	02/11/19 20:11 CST	0	Source: Social Media

Artis Lane, south of Dave Ward Dr. was closed due to flash flooding. The report was from the city of Conway twitter account.

It was a perfect setup for flooding heading into mid-February. The ground was wet (and could not hold much additional water) following six straight months of above average precipitation. Rivers were running high. The atmosphere was loaded with moisture on the 10th/11th, and a storm system in the Plains was set to wring it out of the clouds. It was a bad situation. The forecast called for several inches of rain from central into northeast Arkansas. Rain focused along and north of a front that was stalled over southeast sections of the state.

By the time the event was over, more than half a foot of liquid was measured in places. Seventy two hour precipitation totals through 600 am CST on the 12th included 6.02 inches at Newport (Jackson County), 5.18 inches at Blytheville (Mississippi County), 5.10 inches at Walnut Ridge (Lawrence County), 4.61 inches at Batesville (Independence County), 4.03 inches at North Little Rock (Pulaski County), and 4.01 inches at Russellville (Pope County).

Swollen rivers closed highways in the northeast, including Highway 37 between Cord (Independence County) and Tuckerman (Jackson County), Highway 14 between Oil Trough (Independence County) and Newport (Jackson County), Highway 37 near Grubbs (Jackson County), Highway 25 between Black Rock and Powhattan (both in Lawrence County), and Highway 166 northeast of Pocahontas (Randolph County).

There were numerous reports of flash flooding. At least two vehicles were swept off the pavement by rapidly rising creeks. The vehicles were just east of Springfield (Conway County) near Cadron Creek, and west of Hagarville (Johnson County) at the intersection of Highways 123 and 292 close to Minnow Creek. No injuries were reported in either incident.

The rain was too much for rivers in eastern Arkansas. There was major flooding along portions of the Cache River (water threatening homes, and roads and farmland under water in Jackson and Woodruff Counties). Moderate to major flooding was noted along stretches of the Black and lower White Rivers.

At Newport (Jackson County), the White River topped out just over 30 feet on the 14th. At this level (four feet above the flood stage of 26 feet), major flooding is expected. Just south of town, an eroding levee was in danger of failing. An emergency was declared on the 12th, and people near the levee were advised to evacuate (voluntarily). As a precaution, sandbags were made available to local residents. The levee was stabilized with sandbags as well.

There was also moderate flooding along the somewhat flashy (rapid rises and falls) Little Red River at Judsonia (White County). The river crested roughly five feet above the flood stage during the morning of the 12th.

CLARK COUNTY --- 1.0 NE ARKADELPHIA [34.13, -93.06], 2.3 ENE ARKADELPHIA [34.13, -93.03], 1.6 NW TUPELO [34.10, -93.02], 1.1 ESE ARKADELPHIA MUNI ARP [34.09, -93.05]

02/16/19 22:52 CST	0	Winter Weather
02/16/19 23:55 CST	0	

A cold front plowed through Arkansas from the Plains early on the 15th. Temperatures dropped at or just below freezing through much of the afternoon in northern sections of the state. A storm system was on the heels of the front, and promised to bring some precipitation. Fortunately, moisture was limited locally, with a period or two of light freezing rain in the far north. Any impacts were minor.

Highway 154 had water covering the roadway.

Rain was heavy at times on the 19th, and there were hit and miss thunderstorms as well. There was no severe weather, but there was plenty of lightning. During the evening, an employee at Little Rock National Airport (Pulaski County) was struck by lightning while loading a plane. He was knocked unconscious for several minutes before being treated at a local hospital.

At 600 pm CST on the 19th, it was 31 degrees at Harrison (Boone County) and 32 degrees at Mountain Home (Baxter County). Pockets of freezing rain were reported. Ice coated exposed objects, with quarter to half inch accruals from Harrison (Boone County) to Western Grove (Newton County). This led to power outages in places.
