Some tree limbs were downed.

As August began, drought conditions were widespread in Arkansas, with dryness the most noticeable in northern and western sections of the state. Above normal temperatures were also common. On the 8th, a cold front approached from the north, and brought chances of rain and promised temporary relief from the heat.

Ahead of the front, thermometers showed readings in the 90s. During peak heating, thunderstorms popped up quickly in the northern half of the state. Some of the storms cranked out damaging winds. Trees were downed at Gravel Ridge and Macon (both in Pulaski County), with one tree on a fence. More trees were toppled in west Little Rock (Pulaski County). The trees fell on power lines and a home, and power outages lasted into the overnight hours for some residents. Tree damage was also noted in Hot Springs (Garland County), and several utility poles were snapped. This was the most severe weather reported during the month.

Locations with an inch or more of rainfall were few and far between. Bogg Springs (Polk County) received 2.02 inches of rain, 1.16 inches at Mena (Polk County), 1.07 inches at Hot Springs (Garland County), and 1.00 inch at Batesville (Independence County).

GARLAND COUNTY 1.5 SSW HAWES [34.53, -93.16]						
08/15/22 15:36 CST	10K	Thunderstorm Wind (EG 61 kt)				
08/15/22 15:36 CST	0	Source: Public				

Multiple trees were damaged along with a roof, shed, and fence. The report was relayed via social media.

On the 15th, the cold front made headway through northeast Arkansas, and afternoon temperatures were only in the 80s. It was still hot farther to the southwest, with readings in the 90s to around 104 degrees. It was the hottest day of the year to this point at Little Rock (Pulaski County) as the mercury hit 104 degrees. It was also 104 degrees at De Queen (Sevier County), Fort Smith (Sebastian County), and Russellville (Pope County). The front was surrounded by plenty of moisture in the low levels of the atmosphere, and this fueled scattered afternoon thunderstorms. The storms unleashed strong to damaging winds in places. Between Hot Springs and Royal (both in Garland County), numerous trees were downed. There was some roof damage, as well as damage to a shed and a fence.
