

Storm Data and Unusual Weather Phenomena - April 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
TEXAS, South Panhandle				

(TX-Z033) COCHRAN, (TX-Z035) LUBBOCK

04/01/25 14:33 CST	0	High Wind (MAX 54 kt)
04/01/25 16:17 CST	0	

Strong surface cyclogenesis developed over western Kansas on the first in response to a deepening long wave trough in the western United States. A dryline mixed eastward during the daytime leaving strong southwesterly winds in its wake. Strong winds aloft out ahead of the long wave trough were able to mix down to the surface under deep boundary layer mixing. Although widespread high winds were not observed, a few sites recorded brief severe wind gusts. These winds also brought minor visibility restrictions due to blowing dust.

High wind gusts from the Texas Tech University West Texas mesonet network are below:

58 mph at Reese Center (Lubbock County) and  
58 mph at Sundown (Cochran County).

The following high wind reports are from Automated Surface Observing Stations (ASOS):

62 mph at Lubbock International Airport (Lubbock County).

(TX-Z021) PARMER, (TX-Z022) CASTRO, (TX-Z026) CHILDRESS, (TX-Z027) BAILEY, (TX-Z033) COCHRAN, (TX-Z034) HOCKLEY, (TX-Z035) LUBBOCK

04/05/25 04:00 CST	0	Winter Weather
04/06/25 00:00 CST	0	

(TX-Z023) SWISHER, (TX-Z024) BRISCOE, (TX-Z025) HALL, (TX-Z029) HALE, (TX-Z030) FLOYD, (TX-Z031) MOTLEY

04/05/25 06:00 CST	0	Heavy Snow
04/05/25 22:00 CST	0	

A strong storm system combined with a cold front creating a late season heavy snow event across the extreme southern Texas Panhandle into portions of the South Plains and Rolling Plains. A storm system moved southeastward out of the four corners region on the fifth along with a cold front early in the day. Increasing northerly winds allowed for temperatures to continually fall through the daytime hours. Initially, precipitation began as rain but changed over to snow as surface temperatures cooled. The TROWAL region of this system remained over the extreme southern Texas Panhandle which allowed precipitation to persist all day before tapering off late on the fifth.

Snowfall reports from NWS cooperative weather observers are listed below:

12.0 inches at Silverton (Briscoe County),  
11.0 inches at Vigo Park (Swisher County),  
7.0 inches at Kress (Swisher County),  
6.5 inches at Plainview (Hale County),  
6.5 inches at Hale Center (Hale County),  
6.0 inches at Caprock Canyons State Park (Briscoe County),  
5.6 inches at Turkey (Hall County),  
5.0 inches at Lockney (Floyd County),  
4.0 inches at Matador (Motley County),  
4.0 inches at Tulia (Swisher County),  
3.5 inches at Abernathy (Hale County),  
3.3 inches at Friona (Parmer County),  
2.7 inches at Shallowater (Lubbock County),  
2.5 inches at Morton (Cochran County),  
2.1 inches at Dimmitt (Castro County),  
2.0 inches at Floydada (Floyd County),  
2.0 inches at Flomot (Motley County),  
2.0 inches at Floydada 9SE (Floyd County),  
2.0 inches at Tell (Childress County),  
1.5 inches at Lubbock International Airport (Lubbock County),  
1.5 inches at Muleshoe (Bailey County),  
1.2 inches at Levelland (Hockley County), and  
1.0 inch at Roaring Springs (Motley County).

## Storm Data and Unusual Weather Phenomena - April 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>(TX-Z035) LUBBOCK</b>				
	04/18/25 18:27 CST		0	High Wind (MAX 50 kt)
	04/18/25 18:27 CST		0	
<p>An upper level storm system near the four corners region on the 18th was moving eastward creating strong southwesterly winds aloft. These winds brought mid-level moisture over the region along with strong lift. A dryline moved eastward during the daytime leaving much of the area in dry near surface air. The lift from this system combined with the increasing mid-level moisture creating virga showers. One of these virga showers falling into a very dry lower atmosphere created a severe wind gust within the city of Lubbock (Lubbock County) of 58 mph measured by the Texas Tech University West Texas mesonet.</p>				
<b>LYNN COUNTY --- 1.1 SE TAHOKA T BAR ARPT [33.17, -101.81]</b>				
	04/19/25 18:45 CST		0	Hail (0.75 in)

	04/19/25 21:06 CST		0	Hail (1.25 in)
	04/19/25 21:06 CST		0	Source: Public
<p>A report was received of half dollar size hail southwest of Wolfforth.</p> <p>A strong upper level short wave trough moved out of western New Mexico into the Texas Panhandle from the afternoon through the nighttime hours of the 19th. A cold front had moved through earlier in the day leading to relatively cool surface conditions. Lift spreading overhead from the upper level short wave trough acted upon moist and an unstable elevated airmass during the evening hours on the 19th. A line of thunderstorms developed across the South Plains producing half dollar size hail in Lubbock County.</p>				
<b>LAMB COUNTY --- 16.8 NNW ANTON [34.03, -102.33]</b>

<b>LAMB COUNTY --- 1.3 S FIELDTON [34.01, -102.22]</b>				

## Storm Data and Unusual Weather Phenomena - April 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/22/25 18:01 CST		0	Hail (1.50 in)
	04/22/25 18:01 CST		0	Source: Social Media

A photograph on social media depicted ping pong ball size hail south of Fieldton near the intersection of Farm to Market roads 37 and 1072.

