

## Storm Data and Unusual Weather Phenomena - October 2025

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

### TEXAS, South Panhandle

#### (TX-Z2022) CASTRO, (TX-Z027) BAILEY

10/24/25 14:45 CST	0	Strong Wind (MAX 48 kt)
10/24/25 16:06 CST	0	

A strong storm system approached the region on the 24th creating several landspout tornadoes along a nearly stationary boundary in the southwestern Texas Panhandle. A surface cyclone was located near Bootleg (Deaf Smith County) with a quasi-stationary front extending southwest from this low. Clearing cloud cover allowed for surface heating and strong low level vorticity near this boundary creating scattered thunderstorms and at least three landspout tornadoes. No known damage occurred with any of the landspout tornadoes.
