<b>MARYLAND, Central</b>									
<b>Charles County</b>									
6 SW La Plata	08	1158EST-1207EST	5	150	0	0	65K		Tornado (F1)
<p>A tornado touched down about 1 mile south of Garden Estates (about 6 miles SW of La Plata) on Biggs Farm Road. Several shelters and storage facilities were damaged or destroyed. Numerous trees, up to 2 feet in diameter, were either uprooted or topped. A large recreational van parked in front of a log-style home was overturned and at least 3 other automobiles were damaged from falling trees and debris. Then several homes sustained damage from felled trees, lost shingles, or suffered torn siding. A second touchdown of the tornado brought damage to the Indian Head area, in west Charles County. 20 to 30 large trees, up to 3 feet in diameter, were uprooted. The total track length of the combined touchdowns was about 5 miles.</p> <p>The remnants of Hurricane Frances produced damaging winds, tornadoes and flooding in the Mid-Atlantic Region on the 8th. The region was troubled with felled trees, downed power lines, washed out roads, and streams/creeks that overflowed their banks. Allegany and Washington Counties were especially hard hit according to emergency personnel. 7 inches of rain fell in the western Panhandle of Maryland. In Allegany County, Georges Creek rose out of its bank between Frostburg and Western Port. Route 135 was closed for buckling due to high water. Several bridges were under water and around 20 basements were flooded. Students were held in schools for an extra 1 1/2 hours due to inclement weather on the 8th and some schools were closed on the 9th. In Washington County, a mudslide washed out a section of westbound Maryland road MD-144.</p>									
<b>Montgomery County</b>									
Bethesda	08	1345EST-1355EST			0	0	5K		Thunderstorm Wind (EG60)
Trees and wires down in Bethesda, Silver Spring, Rockville, Kensington, and Laytonsville.									
<b>Allegany County</b>									
Westernport	08	1635EST-2030EST			0	0			Flash Flood
Roads closed due to high water.

<b>Harford County</b>									
Pylesville	17	0300EST			0	0	10K		Thunderstorm Wind (EG70)
Thunderstorm winds downed trees and power lines in Harford County. The thunderstorm also produced a tornado in this area early on the morning on the 18th.									
<b>Frederick County</b>									
1 NW Brunswick	17	1710EST- 1717EST	3	150	0	0	200K		Tornado (F1)
An F1 tornado produced structural damage to a couple of homes near Brunswick. A few buildings and out buildings were destroyed. Other structures sustained roof damage, and some trees were downed or stripped. The tornado damage continued to the north along Route 17 for approximately 3 miles before lifting at Burkittsville.									
<b>Washington County</b>									
Boonsboro	17	1725EST- 1728EST	1	75	0	0	120K		Tornado (F0)
A thunderstorm moved out of Frederick County into Washington County. This thunderstorm produced an F0 tornado near Boonsboro. The storm felled trees in Boonsboro, and the trees damaged five homes.									
<b>Montgomery County</b>									
2 WSW Poolesville	17	1735EST- 1739EST	1	200	0	0	120K		Tornado (F1)
A thunderstorm moved north out of Loudoun County, Virginia into Montgomery County, Maryland. A tornado touched down and damaged a few structures in the Poolesville area and snapped and uprooted trees in the wooded area and farm land leading to Beallsville.									
<b>Charles County</b>									
Maryland Pt	17	1742EST- 1747EST	3	100	0	0	10K		Tornado (F0)
A weak tornado touched down in southwest Charles County Maryland near Maryland Point. The tornado downed numerous trees near the Merrick 4-H Campground. It traveled north and downed trees along Williams Farm Place and American Beauty Place. The tornado dissipated shortly after uprooting trees near the intersection of Maryland Point and Smith Point Roads.