---

### YOAKUM COUNTY --- PLAINS [33.18, -102.83]

04/22/25 18:22 CST	0	Hail (1.75 in)
04/22/25 18:37 CST	0	Source: Public

Local broadcast media relayed public reports of hail ranging from golf ball to ping pong ball size in Plains.

---

### LAMB COUNTY --- 3.6 N LITTLEFIELD [33.97, -102.33]

04/22/25 19:13 CST	0	Hail (2.50 in)
04/22/25 19:13 CST	0	Source: Public

A public report was received of tennis ball size hail north of Littlefield near the intersection of Farm to Market Road 2197 and US Highway 385. No damage was reported.

---

### FLOYD COUNTY --- FLOYDADA [33.98, -101.33]

04/22/25 19:19 CST	0	Hail (0.88 in)
04/22/25 19:19 CST	0	Source: Public

---

### YOAKUM COUNTY --- 7.3 NE DENVER CITY ARPT [33.05, -102.75]

04/22/25 19:26 CST	0	Hail (2.00 in)
04/22/25 19:26 CST	0	Source: Storm Chaser

A storm chaser reported two inch size hail near the intersection of Farm to Market Roads 213 and 435 southeast of Plains. No damage was reported.

---

### LAMB COUNTY --- 1.3 WNW SPADE [33.93, -102.17]

04/22/25 19:45 CST	0	Hail (1.75 in)
04/22/25 19:45 CST	0	Source: Trained Spotter

A trained spotter reported golf ball size hail covering Farm to Market Road 54 west of Spade.

---

### FLOYD COUNTY --- FLOYDADA [33.98, -101.33]

04/22/25 19:50 CST	0	Hail (1.25 in)
04/22/25 19:50 CST	0	Source: Law Enforcement

Law enforcement in the city of Floydada reported half dollar size hail.

---

### CROSBY COUNTY --- 1.0 WSW CROSBYTON PAULDER AR [33.65, -101.24], 0.7 E CROSBYTON [33.67, -101.24]

04/22/25 21:10 CST	0	Hail (1.75 in)
04/22/25 21:15 CST	0	Source: COOP Observer

An NWS cooperative weather observer and local broadcast media relayed reports of hail ranging in size from half dollar to golf ball.

Despite the absence of large scale lift over West Texas, numerous severe thunderstorms were able to form on the afternoon of the 22nd. Strong surface heating existed along and east of a diffuse dryline roughly around the US Highway 385 corridor. Low level moisture return east of the dryline combined with steep mid level lapse rates to create an unstable atmosphere by mid-afternoon. Veering and increasing winds with height allowed some storms to become organized and produced large hail and damaging wind gusts. The initial activity developed over the south-central Texas Panhandle, with additional development farther southwestward into the western South Plains. Large hail up to tennis ball size and gusty outflow winds were common with the strongest storms. One particularly intense storm approached the Matador area (Motley County). This storm was rotating rapidly aloft but never produced a tornado.

---

### CASTRO COUNTY --- 5.0 S DIMMITT [34.48, -102.32], DIMMITT [34.55, -102.32]

04/23/25 18:23 CST	0	Hail (3.50 in)
04/23/25 18:32 CST	0	Source: Storm Chaser

A slow moving supercell produced a wide swath of very large hail from south of Dimmitt into the town of Dimmitt . Numerous reports were received of hail ranging from golf ball size to as large as 3.50 inches in diameter. No damage was reported.

---

### SWISHER COUNTY --- 5.4 ENE HAPPY [34.75, -101.76], 4.4 WNW HAPPY [34.75, -101.92], 3.9 WSW HAPPY [34.72, -101.92], 5.4 NE KAFFIR [34.69, -101.76]

