Capitol Hgts 01 2059EST 0 0 10K Thunderstorm Wind

Anne Arundel County
Crofton 01 2115EST 0 1 20K Lightning
Unstable air ahead of a strong cold front aided the formation of thunderstorm bands, some which became severe, during the evening of the 1st. Well-developed storms produced near-severe wind gusts and hail. Wind damage occurred in the Winfield/Taylorsville section of Carroll Co along the gust front. Residents noted minor damage, including a trampoline that was picked up and deposited 600 feet downwind; a baby goat house, weighing 200 pounds, picked up and deposited 200 feet downstream; a few downed trees, and minor damage to cyclone fences.

A large tree was blown onto a home in Boulevard Heights (Prince George's Co - near Capitol Heights), causing substantial structural damage. Lightning strikes were prevalent with the thunderstorms. Three homes were struck in Harford Co, as was one transformer. Several lightning strikes in Anne Arundel Co injured one person and set a home on fire. Lastly, one half to three-quarter inch diameter hail fell in western Montgomery Co.

1650EST 0 0 5K Hail (2.00)

Prince George's County
Bowie 17 1650EST 0 0 2K Hail (1.75)
Scattered strong to severe thunderstorms moved across the northern and eastern suburbs of Washington, DC, dropping hail of various sizes and producing numerous funnel clouds but no tornadoes. An intense storm developed in Prince George's Co, then moved into western Anne Arundel Co. Hail varying from nickel (0.88) to 2 inches in diameter fell between Bowie and Crofton. Damage of unknown extent was noted in Crofton.

Funnel clouds were sighted throughout central Maryland, including Montgomery, Prince George's, Charles, Carroll, and Baltimore Cos. Isolated power outages were noted - mainly from concentrated lightning strikes.

VIRGINIA, North

Unstable air ahead of a strong cold front aided the formation of thunderstorm bands, some which became severe, during the evening of the 1st. Well-developed storms produced near-severe wind gusts and hail. The largest hail fell in Haymarket (golf ball sized); other reports of hail were received from Fauquier, Albemarle, and Loudoun Cos.

One storm during the afternoon produced a small area of straight-line wind damage in Manassas Park (Prince William Co). A portion of the gymnasium roof at Manassas Park High School was lifted slightly. At least 7 cars had window damage; one car was moved several feet from its original space. A nearby satellite dish sustained serious damage. No other damage was reported to local officials in the area.

An estimated wind gust of at least 58 mph was noted in Bailey's Crossroads. Lightning knocked out power to portions of Virginia, including Arlington and Fairfax Cos.

Daytime heating in a relatively unstable surface layer produced a small dust devil. The swirl tossed a canopy tent eight stories into the air before depositing it in some trees several hundred feet away. A portable soccer shelter was tossed into a small group of players sitting on stadium bleachers before it was destroyed. None of the players was hurt.

Steady rain and dense fog along Interstate 64 proved to be a volatile mix for drivers. At least one motorist, travelling at a high rate of speed given the conditions, caused a chain-reaction accident which ultimately involved 65 vehicles and sent 40 persons to the hospital. Nearly all the injuries were minor; cuts, scrapes, and bruises. The eastbound lanes remained closed for 5 hours, creating a backup extending for 9 miles.

A swirl of wind, coming down nearby mountains in a clear sky, caused minor damage at a residence in the Seneca Rocks/Riverton section of Pendleton Co. Damage included a lock box which was picked up, siding pulled out and pushed in again, and under-paneling which was sucked out of the home. Some of the damage was noted downwind of the residence.