<b>MARYLAND, Central</b>									
<b>Frederick County</b>									
1 E Adamstown	17	1754EST-1805EST	7	100	0	0	50K		Tornado (F1)
An F1 tornado touched down in south central Frederick County, just east of Adamstown. The storm traveled north and produced minor structural damage. It blew out windows, tore shingles off a couple of roofs, and caused a chimney to collapse. The tornado also uprooted and sheared several large softwood and hardwood trees.									
<b>Frederick County</b>									
6 N Catoctin	17	1850EST-1857EST	3	200	0	0	5K		Tornado (F2)
An F2 tornado touched down in far northwest Frederick County, on the northwest edge of Catoctin Mountain Park. A thickly forested stand of hardwood trees were snapped off above the bases.									
<b>Washington County</b>									
Hancock	17	1937EST-1939EST	0.5	100	0	0	5K		Tornado (F0)
A weak tornado moved out of Morgan County, West Virginia. The tornado downed trees in remote areas just east of Hancock.									
<b>Washington County</b>									
<i>Countywide</i>	17-18	2140EST-0200EST			0	0			Flash Flood
The remnants of Hurricane Ivan affected the Mid Atlantic Region on the 17th and 18th. Numerous tornadic thunderstorms produced widespread damage across most of Maryland, from the western panhandle to the lower southern counties. Frederick County was hardest hit by tornadoes with around 40 structures damaged. Washington and Allegany Counties once again bore the brunt of the flooding as small streams and creeks rose out of their banks.									
<b>Allegany County</b>									
<i>Countywide</i>	17-18	2140EST-0200EST			0	0			Flash Flood
Small streams and creeks overflowing their banks.									
<b>Harford County</b>									
Joppa	18	0240EST-0243EST	1	100	0	0	100K		Tornado (F1)
Trees fell on a single story house causing extensive damage to the roof. The windows were also blown out of this residence in the Greenspring Hills Subdivision. Just before the storm lifted, it peeled some siding off a few homes and blew down a few more trees.									
<b>Harford County</b>									
Pylesville	18	0300EST-0310EST	2	125	0	0	350K		Tornado (F2)
A tornado touched down near a residence off Grier Nursery Road. The storm destroyed two mobile homes, the side of a barn was blown out, structural damage to two homes were noted, and numerous large healthy trees were twisted off near the bases.

<b>Calvert County</b>									
1 N Solomons	28	1500EST-1502EST	0.3	50	0	0	40K		Tornado (F0)
<p>A waterspout moved on shore on the 28th. The small tornado briefly touched down near Solomon. No injuries were reported and maximum winds ranged from 45 to 65 mph.</p> <p>The remnants of Hurricane Jeanne brought flooding to much of Maryland on the 28th. Rainfall amounts ranged from 3 to 6 inches. Numerous reports of stranded vehicles flooded Emergency Operations Command Centers. In Carroll County, a group of inmates were rescued from the roof of a security van after it became submerged in a swollen creek. A total of 50 roads were closed in Maryland. Residents of the Mt. Savage Area in Cumberland, Allegany County were hard hit again as the stream wall was compromised and needed to be rebuilt, roads and basements were flooded. The remnant low pressure even spawned a waterspout on the Chesapeake Bay. The storm moved ashore and produced a weak tornado in Solomon, Calvert County. The tornado damaged the Solomon's Visitor Center, taking part of the roof and hurling it onto Route 2. The storm also toppled an old barn in the vicinity of the visitor's center.</p>									
<b>Baltimore County</b>									
Cockeysville	28	1630EST-2130EST			0	0			Flash Flood

Car stranded in high water near the intersection of Route 450 and Crownsville Road.									

<b>VIRGINIA, North</b>									
<b>Fauquier County</b>									
2 S Bealeton	08	1320EST-1325EST	1.5	200	0	0	500K		Tornado (F2)
A tornado touched down 2 miles south of Bealeton and lifted a half mile south of Bealeton. The storm was 200 yards wide. The initial touchdown was near Morgansburg Road. The storm tracked north for 1.5 miles and produced significant damage to at least 2 homes. A roof was peeled off one home and some of the outside walls showed signs of bowing. At another dwelling, a garage door was blown into the garage and out of the sidewall. Several projectiles were lodged in the south side of the house. Three large greenhouses and some portable outhouses were also damaged. Two Ryder trucks were overturned. One truck fell on a small pickup, which sustained considerable damage. Maximum wind speeds were 115 to 130 mph.									
<b>Fauquier County</b>									
6 S Warrenton	08	1330EST-1333EST	0.8	100	0	0	7K		Tornado (F1)
A tornado touched down a half mile south of Hurlsville or almost 6 miles south of Warrenton. The storm was on the ground for three-quarters of a mile. No structural damage was observed, but 20 to 30 mature trees were uprooted or snapped. Maximum winds were 60 to 70 mph.									
<b>Culpeper County</b>									
Elkwood	08	1357EST-1400EST	0.3	100	0	0	50K		Tornado (F1)
A tornado briefly touched down in Elkwood. The tornado caused damage to the Willow Run Growers Greenhouse Complex. A 20 foot square building with a sturdy metal roof was completely destroyed. Two cars in a parking lot were moved and a pickup truck was tipped over. Estimated winds were 75 to 90 mph.									
<b>King George County</b>									
2 S Sealston	08	1451EST-1500EST	2.3	200	0	0	7K		Tornado (F1)
A tornado moved from Caroline County along the Stafford-King George County line. Numerous large trees (up to 3 feet in diameter) were uprooted and topped along Route 3 near Sealston. The storm was rated an F1 due to the extensive tree damage observed. The tornado crossed into Stafford County.