## Storm Data and Unusual Weather Phenomena - April 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/23/25 18:30 CST		0	Flash Flood (due to Heavy Rain)
	04/23/25 20:30 CST		0	Source: Public
Intense rainfall from a slow moving storm occurred in and around Happy. A Texas Tech University West Texas mesonet site near Happy measured 1.62 inches of rainfall in less than one hour. An mPing report was received of flooded roads in Happy.				
<b>CASTRO COUNTY --- 6.0 SE DIMMITT [34.49, -102.25]</b>				
	04/23/25 19:03 CST		0	Hail (2.50 in)
	04/23/25 19:03 CST		0	Source: Public
An mPing report was received of tennis ball size hail along Texas State Highway 194 southeast of Dimmitt. At least one windshield of a storm chaser was destroyed by extremely large hail.				
<b>SWISHER COUNTY --- 2.0 ENE TULIA [34.55, -101.74]</b>				
	04/23/25 19:20 CST		0	Thunderstorm Wind (MG 66 kt)
	04/23/25 19:40 CST		0	Source: Mesonet
A Texas Tech University West Texas mesonet site near Tulia measured severe wind gusts from 1920 CST through 1940 CST. A peak wind gust of 76 mph was measured at 1940 CST.				
<b>BRISCOE COUNTY --- 7.0 ESE SILVERTON [34.43, -101.19]</b>				
	04/23/25 21:06 CST		0	Thunderstorm Wind (MG 69 kt)
	04/23/25 21:13 CST		0	Source: Mesonet
A Texas Tech University West Texas mesonet site near Silverton measured severe wind gusts from 2106 CST through 2113 CST. A peak wind gust of 79 mph was measured at 2109 CST.				
<b>FLOYD COUNTY --- 3.0 ENE SOUTH PLAINS [34.24, -101.27]</b>				
	04/23/25 21:08 CST		0	Thunderstorm Wind (MG 51 kt)
	04/23/25 21:08 CST		0	Source: Mesonet
A Texas Tech University West Texas mesonet site near South Plains measured a wind gust of 59 mph at 2108 CST.				
<b>(TX-Z034) HOCKLEY</b>				
	04/23/25 21:15 CST		0	High Wind (MAX 52 kt)
	04/23/25 21:15 CST		0	
<b>BRISCOE COUNTY --- CAPROCK CANYONS STATE PARK [34.41, -101.07]</b>				
	04/23/25 21:20 CST		0	Thunderstorm Wind (MG 52 kt)
	04/23/25 21:20 CST		0	Source: Mesonet
A Texas Tech University West Texas mesonet site near Caprock Canyons State Park measured a wind gust of 60 mph.				
<b>CHILDRESS COUNTY --- (CDS)CHILDRESS ARPT [34.43, -100.30], 2.0 NNE CHILDRESS [34.45, -100.19]</b>				
	04/23/25 22:56 CST		0	Thunderstorm Wind (MG 56 kt)
	04/23/25 23:16 CST		0	Source: Mesonet
Both Childress municipal airport and the Texas Tech University West Texas mesonet site near Childress measured severe wind gusts spanning from 2256 CST through 2316 CST. A peak wind gust of 64 was measured at 2313 CST and 2316 CST.				
Scattered thunderstorms developed again on the afternoon of the 23rd in the absence of meaningful large scale forcing for ascent. Moisture in the lowest levels of the atmosphere continued to increase through the day resulting in a very unstable atmosphere by mid-afternoon. Veering of relatively weak winds through the atmospheric column resulted in organization of thunderstorms which were able to produce very large hail and damaging wind gusts. Reported hail was as large as 3.50 inches in diameter near Dimmitt (Castro County). Additionally, wind gusts up to 79 mph were also reported by the Texas Tech University West Texas mesonet. The relatively slow storm motion and intense rain rates also resulted in pockets of very heavy rainfall that induced flash flooding.				
<b>BRISCOE COUNTY --- 1.6 SE WHITELEY [34.33, -101.31], 1.6 NE WHITELEY [34.37, -101.31]</b>				
	04/24/25 16:50 CST		0	Hail (1.50 in)
	04/24/25 16:57 CST		0	Source: Public
Several mPing reports were received of hail along Texas State Highway 207 south of Silverton ranging in size from half dollar to ping pong ball.				

