

Regional Climate Summary

February 2019

Weather Forecast Office
Midland/Odessa, TX

Issued August 4, 2021 12:15 AM CT

This February was exceptionally warm and dry as most of the region missed out on much needed precipitation. The driest locations included Carlsbad, Hobbs, and Seminole which did not receive any measurable rain or snow. Other locations across the area only received 2-25% of normal precipitation for the month. Temperatures around West Texas and southeast New Mexico were near normal to above normal. The Trans Pecos was the warmest region as Fort Stockton tied its 10th warmest February on record. It was also a very windy month. Midland Int'l Air & Space Port recorded six days with wind gusts over 40 mph.