<b>VIRGINIA, North</b>									
<b>Stafford County</b>									
4 NE White Oak	08	1500EST-1514EST	5.5	100	0	0	10K		Tornado (F0)
The thunderstorm which produced the tornado near Sealston in King George County, continued into east Stafford County. A brief touch down occurred near Belle Plain (almost 4 miles NE of White Oak). Minor tree damage was noted and later the same tornado cycled and another touch down occurred near Aquia Bay Marina at the end of Aquia Creek Road (about 5 miles S of Aquia). Minor tree damage was noted there and 3 boats in dry dock were displaced.									
<b>Stafford County</b>									
2 SE Garrisonville	08	1518EST-1536EST	5	150	0	0	50K		Tornado (F0)
A tornado touched down in north Stafford County near Boswells Corner (near the intersection of U.S. Route 1 and Telegraph Road). Initially the storm produced minor damage to trees, and siding and shingles were torn from a few homes. Minutes later the storm produced extensive tree damage to the Crystal Lakes neighborhood. This tornado later crossed into Prince William County.									
<b>Prince William County</b>									
3 S Triangle	08	1536EST-1538EST	0.5	75	0	0	25K		Tornado (F0)
A tornado crossed into Prince William County from Stafford County. Damage was limited to a large, healthy stand of trees.									
<b>Fauquier County</b>									
2 N Delaplane	08	1605EST-1607EST	0.3	100	0	0	2K		Tornado (F0)
A tornado touched down briefly in a rural area 2 miles north of Delaplane. Several trees were topped or uprooted. The storm produced intermittent damage as it tracked northeast toward Route 17. Maximum winds were estimated at 60 to 70 mph.									
<b>City of Charlottesville</b>									
Charlottesville	08	1625EST			0	0	6K		Thunderstorm Wind (EG60)
Trees down across the city.									
<b>Clarke County</b>									
2 N Berryville	08	1630EST-1632EST	0.3	50	0	0	1K		Tornado (F0)
A weak tornado touched down briefly just north of Berryville and the intersection of Route 7 and U.S. Highway 340. A few trees were snapped off with a lot of shredded leaves on the ground. Maximum winds were around 65 mph.									
<b>Greene County</b>									
Ruckersville	08	1700EST			0	0	5K		Thunderstorm Wind (EG60)
Trees down across the area.									
<b>Shenandoah County</b>

<b>Albemarle County</b>									
Earlysville	17	1444EST-1446EST	0.3	50	0	0			Tornado (F0)
Brief touch down of a weak tornado recorded and reported by broadcast media.									
<b>Fauquier County</b>									
1 S Remington	17	1502EST-1515EST	9	200	2	0	0.25M		Tornado (F3)
A strong tornado touched down in southern Fauquier County, near Remington. A home was pushed off its foundation. A new pickup truck was lifted and hurled 75 yards over trees and power lines. It crashed upside down in a field.									
<b>Greene County</b>									
1 S Standardsville	17	1505EST-1512EST	5	100	3	0	3M		Tornado (F2)
A tornadic thunderstorm touched down near Standardsville. A roof was torn off a building just south of U.S. Highway 33. The roof was also torn off a house just north of U.S. Highway 33. The most extensive damage occurred around Highway 621. Four dwellings and a mobile home were destroyed. Approximately 50 other structures were damaged, including a nearby country club and a concrete block building. A trailer filled with cattle gates was also destroyed.									
<b>Warren County</b>									
2 N Front Royal	17	1510EST-1512EST	0.5	50	0	0			Tornado (F0)
A weak tornado produced minor damage to some large trees near Front Royal. Debris was thrown across several roads.									
<b>Madison County</b>									
1 W Hood	17	1512EST-1522EST	8	400	0	0	200K		Tornado (F2)
A thunderstorm that moved into Madison County from Greene County produced tornado damage near Hood. A number of homes were damaged. One aluminum garage was destroyed and a rock chimney was topped off. The tornado remained on the ground for several miles and tracked northward into the higher terrain of western Madison County. Several large areas of mature mixed forest were almost completely leveled in the Rapidan Wildlife Management Area and the Shenandoah National Park.									
<b>Fauquier County</b>									
1 E Opal	17	1512EST-1526EST	8	150	0	0	0.5M		Tornado (F2)
An F2 tornado touched down near Opal and tracked north. The tornado produced severe tree damage and some structural damage to several dwellings before dissipating near Warrenton. This is the second tornado of three tornadoes in Fauquier County associated with the remnants of Hurricane Ivan.									
<b>Fauquier County</b>									
2 SE Warrenton	17	1524EST-1552EST	13	200	0	0	0.75M		Tornado (F2)
An F2 tornado produced widespread structural damage to two subdivisions in northern Fauquier County. Some small items were turned into projectiles by this tornado and landed in trees and the sides of homes and some vehicles. There was substantial tree damage. Numerous large, healthy trees were uprooted and snapped. This is the third tornado of this event in Fauquier.

