Trees were blown down on Highway 26 near Delight.

An upper ridge was west of Arkansas and not directly over the state allowing thunderstorms to develop around its eastern periphery. On the 3rd, scattered storms popped up during the heat of the afternoon, with spotty severe weather in the north. There was quarter size hail at Mount Judea, and a tree was toppled onto a home in Parthenon (both in Newton County). Enough rain fell to flood Highway 327 southeast of Jasper (Newton County). There was also a landslide in the same area.

Early the next morning, strong to severe storms swept from Missouri into northern Arkansas. While the storms generally weakened with time, there was a 60 mph gust measured at the airport just northwest of Harrison (Boone County). Trees were knocked down at Lead Hill (Boone County).

During the afternoon of the 5th, a cluster of thunderstorms tracked through eastern sections of the state from north to south producing severe weather. In addition, there was a whole lot more wind damage in northern and central Mississippi. Cool outflow from the storms took off to the west.

As the outflow oozed westward through central and southern Arkansas, thunderstorms erupted. Some of the storms were huge, and exhibited structure found in springtime tornadic supercells (storms with rotating updrafts). In this case, rotation was found well aloft

	06/29/20 20:45 CST		0	Source: River/Stream Gage		

Flash flooding was noted downstream of Remmel Dam at Jones Mill on the Ouachita River, due to heavy rain and increased dam releases.

While it appeared the big storms were over, there was one more round from west central into central sections of the state on the 29th. Clouds and downpours yielded high temperatures of only 77 degrees at Conway (Faulkner County) and North Little Rock (Pulaski County), 78 degrees at Cabot (Lonoke County) and Little Rock (Pulaski County), and 79 degrees at Benton (Saline County) and Malvern (Hot Spring County). Multiple roads were flooded in Hot Springs (Garland County) after three to four inches of rain fell. There was about as much rain at Malvern (Hot Spring County) and Pine Ridge (Montgomery County), with tree damage at Magnet Cove and Social Hill (both in Hot Spring County).

For the month, there was more than the usual rain at many locations. Surpluses of rain from one to more than three inches occurred at Little Rock (Pulaski County) and Pine Bluff (Jefferson County).
