Several trees were blown down across Brinkley, one of which damaged a home. There was also damage to the roof of the elementary school.

On the 17th, for example, the mercury peaked at only 75 degrees in Clinton (Van Buren County) and 79 degrees at Russellville (Pope County). It was 80 degrees at Fort Smith (Sebastian County) and Newport (Jackson County). Meanwhile, it was 97 degrees at Texarkana (Miller County) and 98 degrees at El Dorado (Union County).

More than four inches of rain caused a nine foot rise on the Big Piney Creek near Dover (Pope County) during the evening of 08/19/2018. The flow jumped from 500 cubic feet per second (CFS) to 17,000 CFS in four hours. The Big Piney Creek climbed nine feet and overflowed. Roads near Treat (Pope County) were impassible due to water and storm debris. A similar rise occurred along the South Fork of the Little Red River at Clinton (Van Buren County).

Active weather continued on the 20th when a cold front plowed through the region. One last round of storms tore through locations toward the Mississippi River. Straight-line winds pushed trees onto houses and peeled the roof back on an elementary school in Brinkley (Monroe County).

Trees were blown down along Highway 27 south, about a quarter mile outside of Norman.

After several days of dry weather and at/above average temperatures, storms returned to finish August. A weak cold front arrived from the north on the 29th and stalled near the Arkansas and Missouri border. Surrounding the front, there were scattered thunderstorms during the afternoon. Lightning struck a cabinet shop southwest of Hot Springs (Garland County). This started a large structural fire.

It was a repeat performance on the 30th. Storms ignited early in the day across eastern Kansas, and worked into southwest Missouri. During the afternoon and early evening, the action spread into northern Arkansas. Storms blew down trees at Waldron (Scott County). A few miles west of town along Highway 248, trees caught on fire after being zapped by lightning. More trees were leveled near Mount Ida and Norman (both in Montgomery County).

As far as rainfall for the two day event, there was more than two inches at Alicia (Lawrence County), Calico Rock (Izard County), Omaha (Boone County), Parks (Scott County), and Waldron (Scott County).