<b>Spotsylvania County</b>									
1 NE Massaponax	17	1529EST-1531EST	2	75	0	0			Tornado (F0)
A weak tornado moved across eastern Spotsylvania County, Virginia on the 17th. Emergency personnel witnessed a tornado in the New Crest Area. Minor damage to trees and a few homes were reported.									
<b>City of Fredericksburg</b>									
Fredericksburg	17	1536EST-1537EST	0.5	50	0	0			Tornado (F0)
A thunderstorm moved from Spotsylvania County into the eastern portion of the City of Fredericksburg. No property damage was reported, with debris scattered along Dixon Street.									
<b>Frederick County</b>									
1 NW Winchester Airport	17	1539EST-1544EST	5	125	0	0	0.25M		Tornado (F2)
An F2 tornado produced a nearly continuous path of damage for 5 miles in eastern Frederick County. It touched down west of Millwood Pike near the Winchester Airport. Three homes suffered roof damage, a detached two car garage was destroyed, a platform deck was blown away, an office trailer was overturned, and numerous trees along the track of the storm were uprooted or topped.									
<b>Stafford County</b>									
3 N White Oak	17	1542EST-1610EST	6	100	0	0	10K		Tornado (F1)
A tornado touched down in central Stafford County near Stones Corner. The storm tracked north northeast and lifted near Stafford. The damage was mostly limited to mature trees and large limbs. The tornado had a 6 mile intermittent track, and the storm continued on into Prince William County Virginia.									
<b>Spotsylvania County</b>									
Holladay	17	1605EST-1606EST	0.1	50	0	0			Tornado (F0)
A brief tornado touchdown was video taped by a fire fighter. No damage or injuries were reported.									
<b>Orange County</b>									
3 SE Lahore	17	1615EST-1620EST	3	100	0	0	150K		Tornado (F1)
A tornado touched down in a heavily forested area near the western end of Lake Anna, southeast of Lahore. Several trees were topped or uprooted and the tornado significantly damaged two homes.									
<b>Loudoun County</b>									
3 S Hamilton	17	1620EST-1650EST	12	200	0	0	500K		Tornado (F1)
A tornado touched down in western Loudoun County. This storm was a continuation of a track of the storm that moved through Fauquier County Virginia. The storm first touched down south of Hamilton and intermittent damage was noted from Hamilton to Lovettsville. A farm near Hamilton suffered severe damage. The farmhouse, horse barn and outbuildings were severely damaged or demolished. Two thoroughbred horses were cut by flying debris. The tornado produced damage along a 12 mile track. This storm continued to travel north into Maryland and produced damage in extreme southwest Frederick and eastern Washington Counties.