## Storm Data and Unusual Weather Phenomena - April 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>LUBBOCK COUNTY --- IDALOU [33.67, -101.68]</b>				
	04/24/25 17:15 CST		0	Hail (1.00 in)
	04/24/25 17:15 CST		0	Source: Storm Chaser
A storm chaser reported quarter size hail in Idalou.				
<b>FLOYD COUNTY --- 5.3 ENE SOUTH PLAINS [34.26, -101.24], 11.9 ESE SOUTH PLAINS [34.18, -101.12]</b>				
	04/24/25 17:29 CST		0	Hail (5.20 in)
	04/24/25 18:20 CST		0	Source: Social Media
Numerous photographs on social media as well as public reports depicted a swath of extremely large hail from near South Plains to east-central Floyd County. The largest hail size measured was 5.20 inches in diameter confirmed with a measurement from a caliper. No damage was reported.				
<b>CROSBY COUNTY --- 4.5 NNE CANYON VLY [33.46, -101.31], 3.1 ENE CANYON VLY [33.42, -101.28]</b>				
	04/24/25 18:01 CST		0	Tornado (EFU, L: 3.37 mi , W: 440 yd)
	04/24/25 18:15 CST		0	Source: Storm Chaser
Storm chasers reported a large tornado approximately one quarter mile wide at peak intensity over open country in southern Crosby County.				
<b>FLOYD COUNTY --- 0.6 NNW LAKEVIEW [33.88, -101.26]</b>				
	04/24/25 18:10 CST		0	Hail (1.00 in)
	04/24/25 18:10 CST		0	Source: COOP Observer
An NWS cooperative weather observer reported quarter size hail southeast of Floydada.				
<b>FLOYD COUNTY --- 10.0 SW FLOMOT [34.13, -101.12], 9.6 WSW WHITEFLAT [34.06, -101.04]</b>				
	04/24/25 18:10 CST		0	Tornado (EFU, L: 6.61 mi , W: 300 yd)
	04/24/25 18:23 CST		0	Source: Storm Chaser
Multiple storm chasers published photograph and video evidence of a large tornado that crossed over open ranch land from Floyd County into Motley County. No damage was reported or found with this tornado. However, trees and shrubs were lofted and power flashes observed on chaser video.				
<b>FLOYD COUNTY --- 4.0 NE LONE STAR [34.30, -101.36], 6.3 ENE LONE STAR [34.31, -101.32]</b>				
	04/24/25 18:10 CST		0	Tornado (EFU, L: 2.43 mi , W: 20 yd)
	04/24/25 18:12 CST		0	Source: Storm Chaser
Multiple storm chasers published photograph and video evidence of an anticyclonic tornado that crossed from northern Floyd County into southern Briscoe County over open fields.				
<b>BRISCOE COUNTY --- 2.6 S WHITELEY [34.31, -101.32], 0.8 SSE WHITELEY [34.34, -101.33]</b>				
	04/24/25 18:12 CST		0	Tornado (EFU, L: 1.80 mi , W: 20 yd)
	04/24/25 18:16 CST		0	Source: Storm Chaser
Multiple storm chasers published photograph and video evidence of an anticyclonic tornado that crossed from northern Floyd County into southern Briscoe County over open fields.				
<b>CROSBY COUNTY --- 2.5 WSW OWENS [33.56, -101.39]</b>				
	04/24/25 18:17 CST		0	Hail (2.50 in)
	04/24/25 18:17 CST		0	Source: Public
Numerous reports were received of hail up to tennis ball size south of Ralls along Texas State Highway 207. No damage was reported.				
<b>MOTLEY COUNTY --- 9.6 WSW WHITEFLAT [34.06, -101.04], 8.3 WSW WHITEFLAT [34.03, -101.00]</b>				
	04/24/25 18:23 CST		0	Tornado (EFU, L: 3.03 mi , W: 300 yd)
	04/24/25 18:38 CST		0	Source: Storm Chaser
Multiple storm chasers published photograph and video evidence of a large tornado that crossed over open ranch land from Floyd County into Motley County. No damage was reported or found with this tornado. However, trees and shrubs were lofted and power flashes observed on chaser video.				
<b>CROSBY COUNTY --- 3.6 SW OWENS [33.53, -101.40], 3.5 SSW OWENS [33.52, -101.37]</b>				
	04/24/25 18:34 CST		0	Tornado (EFU, L: 1.48 mi , W: 30 yd)
	04/24/25 18:37 CST		0	Source: Law Enforcement

## Storm Data and Unusual Weather Phenomena - April 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
Law enforcement in Crosby County observed a brief tornado over an open field east of Texas State Highway 207. No damage was reported.				
<b>MOTLEY COUNTY --- 6.0 WSW MATADOR [33.99, -100.92]</b>				
	04/24/25 18:55 CST	0		Hail (5.00 in)
	04/24/25 18:55 CST	0		Source: Public
A report from the public was received of hail measuring five inches in diameter . This hail was from the same swath in Floyd County which produced hail up to 5.20 inches in diameter. No damage was reported.				
<b>CROSBY COUNTY --- 1.8 W OWENS [33.57, -101.38], 7.2 S CROSBYTON MUNI ARPT [33.52, -101.22], 1.6 SE CROSBYTON MUNI ARPT [33.60, -101.21], 3.9 S RALLS [33.62, -101.37]</b>				
	04/24/25 19:00 CST	0		Flash Flood (due to Heavy Rain)
	04/24/25 22:00 CST	0		Source: NWS Storm Survey
An NWS storm survey revealed significant flooding south of Crosbyton along several roadways. A slow moving supercell thunderstorm produced very heavy rainfall over an extended period of time over areas of rural Crosby County. Farm to Market 40 was covered in mud in several areas east of Texas Highway 207 indicative of water over the roadway on the night of the 24th. Most of the county roads were muddy and impassable at the time of the storm survey.				
<b>MOTLEY COUNTY --- 4.3 WNW ROARING SPGS [33.93, -100.92], 4.0 W ROARING SPGS [33.90, -100.92]</b>				
	04/24/25 19:01 CST	0		Tornado (EFU, L: 1.85 mi , W: 30 yd)
	04/24/25 19:06 CST	0		Source: Law Enforcement
Law enforcement in Motley County observed a brief tornado over open fields west of Roaring Springs. No damage was reported.				
<b>GARZA COUNTY --- 14.6 NE POST [33.34, -101.21], 14.3 NE POST [33.33, -101.20]</b>				
	04/24/25 19:48 CST	0		Tornado (EFU, L: 1.16 mi , W: 30 yd)
	04/24/25 19:51 CST	0		Source: Public
A slow moving supercell thunderstorm produced five known tornadoes . This is the first of the five tornadoes. A report was received from the public of a brief tornado over open country. No damage was reported.				
<b>GARZA COUNTY --- 12.3 NE AUGUSTUS [33.26, -101.15], 14.3 NE AUGUSTUS [33.28, -101.13]</b>				
	04/24/25 20:08 CST	0		Tornado (EFU, L: 2.02 mi , W: 30 yd)
	04/24/25 20:14 CST	0		Source: Storm Chaser
A slow moving supercell thunderstorm produced five known tornadoes . This is the second of the five tornadoes. Storm chasers reported a brief touchdown in an open field. No damage was reported.				
<b>GARZA COUNTY --- 11.9 NE AUGUSTUS [33.24, -101.14], 13.6 NE AUGUSTUS [33.25, -101.12]</b>				
	04/24/25 20:24 CST	0		Tornado (EFU, L: 1.78 mi , W: 30 yd)
	04/24/25 20:32 CST	0		Source: Storm Chaser
A slow moving supercell thunderstorm produced five known tornadoes . This is the fourth of the five tornadoes. Storm chasers reported a tornado over open country. No damage was reported.				
<b>GARZA COUNTY --- 14.3 NNE AUGUSTUS [33.32, -101.19], 15.7 NE POST [33.34, -101.19]</b>

