	07/27/08 15:55 EST		0	Marine Thunderstorm Wind (MG 57 kt)
	07/27/08 16:18 EST		0	Source: Mesonet

An automated observation at Crisfield measured a wind gust of 57 knots.

A cold front approached the region on July 27th as a strong upper level low pressure system remained over the northeast. Warm and humid air at the surface interacted with cooler air aloft to produce scattered to numerous showers and thunderstorms during the afternoon hours. Many of the storms became severe, producing wind gusts of 30 to nearly 60 knots over the Tidal Potomac River and Maryland Chesapeake Bay. One storm moved over Fairview Beach during an afternoon festival. Boats near the beach were hit by 4 foot waves, with several people being rescued from the water. Only minor injuries were reported.

CHESAPEAKE BAY POOLES IS TO SANDY PT MD COUNTY --- 0.4 SW MARTIN STATE AIRPORT [39.33, -76.41]				
Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	07/30/08 16:45 EST		0	Marine Thunderstorm Wind (EG 34 kt)
	07/30/08 16:46 EST		0	Source: AWOS

An automated observation at Martin State Airport reported a wind gust in excess of 30 knots.

A warm front moved north through the Mid Atlantic on the morning of July 30th, bringing increased heat and humidity to the region. An upper level disturbance then moved through the region during the afternoon. This helped to trigger isolated showers and thunderstorms during the late afternoon and evening. A storm moving over the northern Chesapeake Bay produced winds in excess of 30 knots.

Washington DC Emergency Management reported a tree down on South Carolina Ave.

Storm Data and Unusual Weather Phenomena - July 2008

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A slow moving cold front moved towards the Mid Atlantic Coast on July 23rd. This front provided the focus for scattered to numerous showers and thunderstorms to develop during the afternoon and evening hours. With high amounts of moisture in place, some storms produced heavy rainfall. Storms also moved repeatedly over the same areas. This allowed flash flooding to occur. Local broadcast media reported road closures, a water rescue and a mudslide. One storm that moved over the metro produced gusty winds that downed trees.

MARYLAND, Central

CHARLES COUNTY --- MASON SPGS [38.58, -77.12]

A tree fell onto a car in Thurmont.

A strong cold front combined with an upper level disturbance during the afternoon and evening hours of July 22nd. Cold air aloft combined with warm and humid air at the surface allowed for scattered to numerous showers and thunderstorms to develop across the Mid Atlantic. Some storms became severe, downing trees and power lines and producing large hail across portions of northern Maryland.

Route 1 was closed north of Route 543 due to flash flooding.

A slow moving cold front moved towards the Mid Atlantic Coast on July 23rd. This front provided the focus for scattered to numerous showers and thunderstorms to develop during the afternoon and evening hours. With high amounts of moisture in place, some storms produced heavy rainfall. Storms also moved repeatedly over the same areas. This allowed flash flooding to occur across the Baltimore metro area, resulting in several road closures and water rescues. Severe thunderstorms also occurred, with gusty winds downing trees and power lines. There were also a few reports of large hail.

Baltimore County Emergency Management reported several trees down in Cockeysville.

A warm front moved north through the Mid Atlantic on the morning of July 30th, bringing increased heat and humidity to the region. An upper level disturbance then moved through the region during the afternoon. This helped to trigger isolated showers and thunderstorms during the late afternoon and evening. A storm that moved over Baltimore County downed several trees and power lines.

Hardy County Emergency Management reported a tree down northwest of Wardensville.

A weak surface trough developed over the Mid Atlantic on July 20th. This trough combined with heat and humidity allowed isolated to scattered showers and thunderstorms to form across the eastern pan handle of West Virginia. Some storms became severe, downing trees and power lines in Hardy, Hampshire and Mineral counties.

JEFFERSON COUNTY --- 0.2 W SHEPHERDSTOWN [39.43, -77.80]

Storm Data and Unusual Weather Phenomena - July 2008

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details

	07/23/08 00:45 EST		0	Source: Newspaper

A local newspaper reported a large maple tree in Shepherdstown was downed by gusty winds.

A strong cold front combined with an upper level disturbance during the afternoon and evening hours of July 22nd. Cold air aloft combined with warm and humid air at the surface allowed for scattered to numerous showers and thunderstorms to develop across the Mid Atlantic. One storm became severe, downing a tree in the eastern pan handle of West Virginia.

BERKELEY COUNTY --- MARTINSBURG [39.45, -77.97], 1.5 NE NOLLVILLE [39.49, -78.00], 1.5 W INWOOD [39.35, -78.08], 1.3 ESE INWOOD [39.34, -78.03]

	07/23/08 11:00 EST		0	Flood (due to Heavy Rain)
	07/23/08 14:00 EST		0	Source: Newspaper

Local newspapers reported flooding in Inwood and Martinsburg. The ASOS at Martinsburg Airport measured 1.71 inches of rain within 24 hours, setting a new rainfall record.

A slow moving cold front moved towards the Mid Atlantic Coast on July 23rd. This front provided the focus for scattered to numerous showers and thunderstorms to develop during the afternoon and evening hours. With high amounts of moisture in place, some storms produced heavy rainfall. Storms also moved repeatedly over the same areas. This allowed flash flooding to occur. A local newspaper reported flash flooding in Berkeley County.

JEFFERSON COUNTY --- 0.5 E MECHANICSTOWN [39.27, -77.82]

	07/26/08 18:15 EST		0	Hail (0.88 in)
	07/26/08 18:15 EST		0	Source: Amateur Radio

An amateur radio operator reported penny to nickel size hail.

JEFFERSON COUNTY --- 1.1 W BOLIVAR [39.32, -77.77]

	07/26/08 18:36 EST		0	Hail (1.00 in)
	07/26/08 18:36 EST		0	Source: Trained Spotter

A trained spotter reported hail to the size of a quarter.

A sharpening surface trough combined with a weak upper level disturbance on July 26th. Scattered showers and thunderstorms developed during the late afternoon and early evening across the eastern pan handle of West Virginia. Some storms became severe, producing large hail to the size of quarters in Jefferson County.

HAMPSHIRE COUNTY --- 2.2 WNW WAPOCOMO [39.41, -78.77]

	07/30/08 18:06 EST		0	Funnel Cloud
	07/30/08 18:06 EST		0	Source: Trained Spotter

A trained spotter reported a funnel cloud south of Fort Ashby.

A warm front moved north through the Mid Atlantic on the morning of July 30th, bringing increased heat and humidity to the region. An upper level disturbance then moved through the region during the afternoon. This helped to trigger isolated showers and thunderstorms during the late afternoon and evening. A storm that moved over Hampshire County produced a funnel cloud.