<b>VIRGINIA, North</b>										
<b>Prince William County</b>										
6 W Dale City		17	1626EST-1635EST	4	250	0	0	1M		Tornado (F2)
A tornadic thunderstorm moved through central Prince William County. This is the same storm that produced damage earlier in Stafford County. The initial touchdown in Prince William County was west of Dale City, near Independent Hill and Dumfries Road. The storm snapped or uprooted many large hardwood trees. Some of the trees fell on houses and other structures. The storm lifted and then reformed for the second touchdown in Manassas. Several homes suffered roof and shingle damage. An automobile was moved several feet. Damage also occurred in Manassas Park and in Yorkshire Village. This tornado continued north into Fairfax County.										
<b>Orange County</b>										
Rhoadesville		17	1628EST-1638EST	7	100	0	0	75K		Tornado (F2)
A thunderstorm produced a second tornado in Rhoadesville along Route 20 in eastern Orange County. A shed, horse trailer, and two silos were destroyed on one farm. A tree was thrown onto a house and a mobile home was demolished. The storm continued northward and produced sporadic and less significant damage.										
<b>Culpeper County</b>										
Mitchells		17	1636EST-1638EST	0.5	75	0	0	850K		Tornado (F1)
A tornado touched down in Mitchells along Route 615. The tornado moved over several outbuildings and homes. At least 12 homes sustained moderate to severe damage. Numerous trees were uprooted, and a shed was picked up off its foundation by the storm.										
<b>Frederick County</b>										
1 E Middletown		17	1637EST-1650EST	9	250	2	0	1M		Tornado (F1)
A tornado touched down in western Frederick County, Virginia on the 17th. The path of the storm was 9 miles long. It touched down about one mile east of Middletown and Interstate 81. Roof damage was noted to many barns and outbuildings. A large two story brick garage was nearly destroyed when its roof was blown off from strong F1 tornado winds. In the western end of the Stonebrook Farm Subdivision, an estimated 100 oak and other hardwood trees ranging from 18 to 36 inches in diameter topped or snapped 20 to 50 feet up from the base in roughly a 2 block area. One home was completely destroyed and over 100 others damaged due to falling trees.										
<b>City of Manassas</b>										
2 SE Manassas		17	1640EST-1645EST	1.6	75	0	0			Tornado (F1)
A tornado touched down on the east side of the City of Manassas. It produced structural damage and tree damage and then continued on to Manassas Park. The tornado damaged several dwellings before lifting in the Yorkshire Subdivision. This complex track left Manassas City, crossed into Prince William County, then crossed into Manassas Park City, crossing back into Prince William County, then finally crossing into Fairfax County.										
<b>Prince William County</b>										
2 S Yorkshire		17	1645EST-1646EST	0.3	75	0	0			Tornado (F1)
A tornado touched down on the east side of the City of Manassas. It produced structural damage and tree damage and then continued on to Manassas Park. The tornado damaged several dwellings before lifting in the Yorkshire Subdivision. This complex track left Manassas City, crossed into Prince William County, then crossed into Manassas Park City, crossing back into Prince William County, then finally crossing into Fairfax County.

<b>Culpeper County</b>									
2 E Catalpa	17	1650EST-1651EST	0.1	75	0	0	150K		Tornado (F1)
A tornado touched down north of Culpeper near Catalpa. The tornado blew down branches from several trees. It blew in a garage door and the roof was blown off the garage and off part of the house.									
<b>Fairfax County</b>									
3 SSW Centreville	17	1655EST-1705EST	7	150	1	0	2.5M		Tornado (F2)
A tornadic thunderstorm entered western Fairfax County from Prince William County. The storm had a path of about 7 miles. Beginning on Old Centreville Road, the storm produced scattered tree damage along its path and minor roofing damage to structures in the London Town Area. A line of damage was carved from Lee Highway northward into the Centreville and Chantilly areas. The tornado destroyed one estate and damaged about 50 other dwellings. The storm was also responsible for downed trees and power lines. The tornado lifted as it crossed Route 50.									
<b>Loudoun County</b>									
Dulles Intl Arpt	17	1712EST-1728EST	8	150	0	0	3M		Tornado (F2)
A thunderstorm moved into eastern Loudoun County from Fairfax County near the Dulles International Airport. The storm produced a tornado which touched down at Dulles International Airport and passed within one half mile of the National Weather Service Forecast Office in Sterling. This prompted the staff on duty to seek shelter in the office constructed saferoom. As the storm traveled north from the Dulles International Airport, it produced minor tree damage. More extensive damage occurred north of Waxpool Road at the Beaumede Corporate Park. Seven buildings were damaged. A wall collapsed in one of the buildings. A tractor trailer was overturned. The tornado also pushed two cars into the side of a building. The tornado weakened as it traveled north. The last damage in Loudoun County was reported just north of Route 7.									
<b>Albemarle County</b>									
Crozet	17	1721EST-2012EST			0	0			Flash Flood
Several low lying roads under water.									
The remnants of Hurricane Ivan affected the Mid Atlantic States on the 17th and 18th. Tornadic thunderstorms produced widespread, significant damage across Northern Virginia. Flooding of small streams, creeks, primary and secondary roads were reported by emergency and rescue personnel. In response, many roads were closed through the late evening hours as flood waters were slow to recede. At least 10 homes were destroyed and around 300 sustained damage. Communities in Culpeper, Frederick, Greene, Orange Counties and Manassas Park City also reported some agricultural damage.

<b>King George County</b>									
2 SW Comorn	17	1725EST-1736EST	7	250	0	0	0.5M		Tornado (F1)
An F1 tornado crossed central King George County on the 17th. The initial touch down was near the intersection of Route 3 and 607, near Popcastle. Frame homes in the Lake Jefferson Subdivision and nearby Igo Road areas were damaged by topped or felled trees. Windy Hill Farm also reported extensive damage to the barn and two other out buildings. The storm then jogged to the right and crossed Comorn Road, just south of Osso. The storm continued to produce damage as it entered the Potomac River at the end of Route 641. Trees fell on a house at the end of Route 641.