A slow moving supercell thunderstorm produced five known tornadoes . This is the third of the five tornadoes. Storm chasers reported a tornado over open country. No damage was reported.				
<b>GARZA COUNTY --- 14.5 NE POST [33.33, -101.20], 13.7 NNE AUGUSTUS [33.30, -101.18], 16.8 NE AUGUSTUS [33.33, -101.14], 16.4 NE POST [33.36, -101.19]</b>				
	04/24/25 20:30 CST	0		Flash Flood (due to Heavy Rain)
	04/24/25 23:30 CST	0		Source: NWS Storm Survey
An NWS storm survey revealed significant flooding northeast of Post along several roadways. A slow moving supercell thunderstorm produced very heavy rainfall over an extended period of time over areas of rural Garza County. Water was flowing over Farm to Market Road 2008 three miles south of Farm to Market Road 651 along McDonald Creek. Most of the county roads were muddy and impassable at the time of the storm survey.				

## Storm Data and Unusual Weather Phenomena - April 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>MOTLEY COUNTY --- 4.9 SSW WHITEFLAT [34.03, -100.91], 5.4 ENE MATADOR [34.06, -100.74], 4.2 SW RUSSELVILLE [33.88, -100.74], 4.2 WSW ROARING SPGS [33.88, -100.92]</b>				
	04/24/25 20:30 CST		0	Flash Flood (due to Heavy Rain)
	04/24/25 23:30 CST		0	Source: COOP Observer

A slow moving supercell thunderstorm trained over areas of Motley County producing very heavy rainfall and flash flooding . An NWS cooperative weather observer reported flash flooding within the city of Roaring Springs as well as flooding over Texas State Highway 70 between Matador and Roaring Springs.

<b>GARZA COUNTY --- 11.9 NE AUGUSTUS [33.26, -101.16], 12.9 NE AUGUSTUS [33.25, -101.13]</b>				
	04/24/25 20:50 CST		0	Tornado (EFU, L: 1.75 mi , W: 30 yd)
	04/24/25 20:55 CST		0	Source: COOP Observer

A slow moving supercell thunderstorm produced five known tornadoes . This is the fifth of the five tornadoes. An NWS cooperative weather observer observed a brief tornado over open country. No damage was reported.

Another day of widespread severe thunderstorms occurred on the afternoon and evening hours of the 24th. Persistent but weak southwesterly flow aloft increased on the 24th which allowed supercell thunderstorms to produce giant hail. Increased low level southeasterly winds also allowed these thunderstorms to produce numerous tornadoes. Thunderstorms initially developed late in the afternoon along a dryline along the Interstate 27/US Highway 87 corridor and quickly intensified as they moved east. These storms were able to take advantage of a very unstable atmosphere and rotate to generate large hail. One supercell thunderstorm tracked from southeastern Swisher County across a portion of Briscoe County into Floyd County and then ended in southwestern Motley County. This storm was particularly intense producing a long lived swath of hail in excess of four inches in diameter. The largest observation came in eastern Floyd County where a hail stone was measured at 5.20 inches with a caliper. This same storm produced a long track tornado from northeastern Floyd County into southwestern Motley County. Numerous storm chasers observed a large tornado which moved mostly over ranch land or open country producing no known damage. Flash flooding was observed with this storm in and around Roaring Springs as it slowly moved southeastward. Another storm which initially developed over eastern Lubbock County rapidly intensified when it crossed into Crosby County. This supercell thunderstorm became cyclic producing at least five known tornadoes over open country in rural portions of Crosby and Garza Counties. Similar to the previous long lived supercell thunderstorm, this one also produced areas of flash flooding. An NWS storm survey revealed water over numerous roads which made many area roadways muddy and impassable.

