

Storm Data and Unusual Weather Phenomena - July 2024

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

ARKANSAS, Central and North Central

OUACHITA COUNTY --- 0.7 N EAST CAMDEN [33.61, -92.74]

07/08/24 17:01 CST	0	Thunderstorm Wind (EG 56 kt)
07/08/24 17:01 CST	0	Source: Public

Power lines and power poles were blown down across the town of Camden.

DALLAS COUNTY --- 0.9 SSE PINE GROVE [33.87, -92.77], 0.4 NNE NEW HOPE [33.91, -92.80]

07/08/24 17:46 CST	0	Tornado (EF1, L: 3.20 mi , W: 75 yd)
07/08/24 17:55 CST	0	Source: NWS Storm Survey

The Pine Grove Tornado occurred in tandem with the Sparkman-New Hope Tornado, within the same parent supercell, and formed near Dallas County Road 27 and AR Highway 128, just south of Pine Grove. The tornado severely damaged the awning of a carport that was attached to a manufactured home near its starting point, and caused primarily tree damage in the immediate vicinity. The tornado kept moving northwestward, parallel to to AR Highway 128, and crossed Dallas County Road 254, then AR Highway 128, and continued to parallel the AR Highway 128, causing mainly tree damage in its path. The tornado then dissipated just north of New Hope, near the intersection of Dallas County Roads 224 and 231. This tornado had maximum estimated wind speeds of 90 mph, consistent of an EF-1 rating.

DALLAS COUNTY --- 1.9 WSW PINE GROVE [33.87, -92.80], 0.2 W NEW HOPE [33.90, -92.80]

07/08/24 17:51 CST	0	Tornado (EF1, L: 2.40 mi , W: 75 yd)
07/08/24 17:56 CST	0	Source: NWS Storm Survey

This tornado occurred within the same parent supercell as the Pine Grove Tornado , and began near Dallas County Road 267 and AR Highway 207, just a few miles south of New Hope. The tornado moved primarily northward, following Dallas County Road 267, causing only tree damage in its path. The tornado then dissipated just west of New Hope, near AR Highway 128. This tornado had maximum estimated wind speeds of 90 mph, consistent with an EF-1 rating.

DALLAS COUNTY --- SPARKMAN [33.92, -92.85]

07/08/24 18:00 CST	0	Thunderstorm Wind (EG 52 kt)
07/08/24 18:00 CST	0	Source: Emergency Manager

Trees were blown down in the community of Sparkman.

OUACHITA COUNTY --- 0.7 SSW TROY [33.49, -93.08], 2.1 WNW TROY [33.51, -93.11]

07/08/24 19:00 CST	0	Tornado (EF1, L: 2.30 mi , W: 50 yd)
07/08/24 19:03 CST	0	Source: NWS Storm Survey

This survey was conducted from geotagged drone imagery from the Camden Fire Department. Using the series of geotagged photos, we were able to confirm an EF-1 tornado that moved from southeast to northwest near the community of Stephens in southwest Ouachita County. Along its path, the tornado primarily caused a long swath of trees to be uprooted. There were a couple of outbuildings damaged along this path, with the worst of the structural damage identified as metal roofing peeled off a large barn . This tornado continued into Nevada County for approximately a half mile. A special thanks to the Camden Fire Department for providing the areal survey of this damage path.

JEFFERSON COUNTY --- 4.8 W FAITH [34.11, -92.18], 4.2 WSW SULPHUR SPGS [34.16, -92.20]

07/08/24 21:28 CST	0	Tornado (EF1, L: 3.20 mi , W: 75 yd)
07/08/24 21:35 CST	0	Source: NWS Storm Survey

This tornado formed to the west-northwest of Talladega, near Huntley Trail and West Lane. The tornado moved northward primarily over private and rural land, as inferred by radar data. The tornado then crossed Samuel Road, where a few chicken houses had some metal panels ripped off, and primarily tree damage was observed elsewhere in the area. The tornado then began to move northwestward, and caused tree damage in the Double Wells community, damaging a carport, knocking over powerlines as a result of falling trees. The tornado then dissipated just after crossing the intersection of Jed Road and Sulphur Springs Road. This tornado had maximum estimated wind speeds of 90 mph, consistent with an EF-1 rating.

LONOKE COUNTY --- 0.7 S ENGLAND [34.54, -91.97]

07/08/24 21:30 CST	0	Thunderstorm Wind (EG 52 kt)
07/08/24 21:30 CST	0	Source: Public

Large trees limbs were snapped in the town of England.

JEFFERSON COUNTY --- 0.6 WNW WARBRITTON [34.27, -92.03], 0.7 NE PASTORIA [34.36, -92.04]

Storm Data and Unusual Weather Phenomena - July 2024

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	07/08/24 21:49 CST		0	Tornado (EF0, L: 5.80 mi , W: 75 yd)
	07/08/24 21:59 CST		0	Source: NWS Storm Survey
<p>This tornado was associated with a rainband within the remnants of Hurricane Beryl, forming just to the north of Pine Bluff, near the southeastern perimeter of Pine Bluff Arsenal. The tornado then crossed the Arkansas River, moving through a rural region of Jefferson County, paralleling Earl Chadick Road, and then dissipated near Pastoria, causing only minor tree damage. This tornado had maximum estimated wind speeds of 80 mph, consistent with an EF-0 rating.</p>				
<hr/>				
SALINE COUNTY --- 0.9 SSW SALEM [34.62, -92.57], 0.9 SSE SALEM [34.62, -92.56], 1.5 SSE SALEM [34.61, -92.56], 1.5 S SALEM [34.61, -92.57]

	07/09/24 10:21 CST	0		Source: Public
A 24 hour rainfall total of 8.00 inches was estimated to have fell at Ico.				
<p>Hurricane Beryl made landfall near Matagorda Texas on the morning of the 8th. The remnants of Beryl quickly tracked northward after landfall, bringing spiral feeder bands of showers and thunderstorms into Arkansas during the afternoon and evening. Overnight on the 8th through the morning of the 9th, the remnants of Beryl tracked northeastward up Interstate 30 and Highway 67/167 through Arkansas. Heavy rainfall led to areas of flash flooding as well as tornadoes on the north and east side of the center of circulation. The system pushed out of Arkansas by mid-day on the 9th.</p>				
STONE COUNTY --- 1.3 ENE FIFTY SIX [35.96, -92.20]
