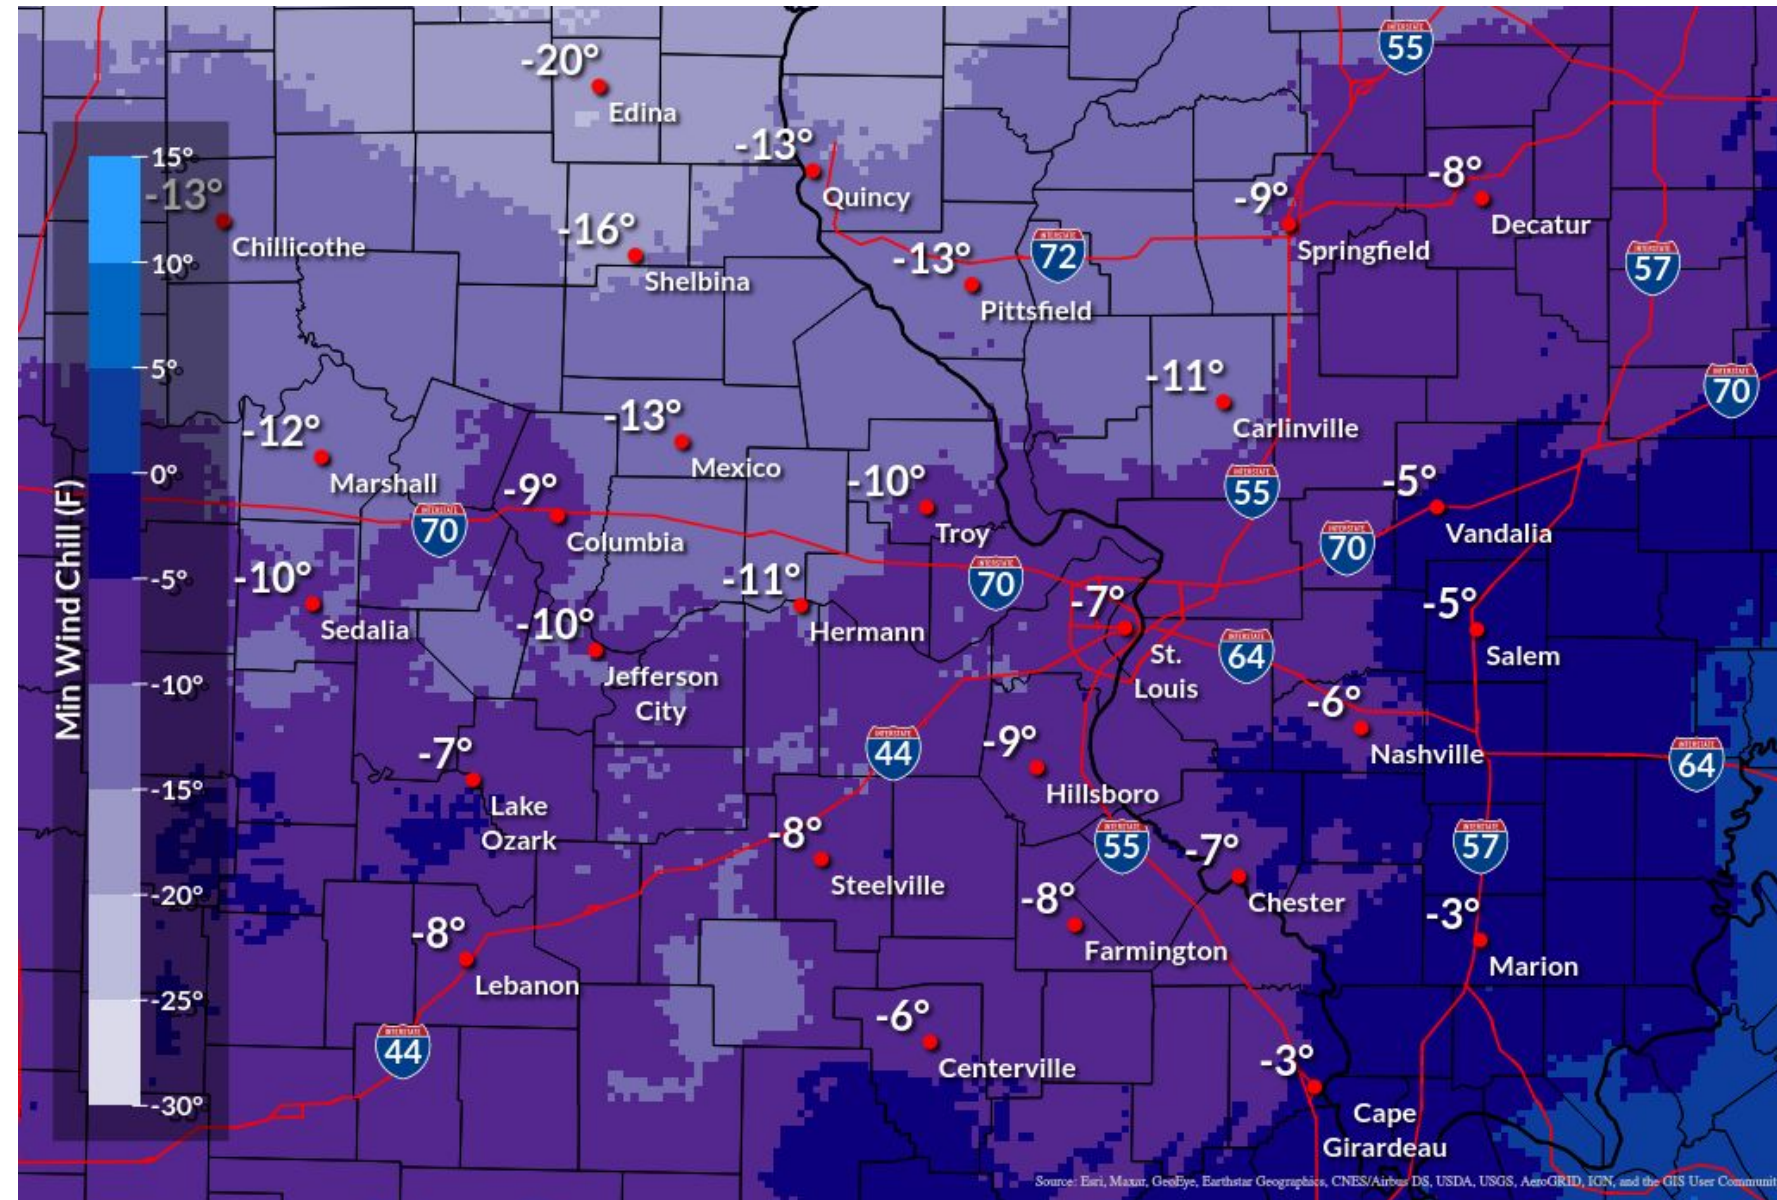

- These temperatures, combined with northerly winds of 7 to 12 mph, will likely result in dangerous morning wind chills of -15 to -20°F across this area.
- Very cold temperatures will linger into Friday AM, but lighter winds may preclude wind chills from becoming dangerous again during that time.

NEW Important Updates

- Wind Chill Advisory issued for portions of NE MO and west-central IL

Next Scheduled Briefing

- By 500 AM Thursday.

Minimum Wind Chills Tonight

Wind Chill Advisory

January 19, 2022
5:04 PM

Covering portions of northeast Missouri and west-central Illinois

Current Watches, Warnings, and Advisories

Advisory Details

9pm tonight - 12pm Thursday

Dangerous wind chills bottoming out between -15 and -20 degrees

Quick Forecast

- Breezy winds will gradually diminish through the night.
- Meanwhile temperatures will drop into the single digits across the area, to near 0 within the advisory area.
- The combination of the cold temperatures and lingering winds will drop wind chills to dangerous levels in NE MO and WC IL