Several slow moving thunderstorms trained over Hall and Childress Counties early in the morning on the 26th. WSR-88D MRMS rainfall was estimated between two to four inches over a widespread area with localized areas between four and five inches in northeastern Hall County. Numerous roads were closed or impassable in Hall and Childress Counties including US Highway 287 between Memphis and Estelline and Texas State Highway 256 between Memphis and Lakeview. One vehicle accident was reported on Texas State Highway 86 northeast of Turkey. The Prairie Dog Town Fork of the Red River filled its banks between Estelline and Childress briefly reaching minor flood stage at the Childress 10N river gage.

Several slow moving thunderstorms trained over Hall and Childress Counties early in the morning on the 26th. WSR-88D MRMS rainfall was estimated between two to four inches over a widespread area with localized areas between four and five inches in northeastern Hall County. Numerous roads were closed or impassable in Hall and Childress Counties including US Highway 287 between Memphis and Estelline and Texas State Highway 256 between Memphis and Lakeview. One vehicle accident was reported on Texas State Highway 86 northeast of Turkey. The Prairie Dog Town Fork of the Red River filled its banks between Estelline and Childress briefly reaching minor flood stage at the Childress 10N river gage.

**Low level atmospheric moisture continued to increase for another consecutive day across the South Plains and Rolling Plains of West Texas on the afternoon of the 25th. Numerous outflow boundaries, a dryline, and a cold front provided a focus for thunderstorm initiation during the afternoon hours. Three rounds of severe storms affected the Texas South Plains region from the afternoon of the 25th to the early morning hours of the 26th. A supercell thunderstorm developed just east of the Muleshoe National Wildlife Refuge (Bailey County) late in the afternoon. As the storm moved slowly southeast, it produced at least one tornado that passed just north of the small community of Bula (Bailey County). This first tornado, which lofted copious amounts of dust, was well-documented by storm chasers, with numerous photos and videos of it before it dissipated in southwestern Lamb County. The supercell thunderstorm continued to produce periods of strong low-level rotation as it inched southeast into northern Hockley County. The storm may have spawned additional brief tornadoes based on radar data, but there was no confirmation of any additional tornadoes. However, the slow-moving supercell dropped massive amounts of rainfall, particularly in northeast Hockley County. This resulted in flash flooding around Anton and Smyer in Hockley County resulting in numerous roads becoming impassable. This same supercell thunderstorm also produced very large hail up to four inches in diameter. Severe storms continued through the rest of the evening into the morning hours on Saturday producing very large hail. Another supercell thunderstorm tracked from Bailey County across Lamb and Castro Counties. This storm produced at least one tornado that narrowly missed the towns of Springlake (Lamb County) and Hart (Castro County). A photograph taken by a storm chaser west of Hart is the only definitive evidence of a tornado as no wind damage was reported. Lastly, a small complex of storms moved slowly across the far southeastern Texas Panhandle early Saturday morning producing extensive flash flooding and numerous road closures. Localized rainfall amounts were estimated to be between four and five inches over northeastern Hall County.**

## Storm Data and Unusual Weather Phenomena - April 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/27/25 17:54 CST		0	Hail (1.50 in)
	04/27/25 18:15 CST		0	Source: NWS Employee

Several severe hail reports were received across Lubbock County. A swath of severe hail occurred from near Woodrow through Idalou ranging in size from penny to ping pong ball size.

---

### FLOYD COUNTY --- 9.0 SE FLOYDADA [33.89, -101.22]

04/27/25 18:25 CST	0	Hail (1.00 in)
04/27/25 18:25 CST	0	Source: COOP Observer

An NWS cooperative weather observer reported quarter size hail southeast of Floydada.

Although large scale lift was weak on the afternoon and evening of the 27th, severe thunderstorms were still able to develop across the central South Plains. A dryline was again in place cutting from north to south around the Interstate 27/US Highway 87 corridor creating low level convergence. Strong heating along the dryline allowed a capping inversion to break late in the afternoon. With ample moisture in place at the lowest levels of the atmosphere, isolated storms were able to take advantage of a very unstable atmosphere. Isolated thunderstorms initially developed in and around the Lubbock (Lubbock County) vicinity and moved northeastward producing severe wind gusts along with hail up to ping pong ball size.

---

### LYNN COUNTY --- 1.0 N O'DONNELL [32.98, -101.83]

04/28/25 23:54 CST	0	Thunderstorm Wind (MG 81 kt)
04/28/25 23:54 CST	0	Source: Mesonet

A wet microburst affected the Texas Tech University West Texas mesonet site near O'Donnell measuring a wind gust to 93 mph.

