A storm severely impacted the area near and south of Paducah. The Texas Tech University West Texas mesonet site 10 miles southwest of Paducah measured a wind gust to 80 mph. A schoolnet site in Paducah measured a wind gust to 64 mph 11 minutes later. There were also multiple reports of thunderstorm wind damage especially at Paducah High School. The Paducah fire department reported utility poles downed 10 miles south of Paducah. Minor structural damage was reported at Paducah High School including severe damage to the press box at the football field. Additionally, the garage door was blown in at the High School agricultural building with accompanying tree damage in the area.

	06/10/11 19:01 CST	0	Thunderstorm Wind (MG 55 kt)	
	06/10/11 19:09 CST	0	Source: ASOS	

The ASOS at Childress Municipal Airport (KCDS) reported severe wind gusts for several minutes. No damage was reported.

Evening severe thunderstorms on the 10th brought much needed rain to the South Plains and Rolling Plains but also produced damaging straight-line winds. Storms developed along a cold front stretched across the region with storms initially forming in the Permian Basin. As the storms moved into the South Plains they intensified. A strong gust front from the initial storms created a haboob that moved across several counties. There was no damage or injuries reported with the haboob. Lightning from these storms also started a wildfire in Motley county. The most significant damage was in King and Cottle Counties as a new complex of thunderstorms developed in Crosby and Dickens Counties and moved northeastward. Strong outflow winds caused damage from Dumont (King County) to Paducah (Cottle County). Paducah High School sustained significant damage from these straight-line winds. A wake low over Garza county created high wind gusts locally enhanced by the Caprock escarpment. These winds were measured by the Texas Tech University West Texas mesonet.

Lightning strikes from severe storms on the evening of the 27th started several wildfires. Three of these wildfires flared up during the afternoon hours of the 28th. One wildfire started in Lamb county and was known as the Tolk Plant Fire. An energy power plant was threatened but no damage was reported. This fire burned a total of 750 acres. Two additional wildfires flared up in Bailey County near the Lamb/Bailey County line near and north of of U.S. Highway 84. These two fires prompted the closure of U.S. Highway 84 between Muleshoe (Bailey County) and Sudan (Lamb County). Visibility was near zero on U.S. Highway 84 due to the smoke from the wildfire. These two fires burned a total of 5,900 acres.
