	09/25/19 18:07 CST		0	Hail (0.88 in)
	09/25/19 18:07 CST		0	Source: Trained Spotter

One of these fronts sagged southward through the area on the 23rd and 24th. Another front followed a couple of days later. The fronts triggered scattered showers and thunderstorms, mainly over the northern counties.

The most active period as far as severe weather was the afternoon and evening of the 25th. Isolated severe storms developed in the northeast, and were responsible for large hail and wind damage.

Pockets of heavy rain yielded several inches of rain in places from the 23rd through the 25th. This happened mainly north of Little Rock (Pulaski County). Seventy two hour amounts through 700 am CDT on the 26th included 5.38 inches at Clarksville (Johnson County), almost 5.00 inches at Hattieville (Conway County), 4.70 inches at Searcy (White County), 3.40 inches at Alicia (Lawrence County), and 3.13 inches at Lead Hill (Boone County).
