Public Information Statement

National Weather Service Little Rock AR
716 AM CDT Fri Jun 13 2025

...Public Information Statement...

The National Weather Service in North Little Rock will be conducting a required, scheduled update to their Advanced Weather Interactive Processing System (AWIPS) system from June 16 2025 through approximately June 18 2025. The NWS uses the AWIPS computer system to display and integrate weather and water information, and to send life-saving information, such as weather and water warnings, to the public.

During this time, some impacts will occur to the following services.

NOAA Weather Transmitters: All NOAA Weather Radio transmitters maintained by NWS Little Rock will be off air through the time of the install. This includes the following transmitters; Morrilton, High Peak, Russell, Mena, Cherokee Village, Russellville, Yellville, Gurdon, Star City, Little Rock, Mountain View, and Harrison.

Local graphical forecast maps that are hosted in numerous places on www.weather.gov/lzk will not be updated. This includes all maps on the Graphical Hazardous Weather Outlook page

The forecast office in North Little Rock will remain open and staffed throughout this period for public and partner phone calls and additional functions that can be completed without AWIPS.
