Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

ARKANSAS, Central and North Central

(AR-Z044) PULASKI

	12/02/13 22:16 CST	0	Dense Fog
	12/04/13 01:12 CST	0	

Dense fog developed in Little Rock late on the evening of the 2nd and continued until the wee hours of the 4th. Much of the time, visibility was 1/4 mile or less, though visibility did improve somewhat for a couple of hours on the afternoon of the 3rd. The lowest visibility was zero for four hours during the early morning of the 3rd. More than 30 flights were canceled at the Little Rock airport.

	12/06/13 19:00 CST		0	

After Arctic air overspread Arkansas, an area of low pressure aloft moved toward the state from the southwestern United States. As the low pressure approached, moisture moved up over the cold air, resulting in wintry precipitation. In northern Arkansas, freezing rain and sleet began during the morning of the 5th, then gradually changed to sleet, and finally to mainly snow during the wee hours of the 6th. Rain initially fell in central and southern Arkansas on the 5th. On the morning of the 6th, rain changed to freezing rain and sleet. Snow was added to the mix in some places during the afternoon. Late on the morning of the 6th, rain changed over to freezing rain and some sleet in southern Arkansas. All precipitation came to an end in all parts of Arkansas by mid-evening on the 6th. There was one fatality directly related to the winter weather. On the morning of the 6th, a large limb fell into a camping trailer 4 miles north-northwest of Dover in Pope County. The 62-year-old man in the trailer was killed. There was one indirect injury on the 9th when the canopy at a gas station in Ash Flat (Sharp County) collapsed under the weight of ice and snow. Other structural collapses occurred in northern and western Arkansas for several days after the sleet and snow.

Ice storm conditions caused trees and power lines to fall in parts of western Arkansas. About 40,000 electric customers lost power in the Little Rock County Warning Area. Power outages were especially prevalent in Johnson, Pope, Logan, Yell, Polk, Scott, and Montgomery counties. It took six days to restore power to all customers. Arkansas Forestry Commission crews were called out to clear roads in Pope, Logan, Scott, and Polk counties. Most schools and government offices closed due to the winter weather. More than 50 flights were canceled at the Little Rock airport. Numerous events leading up to Christmas, such as city parades, the lighting ceremony for the State Capitol and the state high school football playoffs, were canceled or postponed by the winter weather.

President Barack Obama declared a federal disaster in the following counties: Johnson, Logan, Marion, Newton, Polk, Scott, Searcy, Sharp, and Van Buren.

Total accumulations of snow and sleet reached 8 to 12 inches across much of northwest and north central Arkansas. Accumulations tapered off farther south with only 1 to 2 inches of snow and sleet in parts of west central and central Arkansas.

Freezing rain accruals occurred over the northern three-quarters of the state. Most totals were in the .10 to .50 inch range, but parts of west central Arkansas experienced an ice storm, with accruals exceeding .75 inch.

Storm Data and Unusual Weather Phenomena - December 2013

12/07/13 16:00 CST	0	Winter Weather
12/08/13 07:00 CST	0	

Freezing rain and sleet moved into southern Arkansas late in the day on the 7th and spread northward, reaching northern Arkansas during the wee hours of the 8th. Precipitation tapered off after sunrise on the 8th, with only patchy freezing drizzle and freezing fog lingering through the remainder of the morning. The wintry precipitation caused hazardous driving conditions.

12/09/13 18:00 CST	0	Winter Weather
12/09/13 22:00 CST	0	

A weak area of low pressure aloft moved across Arkansas on the evening of the 9th, touching off light freezing rain and sleet in parts of central and southern Arkansas. Although amounts were generally a tenth of an inch or less, the ground was cold from a previous intrusion of Arctic air. As a result, icy patches developed on a number of highways and county roads.

Storm Data and Unusual Weather Phenomena - December 2013

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details

Arkansas 381 was closed due to water over the highway.

DESHA COUNTY --- 0.3 SE HALLEY [33.53, -91.33], 5.1 ENE HALLEY [33.55, -91.24]				
	12/21/13 16:53 CST		0.10M	Tornado (EF1, L: 5.04 mi , W: 440 yd)
	12/21/13 16:58 CST		0	Source: NWS Storm Survey

This tornado moved out of Chicot County into Desha County. One mobile home was knocked off its foundation, had its porch torn off, and had a large metal intermodal shipping container in the back yard overturn and crash into the rear wall of the mobile home, smashing in the kitchen wall. A house had its porch torn off, roof damage, a hole punched in a wall, and broken windows. Another house had a considerable amount of roofing material torn off. At another house, the attached carport was torn off, with much of it landing on the roof of the house. Several sheds were destroyed, large trees were blown down, and several power poles were snapped off. The tornado then exited Desha County 5.1 miles east-northeast of Halley and re-entered Chicot County near the Yellow Bend Port.

JACKSON COUNTY --- 1.8 NNW NEWPORT MUNI ARPT [35.66, -91.19], 2.3 W NEWPORT MUNI ARPT [35.64, -91.22], 1.8 ENE DIAZ [35.64, -91.24], 1.8 SE CAMPBELL STATION [35.65, -91.22]

12/22/13 23:05 CST	0	Flood (due to Heavy Rain)
12/28/13 13:10 CST	0	Source: River/Stream Gage

Heavy rainfall on the 21st caused the Ouachita River at Camden to rise above flood stage during the late evening hours on the 22nd. This river fell below flood stage several days later, during the afternoon of the 28th.

A cold front moved into northwest Arkansas on the morning of the 20th and lingered in the state until the night of the 21st. While the front was making its way slowly across the state, an area of low pressure arrived from the southwest. The result was heavy rain and flash flooding in the cooler air behind the front. In the warmer air ahead of the front, isolated tornadoes occurred.

Some of the larger rainfall totals for the 48 hours that included the 20th and 21st were: 7.92 inches 3.3 miles west of Carlisle (Lonoke Co.), 7.68 inches at Little Dixie (Woodruff Co.), 7.66 inches at Des Arc (Prairie Co.), 7.37 inches at Keo (Lonoke Co.), 6.71 inches at Georgetown (White Co.), 6.50 inches at Griffithville (White Co.), 6.45 inches at Augusta (Woodruff Co.), 6.29 inches at Chenal Valley (Pulaski County), 6.15 inches at DeGray Lake (Clark Co.), 6.12 inches 8.8 miles west of Little Rock (Pulaski Co.), and 6.00 inches 0.5 mile southwest of Beebe (White Co.). Numerous other stations reported amounts between 4 and 6 inches, especially in eastern, central, and southern parts of Arkansas.

Storm Data and Unusual Weather Phenomena - December 2013

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A weak area of low pressure aloft moved across northern Arkansas on the afternoon and early evening of the 23rd. Cold temperatures were in place at the time, so the resulting precipitation fell as light snow. Snowfall amounts were generally only a few tenths of an inch, but even these small amounts were sufficient to cause some hazardous driving conditions.
