09/06/08 16:13 EST	0	Flood (due to Heavy Rain / Tropical System)
09/06/08 17:15 EST	0	Source: Emergency Manager

Flooding was reported on Oklahoma Street and Benning Road.

Tropical Storm Hanna tracked up the Mid-Atlantic coast on the 6th with maximum sustained winds around 50 mph. Hanna originally made landfall near the border of North and South Carolina around 3:20 AM on the 6th. Hanna tracked across eastern North Carolina during the early afternoon hours before turning northeast across southeastern Virginia later in the afternoon. Hanna eventually tracked across the Chesapeake Bay and into Delaware during the evening hours. With the track of Hanna being to the east, the strongest winds were also confined to our east. However, Hanna was still responsible for heavy rain. Rainfall amounts totaled around 4 to 8 inches across many locations in the city. Some roads were closed in the District due to flash flooding. Tropical Storm force winds were responsible for downed trees and power lines across Washington D.C. as well. The worst conditions occurred during the late morning and afternoon hours as the storm passed by just to the east.

	09/06/08 17:15 EST		0	Source: Amateur Radio

Flooding continued to close a road near Neabsco Creek.

Tropical Storm Hanna tracked up the Mid-Atlantic coast on the 6th with maximum sustained winds around 50 mph. Hanna originally made landfall near the border of North and South Carolina around 3:20 AM on the 6th. Hanna tracked across eastern North Carolina during the early afternoon hours before turning northeast across southeastern Virginia later in the afternoon. Hanna eventually tracked across the Chesapeake Bay and into Delaware during the evening hours. With the track of Hanna being to the east, the strongest winds were also confined to our east. However, Hanna was still responsible for heavy rain along with Tropical Storm force winds across northern and central Virginia. Rainfall amounts totaled around 4 to 8 inches across many locations with locally higher amounts over 9 inches. Numerous roads were closed throughout northern and central Virginia due to flash flooding. Tropical Storm force winds were responsible for downed trees and power lines across northern and central Virginia as well. The worst conditions occurred during the late morning and afternoon hours as the storm passed by just to the east.

KING GEORGE COUNTY --- 0.5 W JERSEY [38.20, -77.14]

Storm Data and Unusual Weather Phenomena - September 2008

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	09/13/08 19:51 EST		0	Thunderstorm Wind (EG 50 kt)
	09/13/08 19:51 EST		0	Source: Emergency Manager

Three trees were down near Jersey.

An unstable atmosphere served as a trigger for showers and thunderstorms to develop. There was enough instability for a severe thunderstorm that produced damaging winds.

FAUQUIER COUNTY --- 1.5 SSE BROAD RUN [38.81, -77.71]

09/30/08 00:00 EST	0	Hail (0.75 in)
09/30/08 00:00 EST	0	Source: Public

Penny size hail was reported just south of Broad Run.

PRINCE WILLIAM COUNTY --- 0.9 NE THOROUGHFARE [38.83, -77.66]

09/30/08 18:00 EST	0	Hail (0.75 in)

Penny size hail was reported near Thoroughfare.

PRINCE WILLIAM COUNTY --- 0.9 NE THOROUGHFARE [38.83, -77.66]

09/30/08 18:00 EST	0	Thunderstorm Wind (EG 50 kt)
09/30/08 18:00 EST	0	Source: Public

A three inch limb was down on Cranswick Court and other tree damage was found throughout the neighborhood. Several trees were also down on the Dominion Valley Drive area.

An approaching cold front combined with an unstable atmosphere to trigger showers and thunderstorms. Some thunderstorms were severe, producing damaging winds and large hail.

WEST VIRGINIA, East

MORGAN COUNTY --- 0.3 NW LARGENT [39.48, -78.38], 0.2 W LARGENT [39.48, -78.38], 0.2 ENE LARGENT [39.48, -78.38], 0.3 NNE LARGENT [39.48, -78.38]

09/27/08 19:25 EST	0	Flash Flood (due to Heavy Rain)
09/27/08 21:00 EST	0	Source: Emergency Manager

Route 9 was closed near the village of Largent due to flash flooding.

The combination of an unstable atmosphere along with plenty of moisture triggered showers and thunderstorms on September 27th. Some thunderstorms produced heavy rain in short periods of time, resulting in flash flooding.
