

Regional Climate Summary

April 2019

Weather Forecast Office
Midland/Odessa, TX

Issued August 4, 2021 12:24 AM CT

This April began with warm, dry, and windy conditions across the region. Midland Int'l reached a record high temperature of 97°F, while a damaging wind storm occurred in southeast New Mexico on the 10th. The pattern shifted mid-month as moisture increased ahead of a storm system that developed on the 12th-13th. Many locations in the Permian Basin topped 1.00" of rain in 24 hours. Midland Int'l received a daily record of 1.55" on the 13th. Warm and dry conditions returned until the 22-23rd when a potent storm system arrived and brought severe weather to the area including a major hailstorm that impacted the Midland metro area. The month concluded with a day filled with severe weather including a confirmed tornado near Fluvanna, TX.