---

### GARZA COUNTY --- 1.0 NE POST [33.19, -101.37]

04/29/25 00:33 CST	0	Thunderstorm Wind (MG 56 kt)
04/29/25 00:33 CST	0	Source: Mesonet

A Texas Tech University West Texas mesonet site near Post measured a wind gust to 64 mph.

---

### KING COUNTY --- 10.0 WSW GUTHRIE [33.56, -100.49]

04/29/25 01:12 CST	0	Thunderstorm Wind (MG 54 kt)
04/29/25 01:15 CST	0	Source: Mesonet

A Texas Tech University West Texas mesonet site near Guthrie measured severe wind gusts from 0112 CST through 0115 CST. A peak wind gust of 62 mph was measured at 0112 CST.

Scattered thunderstorms developed during the late evening hours of the 28th into the early morning hours of the 29th along a retreating dryline. A strong low level jet developed during this time period which fueled thunderstorm initiation and maintenance from the southern South Plains into the Rolling Plains. A few of these storms became severe as they moved over the region taking advantage of ample elevated instability. One storm produced a wet microburst near O'Donnell generating a wind gust of 93 mph. Additional thunderstorms produced severe wind gusts over the Rolling Plains.

---

### LYNN COUNTY --- 6.0 E TAHOKA [33.18, -101.68], 10.0 E TAHOKA [33.18, -101.61]

04/29/25 13:22 CST	0	Hail (1.75 in)
04/29/25 13:48 CST	0	Source: Trained Spotter

A trained spotter and fire department officials reported a swath of hail from roughly six miles east of Tahoka to ten miles east of Tahoka along US Highway 380. Hail ranged in size from ping pong ball to golf ball size.

---

### LUBBOCK COUNTY --- 2.0 S WOLFFORTH [33.47, -102.02], 2.0 W LUBBOCK [33.58, -101.88]

04/29/25 13:33 CST	0	Hail (2.00 in)
04/29/25 13:56 CST	0	Source: Public

Numerous reports were received of a swath of hail oriented from southwest to northeast roughly along US Highway 62/82 from near Wolfforth into the west side of the city of Lubbock. Hail ranged in sizes from quarter to two inches in diameter. No damage was reported.

---

### GARZA COUNTY --- 9.0 W POST [33.18, -101.54], 1.7 NNW POST [33.20, -101.39]

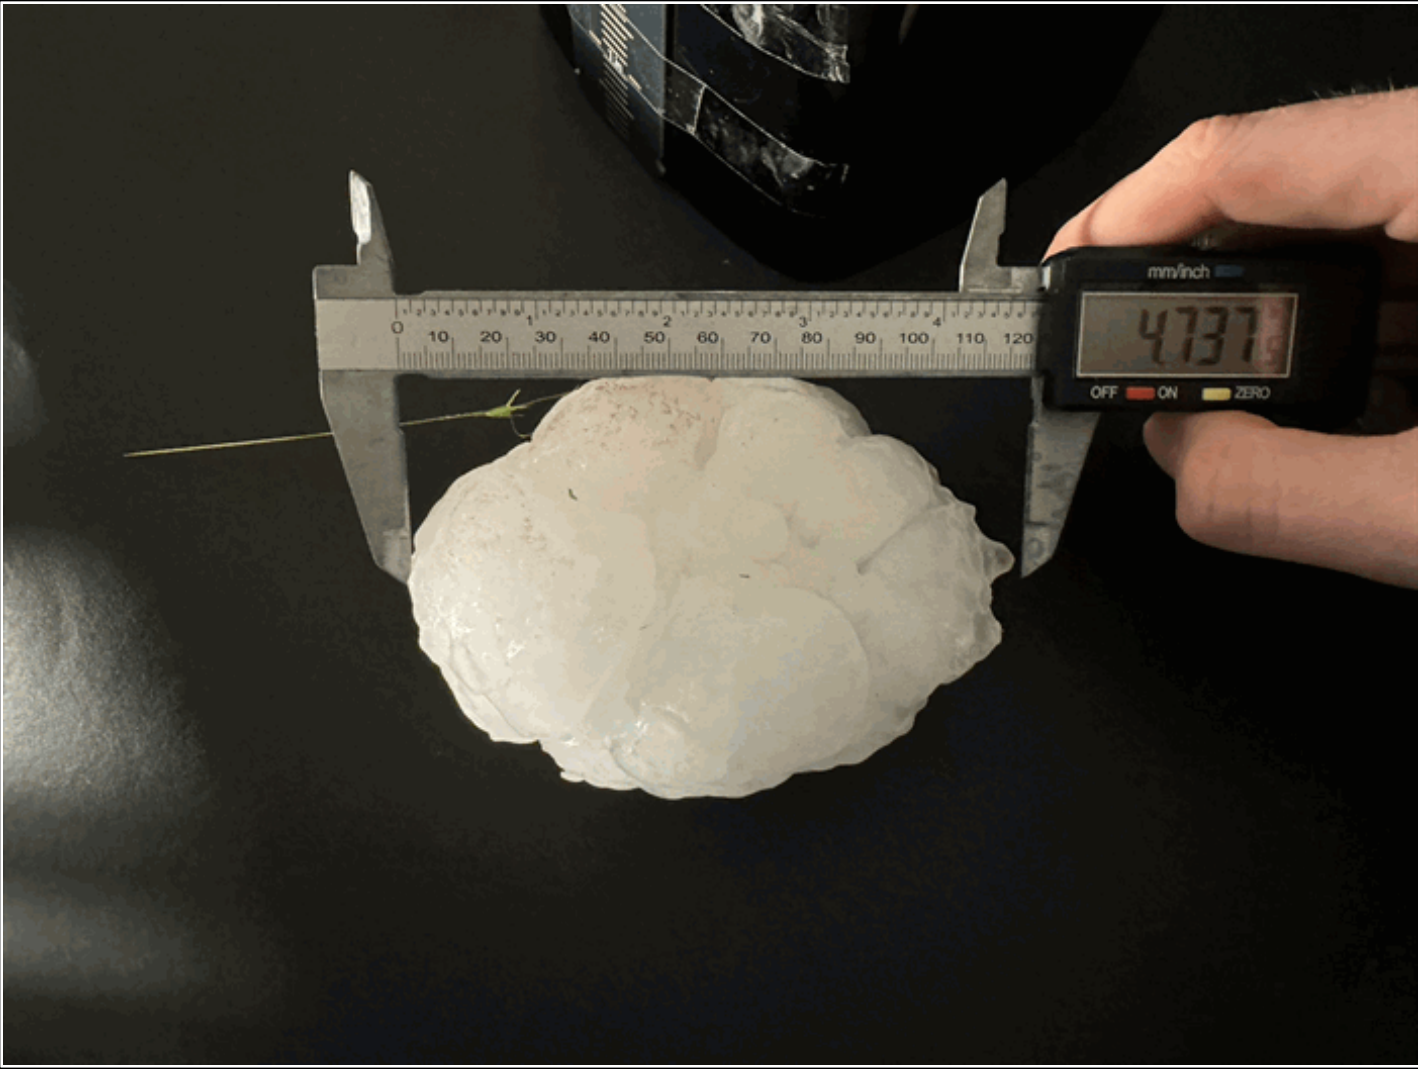

04/29/25 14:05 CST	0	Hail (3.50 in)
04/29/25 14:30 CST	0	Source: Law Enforcement

Several reports were received of very large hail from west of Post into the city of Post. Hail sizes ranged from two inches in diameter to 3.50 inches in diameter. No damage was reported.

Flash flooding due to heavy rain occurred over Texas State Highway 70 between Girard and Jayton. Several severe thunderstorms moved over the same area producing multiple rounds of heavy precipitation.				
<b>FLOYD COUNTY --- FLOYDADA [33.98, -101.33]</b>				
	04/29/25 16:25 CST		0	Hail (2.00 in)
	04/29/25 16:25 CST		0	Source: COOP Observer
Several reports were received from Floydada of hail ranging in size from golf ball to two inches in diameter. No damage was reported.				
<b>STONEWALL COUNTY --- 1.6 WSW SWENSON [33.21, -100.34]</b>				
	04/29/25 16:52 CST		0	Hail (1.50 in)
	04/29/25 16:52 CST		0	Source: Public
A report was received on mPing of ping pong ball size hail near Swenson.				
A cold front moved into the South Plains region on the afternoon of the 29th which fueled severe thunderstorm development along with flash flooding produced by heavy rainfall. A large upper level storm system was moving southeastward into western New Mexico with a weak short wave trough moving over West Texas. Lift from these features combined with the southward moving cold front to initiate thunderstorms across the central South Plains in the afternoon hours. A very unstable atmosphere south of the front produced very intense storms for areas across the Rolling Plains. One storm in King County generated hail as large as DVD-size. Widespread moderate to heavy rainfall was also observed with these storms producing flash flooding in and around Post (Garza County) and Jayton (Kent County).

	04/30/25 17:49 CST		0	Source: Public
Multiple mPing reports were received of a swath of hail from northwest of Aspermont to west of Old Glory along US Highway 380. Hail ranged in size from quarters to ping pong ball size.				
<b>A short wave trough approaching the area from the west initiated another afternoon of severe weather across the South Plains and Rolling Plains of West Texas. Scattered thunderstorms initially developed over the western South Plains and moved eastward into a more favorable environment for severe thunderstorms. Thunderstorms produced a mix of severe hail and severe wind gusts across portions of the central South Plains and Rolling Plains. Another notable part of this afternoon was the generation of numerous landspout tornadoes on the caprock. Several landspout tornado occurred from Hockley County into Lubbock County causing no known damage.</b>
